601.2/075/1876

C.Z

MESSAGE

OF HIS EXCELLENCY,

JOHN L. ROUTT,

GOVERNOR OF COLORADO,

-TO THE-

FIRST GENERAL ASSEMBLY OF THE STATE.

Delivered November 3, 1876.

DENVER; TRIBUNE STEAM PRINTING HOUSE. 1876. Digitized by the Internet Archive in 2015

Governor's Message.

To the Honorable, the General Assembly of the State of Colorado:

GENTLEMEN:—It is with a profound sense of my obligation to the people of Colorado, who have honored me by their suffrages, that I enter upon my duties as the first Executive of the State; and as I assume the responsibilities devolving upon me, I desire to present to them my grateful acknowledgments and to express the hope that my official acts may merit their continued approval.

Before presenting for your consideration a synopsis of the affairs of our commonwealth, and offering a few suggestions in reference thereto, permit me to congratulate you upon being the first General Assembly of this State.

Statehood, so long the object of our ambition, has at length been attained, and with it, the blessings of self-government. Your responsibilities are, therefore, unusually grave, and the arduous task of adjusting the laws to our new condition will require all your wisdom and the most careful deliberation, in order that the fabric of our government may be established upon a firm and enduring basis. You have, then, the opportunity to do much to insure the prosperity and progress of the State, and to make for yourselves a name which shall last for generations.

The people, by their choice, have signified their faith in your wisdom, integrity and patriotism, and I feel assured that their confidence will not have been misplaced.

On account of your meeting in November instead of January, as heretofore, complete reports have not been fur-

nished by the Auditor, Superintendent of Public Instruction, and the Commissioners and Warden of the Penitentiary. As soon as presented, I will transmit them for your information and use.

STATE FINANCES.

The Auditor's and Treasurer's Books show the following:

LIABILITIES.

Warrants outstanding and unpaid
\$49,858 34 In round numbers
RESOURCES.
Revenue from this year's taxes, available January and July, 1877 $$65,000$ 00 Revenue from delinquent taxes of former years (estimated) 8,000 00
\$73,000 00 Deduct liabilities

This amount is all that will be left to meet the current expenses of the State until the tax of 1877 is collected.

The outstanding indebtedness is the result of large special appropriations made by the last Territorial Assembly, among which were the following:

State University at Boulder	00
Centennial Exposition	
Deaf Mute Institute (buildings)	00
Penitentiary Building	Ю
School of Mines	00
Total	00

These expenditures, although apparently large, were necessary, and the people would not be deprived of the educational institutions for which the greater portion of the above sum was appropriated, for many times the whole State indebtedness.

The last Legislative Assembly made no provision to meet the expenses of the new State government, and the constitution, article eleven, section three, prohibits the State from

contracting "any debt by loan, in any form, except to provide for casual deficiencies of revenue, erect public buildings for use of the State, suppress insurrection," etc., and "the amount of debt contracted in any one year to provide for deficiencies of the revenue shall not exceed onefourth of a mill on each dollar of taxable property within the State." This tax, if levied, would yield only ten thousand dollars on the present valuation, but that levy is prohibited by section sixteen of article ten, which says, "no appropriation shall be made, nor any expenditure authorized by the General Assembly, whereby the expenditure of the State during any fiscal year shall exceed the total tax then provided for by law and applicable for such appropriation or expenditure, unless the General Assembly making such appropriation shall provide for levying a sufficient tax. not exceeding the rates allowed in section eleven of this article, to pay such appropriation or expenditure within such fiscal year."

To provide, therefore, for the present exigency, without violating the sections above quoted, it will be necessary to levy a tax of, say, three mills, which will be amply sufficient for the State expenses. As the fiscal year commenced October first, and as all debts contracted within the year can be legally provided for, the various appropriations can be made and the Auditor can issue his warrants to the full amount of such appropriations. These warrants can then be hypothecated if necessary, or held by the parties to whom issued, until the taxes of 1877 are collected and paid into the treasury, which should be by January 1, 1878.

A tax of three mills, which is smaller than in some of the older States, will yield a revenue sufficent to meet the expenses of this fiscal year and leave the State unincumbered by debt, without burdening the people.

That we should enter upon Statehood with a prospective debt is neither singular nor alarming, as the early history of every State, and in fact of every country, shows the same condition, and it is a subject of congratulation that our debt will be so small, and that it will be liquidated within the next two years.

EQUALIZATION AND COLLECTION OF TAXES.

State and county boards of equalization are created by the constitution, but it devolves upon you to prescribe their duties.

It is especially important that these be clearly defined, and that the time when all property becomes taxable, the length of time allowed the assessors to complete and return to the county clerks their assessment lists, the time allowed county clerks to make abstracts giving description and valuation of the property listed, to be presented to the county boards of equalization, the time allowed county boards to adjust inequalities of valuation, make corrections where parties have been aggrieved, and return the corrected lists to the State board, the time allowed the State board for determining the relative values of property in the different counties, the per cent. of increase or decrease, and certifying the same to the county clerks, as well as the time allowed for the collection of taxes, should be specified.

