# **Worksheet 1-1: Water System Profile**

A	SERVICE CHARACTERISTICS		Number	
1	Estimated service population			
2	Estimated service area (square miles)			
3	Miles of mains			
4	Number of treatment plants			
5	Number of separate water systems			
6	Interconnection with other systems			
В	ANNUAL WATER SUPPLY	Annual volume	Number of intakes or source points	Percent metered
7	Groundwater			%
8	Surface water			%
9	Purchases: raw			%
10	Purchases: treated			%
11	Total annual water supply			%
C	SERVICE CONNECTIONS	Connections	Water sales	Percent metered
12	Residential, single-family	Connections	vvater sares	% %
13	Residential, multi-family			%
14	Commercial			%
15	Industrial			%
16	Public or governmental			%
17	Wholesale			%
18	Other			%
19	Total connections			%
D	WATER DEMAND	Annual volume	Percent of total	Per connection
20	Residential sales			
21	Nonresidential sales			
22	Wholesale sales			
23	Other sales			
24	Nonaccount water: authorized uses			
25	Nonaccount water: unauthorized uses			
26	Total system demand (total use)			
			Total supply	Percent of total
E	AVERAGE & PEAK DEMAND	Volume	capacity	capacity
27	Average-day demand			%
28	Maximum-day demand			%
29	Maximum-hour demand			%
F	PLANNING	Prepared a plan P	Date	Filed with state P
30	Capital, facility, or supply plan			
31	Drought or emergency plan			
32	Water conservation plan			

### **Worksheet 1-2: Summary of System Conditions**

PLANNING QUESTIONS	Yes	No	Comment
Is the system in a designated critical water supply area?			
Does the system experience frequency shortages or supply emergencies?			
Does the system have substantial unaccounted-for and lost water?			
Is the system experiencing a high rate of population and/or demand growth?			
Is the system planning substantial improvements or additions?			
Are increases to wastewater system capacity anticipated within the planning horizon?			

## **Worksheet 1-3: Summary of Current Conservation Activities**

Water conservation measures and programs	Approximate annual water savings implementation [if known]	Implemented since (date)	Is continued planned?
	•		

Worksheet 2-1: Preliminary Water Demand Forecast [a]

