ACKNOWLEDGEMENTS

The Western Colorado Health Systems Agency wishes to thank the Western Colorado Area Health Education Center and the Colorado Department of Local Affairs for their assistance in the publication of this directory. The financial support of these organizations was critical in the printing and distribution of this manpower listing.

PREFACE

This manpower directory identifies practicing physicians, physician assistants, nurse practitioners, chiropractors, dentists, optometrists, podiatrists, public health nurses and certified nurse midwives in the 21 counties of the health service area west of the Continental Divide. (See map on preceding page.) The need for this type of information was identified when the Western Colorado Health Systems Agency began work on a primary care plan for rural areas and attempted to identify currently practicing medical practitioners. The difficulty in securing accurate, up to date information prompted the Agency to undertake the task of developing an inventory of medical personnel.

The "manhunt" began with Western Colorado phone books, and was aided by hospital staff lists, the University of Colorado SEARCH program document, the Rocky Mountain Medical Journal Directory, and the American Medical Association Directory. Many newcomers were identified by word of mouth. Finally all the names and addresses were checked for accuracy by phone or letter to that professional's office or through a colleague.*

Active research on this medical directory ended September 15, 1979. Since then, WCHSA staff have followed personnel changes through local newspapers and have incorporated these "entrances and exits" in this listing.

We feel that this directory represents a significant improvement in the accuracy, currency, and completeness of information on existing medical manpower in Western Colorado. However, we acknowledge the limitations of collecting such data and recognize that some practitioners may have been inadvertently omitted.

The WCHSA wishes to continue its role of providing the most current data on medical manpower and plans an update of this directory in the next few months. We would appreciate your assistance in this effort. Updating forms have been included on pages 113 and 115 should you have any additions or corrections for our next edition.

We hope that you and your colleagues find this manpower directory useful. We welcome your comments or suggestions for improvement of future publications.

*The WCHSA wishes to respect all requests for confidentiality. Complete information on the health professionals at the VA Hospital Medical Center is not included because of such a request.