Item	20-year
Current population served [b] Residential sales per capita (line 1 divided by line 2) [b] Projected population [b] Projected annual residential water demand (line 3 multiplied by line 4)  NONRESIDENTIAL DEMAND [C] Current annual water nonresidential sales (total gallons) Current number of employees or jobs [c] Water use per employee or job (line 6 divided by line 7) Projected annual nonresidential water demand (line 8 multiplied by line 9)  C NONACCOUNT WATER (WATER NOT SOLD TO CUSTOMERS)  Current total annual water demand (add lines 1, 6, and 11) Projected total annual water demand (add lines 5, 10, and 11) Projected total annual water demand (add lines 5, 10, and 11) Adjustments to forecast (+ or -) Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e] Current and projected annual supply capacity [f] Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15)  E AVERAGE-DAY AND MAXIMUM-DAY DEMAND  RAVERAGE-DAY AND MAXIMUM-DAY DEMAND  Average-day demand (line 15 divided by 365) Current maximum-day demand Maximum-day to average-day demand ratio (line 20 divided by line 19)  Current (line 19) and adjusted maximum-day demand	forecast
2 Current population served [b] 3 Residential sales per capita (line 1 divided by line 2) [b] 4 Projected population [b] 5 Projected annual residential water demand (line 3 multiplied by line 4)  B NONRESIDENTIAL DEMAND [C] 6 Current annual water nonresidential sales (total gallons) 7 Current mumber of employees or jobs [c] 8 Water use per employee or job (line 6 divided by line 7) 9 Projected number of employees or jobs 10 Projected number of employees or jobs 10 Projected number of employees or jobs 11 Current and forecast amount [d] D WATER SYSTEM TOTAL DEMAND 12 Current total annual water demand (add lines 1, 6, and 11) 13 Projected total annual water demand (add lines 5, 10, and 11) 14 Adjustments to forecast (+ or -) 15 Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e] 16 Current and projected annual supply capacity [f] 17 Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15) E AVERAGE-DAY AND MAXIMUM-DAY DEMAND 18 Average-day demand (line 15 divided by 365) 19 Current maximum-day demand 20 Maximum-day to average-day demand ratio (line 20 divided by line 19) 21 Projected maximum-day demand forecast [e] 22 Adjustment to maximum-day demand forecast [e] 23 Current (line 19) and adjusted maximum-day demand	
Residential sales per capita (line 1 divided by line 2) [b] Projected population [b] Projected annual residential water demand (line 3 multiplied by line 4)  B NONRESIDENTIAL DEMAND [C] Current annual water nonresidential sales (total gallons) Current number of employees or jobs [c]  Water use per employee or job (line 6 divided by line 7) Projected annual nonresidential water demand (line 8 multiplied by line 9) C NONACCOUNT WATER (WATER NOT SOLD TO CUSTOMERS)  Current and forecast amount [d] D WATER SYSTEM TOTAL DEMAND  Current total annual water demand (add lines 1, 6, and 11) Projected total annual water demand (add lines 5, 10, and 11) Adjustments to forecast (+ or -) Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e] Current and projected annual supply capacity [f] Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15)  E AVERAGE-DAY AND MAXIMUM-DAY DEMAND  Navinum-day to demand (line 18 multiplied by line 20 for all forecast years)  Adjustment to maximum-day demand forecast [e] Current (line 19) and adjusted maximum-day demand	
4 Projected population [b] 5 Projected annual residential water demand (line 3 multiplied by line 4)  B NONRESIDENTIAL DEMAND [C] 6 Current annual water nonresidential sales (total gallons) 7 Current number of employees or jobs [c] 8 Water use per employee or job (line 6 divided by line 7) 9 Projected number of employees or jobs 10 Projected annual nonresidential water demand (line 8 multiplied by line 9) C NONACCOUNT WATER (WATER NOT SOLD TO CUSTOMERS) 11 Current and forecast amount [d] D WATER SYSTEM TOTAL DEMAND 12 Current total annual water demand (add lines 1, 6, and 11) 13 Projected total annual water demand (add lines 5, 10, and 11) 14 Adjustments to forecast (+ or -) 15 Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e] 16 Current and projected annual supply capacity [f] 17 Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15) E AVERAGE-DAY AND MAXIMUM-DAY DEMAND 18 Average-day demand (line 15 divided by 365) 19 Current maximum-day demand 20 Maximum-day to average-day demand ratio (line 20 divided by line 19) 21 Projected maximum-day demand forecast [e] 22 Adjustment to maximum-day demand forecast [e] 23 Current (line 19) and adjusted maximum-day demand	
4 Projected population [b] 5 Projected annual residential water demand (line 3 multiplied by line 4)  B NONRESIDENTIAL DEMAND [C] 6 Current annual water nonresidential sales (total gallons) 7 Current number of employees or jobs [c] 8 Water use per employee or job (line 6 divided by line 7) 9 Projected number of employees or jobs 10 Projected annual nonresidential water demand (line 8 multiplied by line 9) C NONACCOUNT WATER (WATER NOT SOLD TO CUSTOMERS) 11 Current and forecast amount [d] D WATER SYSTEM TOTAL DEMAND 12 Current total annual water demand (add lines 1, 6, and 11) 13 Projected total annual water demand (add lines 5, 10, and 11) 14 Adjustments to forecast (+ or -) 15 Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e] 16 Current and projected annual supply capacity [f] 17 Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15) E AVERAGE-DAY AND MAXIMUM-DAY DEMAND 18 Average-day demand (line 15 divided by 365) 19 Current maximum-day demand 20 Maximum-day to average-day demand ratio (line 20 divided by line 19) 21 Projected maximum-day demand forecast [e] 22 Adjustment to maximum-day demand forecast [e] 23 Current (line 19) and adjusted maximum-day demand	
multiplied by line 4)  B NONRESIDENTIAL DEMAND [C]  6 Current annual water nonresidential sales (total gallons)  7 Current number of employees or jobs [c]  8 Water use per employee or job (line 6 divided by line 7)  9 Projected annual nonresidential water demand (line 8 multiplied by line 9)  C NONACCOUNT WATER (WATER NOT SOLD TO CUSTOMERS)  11 Current and forecast amount [d]  D WATER SYSTEM TOTAL DEMAND  12 Current total annual water demand (add lines 1, 6, and 11)  13 Projected total annual water demand (add lines 5, 10, and 11)  14 Adjustments to forecast (+ or -)  15 Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e]  16 Current and projected annual supply capacity [f]  17 Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15)  E AVERAGE-DAY AND MAXIMUM-DAY DEMAND  18 Average-day demand (line 15 divided by 365)  19 Current maximum-day demand  20 Maximum-day to average-day demand ratio (line 20 divided by line 19)  21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years)  22 Adjustment to maximum-day demand forecast [e]  23 Current (line 19) and adjusted maximum-day demand	
B NONRESIDENTIAL DEMAND [C] 6 Current annual water nonresidential sales (total gallons) 7 Current number of employees or jobs [c] 8 Water use per employee or job (line 6 divided by line 7) 9 Projected number of employees or jobs 10 Projected annual nonresidential water demand (line 8 multiplied by line 9)  C NONACCOUNT WATER (WATER NOT SOLD TO CUSTOMERS) 11 Current and forecast amount [d] D WATER SYSTEM TOTAL DEMAND 12 Current total annual water demand (add lines 1, 6, and 11) 13 Projected total annual water demand (add lines 5, 10, and 11) 14 Adjustments to forecast (+ or -) 15 Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e] 16 Current and projected annual supply capacity [f] 17 Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15) E AVERAGE-DAY AND MAXIMUM-DAY DEMAND 18 Average-day demand (line 15 divided by 365) 19 Current maximum-day demand 20 Maximum-day to average-day demand ratio (line 20 divided by line 19) 21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years) 22 Adjustment to maximum-day demand forecast [e] 23 Current (line 19) and adjusted maximum-day demand	
B NONRESIDENTIAL DEMAND [C] 6 Current annual water nonresidential sales (total gallons) 7 Current number of employees or jobs [c] 8 Water use per employee or job (line 6 divided by line 7) 9 Projected number of employees or jobs 10 Projected annual nonresidential water demand (line 8 multiplied by line 9)  C NONACCOUNT WATER (WATER NOT SOLD TO CUSTOMERS) 11 Current and forecast amount [d] D WATER SYSTEM TOTAL DEMAND 12 Current total annual water demand (add lines 1, 6, and 11) 13 Projected total annual water demand (add lines 5, 10, and 11) 14 Adjustments to forecast (+ or -) 15 Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e] 16 Current and projected annual supply capacity [f] 17 Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15) E AVERAGE-DAY AND MAXIMUM-DAY DEMAND 18 Average-day demand (line 15 divided by 365) 19 Current maximum-day demand 20 Maximum-day to average-day demand ratio (line 20 divided by line 19) 21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years) 22 Adjustment to maximum-day demand forecast [e] 23 Current (line 19) and adjusted maximum-day demand	
7 Current number of employees or jobs [c] 8 Water use per employee or job (line 6 divided by line 7) 9 Projected number of employees or jobs 10 Projected annual nonresidential water demand (line 8 multiplied by line 9)  C NONACCOUNT WATER (WATER NOT SOLD TO CUSTOMERS) 11 Current and forecast amount [d]  D WATER SYSTEM TOTAL DEMAND 12 Current total annual water demand (add lines 1, 6, and 11) 13 Projected total annual water demand (add lines 5, 10, and 11) 14 Adjustments to forecast (+ or -) 15 Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e] 16 Current and projected annual supply capacity [f] 17 Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15)  E AVERAGE-DAY AND MAXIMUM-DAY DEMAND 18 Average-day demand (line 15 divided by 365) 19 Current maximum-day demand 20 Maximum-day to average-day demand ratio (line 20 divided by line 19) 21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years) 22 Adjustment to maximum-day demand forecast [e] 23 Current (line 19) and adjusted maximum-day demand	
8 Water use per employee or job (line 6 divided by line 7) 9 Projected number of employees or jobs 10 Projected annual nonresidential water demand (line 8 multiplied by line 9) C NONACCOUNT WATER (WATER NOT SOLD TO CUSTOMERS) 11 Current and forecast amount [d] D WATER SYSTEM TOTAL DEMAND 12 Current total annual water demand (add lines 1, 6, and 11) 13 Projected total annual water demand (add lines 5, 10, and 11) 14 Adjustments to forecast (+ or -) 15 Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e] 16 Current and projected annual supply capacity [f] 17 Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15) E AVERAGE-DAY AND MAXIMUM-DAY DEMAND 18 Average-day demand (line 15 divided by 365) 19 Current maximum-day demand 20 Maximum-day to average-day demand ratio (line 20 divided by line 19) 21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years) 22 Adjustment to maximum-day demand forecast [e] 23 Current (line 19) and adjusted maximum-day demand	
9 Projected number of employees or jobs 10 Projected annual nonresidential water demand (line 8 multiplied by line 9) C NONACCOUNT WATER (WATER NOT SOLD TO CUSTOMERS) 11 Current and forecast amount [d] D WATER SYSTEM TOTAL DEMAND 12 Current total annual water demand (add lines 1, 6, and 11) 13 Projected total annual water demand (add lines 5, 10, and 11) 14 Adjustments to forecast (+ or -) 15 Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e] 16 Current and projected annual supply capacity [f] 17 Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15) E AVERAGE-DAY AND MAXIMUM-DAY DEMAND 18 Average-day demand (line 15 divided by 365) 19 Current maximum-day demand 20 Maximum-day to average-day demand ratio (line 20 divided by line 19) 21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years) 22 Adjustment to maximum-day demand forecast [e] 23 Current (line 19) and adjusted maximum-day demand	
9 Projected number of employees or jobs 10 Projected annual nonresidential water demand (line 8 multiplied by line 9)  C NONACCOUNT WATER (WATER NOT SOLD TO CUSTOMERS) 11 Current and forecast amount [d]  D WATER SYSTEM TOTAL DEMAND 12 Current total annual water demand (add lines 1, 6, and 11) 13 Projected total annual water demand (add lines 5, 10, and 11) 14 Adjustments to forecast (+ or -) 15 Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e] 16 Current and projected annual supply capacity [f] 17 Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15)  E AVERAGE-DAY AND MAXIMUM-DAY DEMAND 18 Average-day demand (line 15 divided by 365) 19 Current maximum-day demand 20 Maximum-day to average-day demand ratio (line 20 divided by line 19) 21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years) 22 Adjustment to maximum-day demand forecast [e] 23 Current (line 19) and adjusted maximum-day demand	
Projected annual nonresidential water demand (line 8 multiplied by line 9)  C NONACCOUNT WATER (WATER NOT SOLD TO CUSTOMERS)  11 Current and forecast amount [d]  D WATER SYSTEM TOTAL DEMAND  12 Current total annual water demand (add lines 1, 6, and 11)  13 Projected total annual water demand (add lines 5, 10, and 11)  14 Adjustments to forecast (+ or -)  15 Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e]  16 Current and projected annual supply capacity [f]  17 Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15)  E AVERAGE-DAY AND MAXIMUM-DAY DEMAND  18 Average-day demand (line 15 divided by 365)  19 Current maximum-day demand  20 Maximum-day to average-day demand ratio (line 20 divided by line 19)  21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years)  22 Adjustment to maximum-day demand forecast [e]  23 Current (line 19) and adjusted maximum-day demand	
multiplied by line 9)  C NONACCOUNT WATER (WATER NOT SOLD TO CUSTOMERS)  11 Current and forecast amount [d]  D WATER SYSTEM TOTAL DEMAND  12 Current total annual water demand (add lines 1, 6, and 11)  13 Projected total annual water demand (add lines 5, 10, and 11)  14 Adjustments to forecast (+ or -)  15 Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e]  16 Current and projected annual supply capacity [f]  17 Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15)  E AVERAGE-DAY AND MAXIMUM-DAY DEMAND  18 Average-day demand (line 15 divided by 365)  19 Current maximum-day demand  20 Maximum-day to average-day demand ratio (line 20 divided by line 19)  21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years)  22 Adjustment to maximum-day demand forecast [e]  23 Current (line 19) and adjusted maximum-day demand	
11 Current and forecast amount [d]  D WATER SYSTEM TOTAL DEMAND  12 Current total annual water demand (add lines 1, 6, and 11)  13 Projected total annual water demand (add lines 5, 10, and 11)  14 Adjustments to forecast (+ or -)  15 Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e]  16 Current and projected annual supply capacity [f]  17 Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15)  E AVERAGE-DAY AND MAXIMUM-DAY DEMAND  18 Average-day demand (line 15 divided by 365)  19 Current maximum-day demand  20 Maximum-day to average-day demand ratio (line 20 divided by line 19)  21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years)  22 Adjustment to maximum-day demand forecast [e]  23 Current (line 19) and adjusted maximum-day demand	
D WATER SYSTEM TOTAL DEMAND  12 Current total annual water demand (add lines 1, 6, and 11)  13 Projected total annual water demand (add lines 5, 10, and 11)  14 Adjustments to forecast (+ or -)  15 Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e]  16 Current and projected annual supply capacity [f]  17 Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15)  E AVERAGE-DAY AND MAXIMUM-DAY DEMAND  18 Average-day demand (line 15 divided by 365)  19 Current maximum-day demand  20 Maximum-day to average-day demand ratio (line 20 divided by line 19)  21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years)  22 Adjustment to maximum-day demand forecast [e]  23 Current (line 19) and adjusted maximum-day demand	
Current total annual water demand (add lines 1, 6, and 11)  Projected total annual water demand (add lines 5, 10, and 11)  Adjustments to forecast (+ or -)  Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e]  Current and projected annual supply capacity [f]  Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15)  E AVERAGE-DAY AND MAXIMUM-DAY DEMAND  Average-day demand (line 15 divided by 365)  Current maximum-day demand  Maximum-day to average-day demand ratio (line 20 divided by line 19)  Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years)  Adjustment to maximum-day demand forecast [e]  Current (line 19) and adjusted maximum-day demand	
11) 13 Projected total annual water demand (add lines 5, 10, and 11) 14 Adjustments to forecast (+ or -) 15 Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e] 16 Current and projected annual supply capacity [f] 17 Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15)  E AVERAGE-DAY AND MAXIMUM-DAY DEMAND 18 Average-day demand (line 15 divided by 365) 19 Current maximum-day demand 20 Maximum-day to average-day demand ratio (line 20 divided by line 19) 21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years) 22 Adjustment to maximum-day demand forecast [e] 23 Current (line 19) and adjusted maximum-day demand	
Projected total annual water demand (add lines 5, 10, and 11)  14 Adjustments to forecast (+ or -)  15 Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e]  16 Current and projected annual supply capacity [f]  17 Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15)  E AVERAGE-DAY AND MAXIMUM-DAY DEMAND  18 Average-day demand (line 15 divided by 365)  19 Current maximum-day demand  20 Maximum-day to average-day demand ratio (line 20 divided by line 19)  21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years)  22 Adjustment to maximum-day demand forecast [e]  23 Current (line 19) and adjusted maximum-day demand	
11)  14 Adjustments to forecast (+ or -)  15 Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e]  16 Current and projected annual supply capacity [f]  17 Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15)  E AVERAGE-DAY AND MAXIMUM-DAY DEMAND  18 Average-day demand (line 15 divided by 365)  19 Current maximum-day demand  20 Maximum-day to average-day demand ratio (line 20 divided by line 19)  21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years)  22 Adjustment to maximum-day demand forecast [e]  23 Current (line 19) and adjusted maximum-day demand	
Adjustments to forecast (+ or -)  Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e]  Current and projected annual supply capacity [f]  Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15)  E AVERAGE-DAY AND MAXIMUM-DAY DEMAND  Average-day demand (line 15 divided by 365)  Current maximum-day demand  Maximum-day to average-day demand ratio (line 20 divided by line 19)  Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years)  Adjustment to maximum-day demand forecast [e]  Current (line 19) and adjusted maximum-day demand	
Current (line 12) and adjusted total annual water demand forecast (add lines 13 and 14) [e]  Current and projected annual supply capacity [f]  Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15)  E AVERAGE-DAY AND MAXIMUM-DAY DEMAND  18 Average-day demand (line 15 divided by 365)  19 Current maximum-day demand  20 Maximum-day to average-day demand ratio (line 20 divided by line 19)  21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years)  22 Adjustment to maximum-day demand forecast [e]  23 Current (line 19) and adjusted maximum-day demand	
forecast (add lines 13 and 14) [e]  16	
16 Current and projected annual supply capacity [f] 17 Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15)  E AVERAGE-DAY AND MAXIMUM-DAY DEMAND  18 Average-day demand (line 15 divided by 365) 19 Current maximum-day demand 20 Maximum-day to average-day demand ratio (line 20 divided by line 19) 21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years) 22 Adjustment to maximum-day demand forecast [e] 23 Current (line 19) and adjusted maximum-day demand	
Difference between total use and total supply capacity (+ or -) (subtract line 12 from line 15)  E AVERAGE-DAY AND MAXIMUM-DAY DEMAND  18 Average-day demand (line 15 divided by 365)  19 Current maximum-day demand  20 Maximum-day to average-day demand ratio (line 20 divided by line 19)  21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years)  22 Adjustment to maximum-day demand forecast [e]  23 Current (line 19) and adjusted maximum-day demand	
or -) (subtract line 12 from line 15)  E AVERAGE-DAY AND MAXIMUM-DAY DEMAND  18 Average-day demand (line 15 divided by 365)  19 Current maximum-day demand  20 Maximum-day to average-day demand ratio (line 20 divided by line 19)  21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years)  22 Adjustment to maximum-day demand forecast [e]  23 Current (line 19) and adjusted maximum-day demand	
E AVERAGE-DAY AND MAXIMUM-DAY DEMAND  18 Average-day demand (line 15 divided by 365)  19 Current maximum-day demand  20 Maximum-day to average-day demand ratio (line 20 divided by line 19)  21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years)  22 Adjustment to maximum-day demand forecast [e]  23 Current (line 19) and adjusted maximum-day demand	
18 Average-day demand (line 15 divided by 365)  19 Current maximum-day demand  20 Maximum-day to average-day demand ratio (line 20 divided by line 19)  21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years)  22 Adjustment to maximum-day demand forecast [e]  23 Current (line 19) and adjusted maximum-day demand	
Current maximum-day demand  Maximum-day to average-day demand ratio (line 20 divided by line 19)  Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years)  Adjustment to maximum-day demand forecast [e]  Current (line 19) and adjusted maximum-day demand	
20 Maximum-day to average-day demand ratio (line 20 divided by line 19) 21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years) 22 Adjustment to maximum-day demand forecast [e] 23 Current (line 19) and adjusted maximum-day demand	
divided by line 19)  21 Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years)  22 Adjustment to maximum-day demand forecast [e]  23 Current (line 19) and adjusted maximum-day demand	
Projected maximum-day demand (line 18 multiplied by line 20 for all forecast years)  Adjustment to maximum-day demand forecast [e]  Current (line 19) and adjusted maximum-day demand	
line 20 for all forecast years)  22 Adjustment to maximum-day demand forecast [e]  23 Current (line 19) and adjusted maximum-day demand	
22 Adjustment to maximum-day demand forecast [e] 23 Current (line 19) and adjusted maximum-day demand	
23 Current (line 19) and adjusted maximum-day demand	
forecast (add lines 21 and 22)	
24 Daily supply capacity (divide line 16 by 365)	
25 Ratio of maximum-day demand to daily supply capacity	
(divide line 23 by line 24)	

- [a] Note: separate forecasts should be prepared for large-volume users.[b] Planners can chose to use service connections or households instead of population and per-connection water use instead of per-capita water use.
- [c] Explanatory variables other than employees or jobs can be used as appropriate. The forecast should be disaggregated by sector of water use to the greatest extent possible (for example, commercial and industrial water use and nonaccount water) and a qualitative sensitivity analysis ("what if") should be performed for each sector's forecast.
- [d] Please provide an explanation of the forecast of nonaccount water, including all relevant assumptions.
- [e] Please provide an explanation of adjustments to your forecasts, including all relevant assumptions.
  [f] Supply capacity should take into account available supplies (permits), treatment capacity, and distribution system capacity and reflect the practical total supply capacity of the system, including purchased water.

## Worksheet 3-1: Anticipated Improvements and Additions

	Improv	e- New			
Type(s) of Project(s) [a]	ment	Capacity	Start date	End date	
Source of supply

Water purchases					
Anticipated future water purchases			(gallon	s per year)	
Cost of water purchases				s per gallon)	

[a] Plans can include wastewater facilities.

#### **Worksheet 3-2: Cost of Supply-Side Facilities**

		Facilities for meeting average- day demand	Facilities fo	or meeting max demand [a]	imum-day	Water purchases needed to meet demand [b]	Estimate of simple incremental supply cost (\$/gallon)
Line	Item	Source of supply	Water treatment facilities	Treated water	Major transmis- sion lines	demand [0]	(\$\pi ganon)
A	SUPPLY CAPACITY	IN ANNIJAI		storage	Sion lines		
1	Current installed		GILLOINS				<i>\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\</i>
	capacity or water purchases						
2	Planned						
	improvements and additions						
3	Planned retirements						
4	Future installed capacity or purchases (line 1 plus line 2 less line 3)						
В	COST OF PLANNED	IMPROVEN	MENTS AND	ADDITIONS	3		· · · · · · · · · · · · · · · · · · ·
5	Approximate total cost of planned improvements and additions identified in line 2 (including financing costs)						
6	Expected life of new facilities (years)						
7	Estimated annual capital costs (line 5 divided by line 6)						
8	Estimated annual operating costs [d]						
9	Estimated total annual costs (line 7 plus line 8) [e]						
10	Per unit cost of new facilities (line 9 divided by line 2)						
11	Simple incremental supply cost (add all entries from line 10)						

- [a] Additional facilities or capital equipment can be included as appropriate.
  [b] The plan should indicate whether purchases are needed to meet average-day or maximum-day demand or both.
- [c] Planners should select a reasonable planning horizon for supply facilities and use the same time frame for all facilities.
- [d] Annual variable operating cost (including energy, chemicals, and water purchases).[e] This calculation of simplified value does not include a discount rate, an escalation rate, or an adjustment for inflation. Other methods that do, such as that in Worksheet 3-3, are available and recommended.

  Note: This analysis also can be extended to include the incremental cost of wastewater collection and treatment.

# Worksheet 3-3: Cost of Supply-Side Facilities (Alternative Approach With Cost Escalation and Discounting)

Year [b]	Annual incremental capacity from improvements/ additions	Annualized incremental capital cost [d]	Annual operating cost [e]	Un- discounted total annualized incremental cost [f]	Escalated value of supply cost in nominal dollars [g]	Present value of supply cost in nominal dollars [h]	Present value of supply cost Per gallon in nominal dollars [i]

10							
20							
Total							

Source: Adapted from Pekelney, Chesnutt, and Hanemann (1996). See Glossary (Appendix A) for definitions.

- [a] = This analysis should be calculated separately for (1) improvements and additions needed to meet **average** demand, and (2) improvements and additions needed to meet **peak** demand so that the results can be compared to corresponding conservation measures. The analysis also can be expanded to include the incremental cost of wastewater collection and treatment.
- [b] = The number of years should correspond to the anticipated useful life of the project(s).
- [c] = Total gallons of capacity made available through the project(s).
- [d] = Annualized incremental capital cost (K):

$$K = \frac{C \times i \times (1+i)^n}{(1+i)^n - 1}$$
 where:  $K = \text{annualized capital costs}$   $C = \text{total expenditures required}$   $C = \text{total expenditures required}$   $C = \text{total expenditures required}$   $C = \text{total expenditure}$  (see [b])  $C = \text{total expenditure}$   $C = \text{to$ 

- [e] = Annual variable operating cost (including energy, chemicals, and water purchases).
- [f] = [d] + [e]
- [g] =  $[f] \times (1+s)^t$  where s is the selected annual escalation rate and t is the year. The escalation rate can be tailored to the nature of capital expenditures.
- [h] =  $[g]/(1+r)^t$  where r is the selected annual discount rate and t is the year. The escalation rate can be tailored to the nature of capital expenditures.
- [i] = [h]/[c]

# Worksheet 6-1: Analysis of Each Conservation Measure or Group of Measures & Programs

Descri	pe conservation measure(s):		
Descri	pe program(s), if applicable:		
Numbe	l measure/program water savings: er of planned installations: oated life span of the savings	_ per _ _ years	
The me	☐ Maxi	Average-day demand	
de	mand □ Both	average-day and max	imum-day
Line	Item	Amount	Amount
A	COST OF THE MEASURE(S)/PROGRAM(S) [a]	Per unit [b]	Total cost of the measure/program
1	Materials	\$	\$
2	Labor		
3	Rebates or other payments		
4	Marketing and advertising		
5	Administration	<i>\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\\</i>	
6	Consulting or contracting		
7	Other		
8	Total program costs for the life of the measure/program (add lines 1 through 7) [c]		\$
В	ESTIMATED SAVINGS		
9	Number of units to be installed [d]		
10	Estimated annual water savings per unit in gallons [e]		
11	Total estimated annual savings for the measure/program in gallons (multiply line 9 by line 10)		
12	Expected life span for the savings in years		
13	Total life span estimated savings for the measure/program in gallons (multiply line 11 by line 12)		
C	ANALYSIS OF COST EFFECTIVENESS		Amount
14	Cost of water saved by the measure (line 8 divided by line 13)		/gallon
15	Simple incremental cost of water supply [f]		/gallon
16	Cost comparison (line 15 less line 14)		/gallon
D	NET BENEFIT OF CONSERVATION		Amount
17	Estimated value of water saved by the measure based on increm	ental supply cost	\$

- [a] This analysis is used to aid the comparison and selection of measures. Planners will estimate actual effects of conservation on planned capital facilities in Section 8. A separate analysis should be performed for each conservation measure or program, but measures/programs can be combined if they jointly produce water savings.
- [b] Examples of a unit are a toilet, a retrofit kit, and an audit. A unit estimate may not be appropriate for each measure/program, in which case total measure/program water savings and costs can be used.
- [c] Include all recurring operation and maintenance costs over the life of the measure/program.
- [d] Units can be individual product units (such as toilets) or groups of products (such as household retrofits), as long as the analysis is consistent. Leave blank if unit values do not apply.
- [e] For example, water savings per retrofit. Leave blank if unit values do not apply.

Net value of water saved by the measure/program (line 17 less line 8)

[f] From Worksheet 3-2, line 11.

### Worksheet 6-2: Comparison of Benefits and Costs of the Conservation **Measures and Programs**

Line	Conservation measure/program [a]	Total cost for the measure/ program [b]	Anticipated annual water savings in gallons [c]	Cost of water saved by the measure (\$/gallon) [d]	Net benefit of implementing the measure/ program [e]

18					
19					
20					

- [a] = Combined measures and programs that produce joint conservation savings should be treated as one measure/program to avoid duplicate counting.
- [b] = From Worksheet 6-1, line 8.
- [c] = From Worksheet 6-1, line 11.
- [d] = From Worksheet 6-1, line 14. [e] = From Worksheet 6-1, line 18. Note: This estimate of net benefit does not consider societal benefits and costs. Net monetary benefit is not the only legitimate criterion for ranking and selection of measures/programs. See the text.

Note: Approaches that address cost escalation and natural cost profiles over disparate project lifespans are available. These methods incorporate discounting to account for the time value of money. Planners are encouraged to use such approaches.

# **Worksheet 6-3: Selection of Conservation Measures/Programs and Estimate of Water Savings**