All this could be accomplished and the books placed in the hands of the collectors by the first day of September, so that all taxes could be, as they should, collected and paid into the State Treasury on or before the first day of January.

For the purposes of assessment and collection of the revenue, most of the Western States have divided the counties into townships or collection districts, a plan which, while no more expensive, has proved to be more advantageous and expeditious than our county system, as in small districts the assessors and collectors have better knowledge of the residents and value of their property, and the certainty of the collection of personal property tax is greater. I would, therefore, suggest that you adopt a similar method, with such modifications as your judgment may dictate.

STATE LANDS. .

By the act of Congress, September 4, 1841, each new State, on being admitted into the Union, is granted 500,000 acres of land for the purpose of internal improvements.

The enabling act also grants to the State fifty sections "for the purpose of erecting public buildings at the capital for legislative and judicial purposes," fifty other sections "for the purpose of erecting a suitable building for a penitentiary or State prison," seventy-two sections "for the use and support of a State university," and twelve salt springs, with "six sections of land adjoining," for the use of the State, making in all, with the 500,000 acres first mentioned, 656,160 acres.

It is provided that a portion of these lands shall be "selected and located by direction of the legislature with the approval of the President, on or before the first day of January, 1878."

I would recommend the appointment of five gentlemen, whose duty it shall be to personally examine, select, and locate these lands, and make report to the State Board of Land Commissioners. In this selection, the utmost care should be exercised to obtain the best lands in the State, having reference to their fertility, accessibility, water supply and other natural advantages, so that we may derive therefrom the greatest benefit and largest revenue.

Most of the North-western States have committed the error of too hastily placing their lands in the market, thus losing the advantages arising from the natural growth and improvement of the country.

To avoid this mistake all our lands, including those for common school purposes, should be withheld from sale for a few years at least.

EDUCATION.

Owing to the failure of some of the county superintendents to make the reports required by law, Prof. Hale, Superintendent of Public Instruction, has been unable to

complete and submit his report at the present time. I have, however, obtained from him sufficient data to justify the statement that the progress made in the last year has fully met the most sanguine expectations of the friends of popular education. The increase of school population during the past year has been about ten per cent., making a total of 24,108 persons of school age.

The increase in the value of school property has been correspondingly large by reason of the erection of new school buildings and additions to others. The southern portion of the State has contributed largely to this increase, and many of the schools have been furnished with maps, charts, globes, and other requisites, affording indisputable evidence of the interest and zeal felt in the maintenance of our public schools.

The school law passed at the last session of the Teritorial Assembly, has, in the main, proved satisfactory, and with a few amendments and such additions as the new order of affairs necessitates, it will, I believe, be effective. One of the objections urged against it is that it requires a school to be maintained one hundred and twenty school days in each year to entitle a district to receive its portion of the general school fund. And, another objection is the manner of apportioning this fund among the districts. To show the gross abuses of this method I copy the following from a report now before me:

In one district the number of persons of school age, according to which the apportionment in made, is 71; number enrolled in school, 11; average daily attendance, 5. In another district, number returned for apportionment, 167; number enrolled in school, 27; average daily attendance, 11. And in another I find, number returned for apportionment, 245; number enrolled in school, 24; average daily attendance, 11.

More examples might be given but these are deemed sufficient, as the figures speak for themselves.

Some other districts in which no school has been held

during the year, have received their portion of the school fund.

As will be seen from the above, the average attendance in some parts of the State is very small, compared with the number of persons of school age. In one district, the average attendance is one in twelve; in another, one in fifteen; and in another, only one in twenty-two. These are of course isolated examples, and by no means the rule in all parts of the State.

In view, however, of these facts, and in order to secure the education of all the children of the State, I would recommend for your consideration the adoption of a system of compulsory education, and that the amount of funds to which each school district shall be entitled, shall depend upon the average attendance and the number of days on which school shall be held during the year. If the law be so amended most of the defects now existing, and the evils arising therefrom, will, in my judgment, be remedied.

While our school system is by no means all that could be desired, yet Colorado is entitled to special honor in that she enters the Union with a better developed and more liberally supported school system than was possessed by the other States at the time of their admission.

I commend this subject to your careful attention, trusting that you may be fully alive to the importance of wisely and liberally providing for the education of the masses.

THE UNIVERSITY OF COLORADO.

In the year 1874, the Territorial Legislature appropriated \$15,000 for the erection of a building on the university grounds near Boulder city, stipulating that the citizens of Boulder county should contribute a like sum. This condition was accepted and the people of that county, with commendable generosity, at once raised the required amount. A plan of a building having been adopted, work was begun in August, 1875, and it is now completed and

ready for occupancy as soon as the necessary furniture can be obtained.

The last legislature in making an appropriation of \$15,-000 for the completion of this edifice and the support of the university, provided that the said amount should first be used in the following order, viz: For heating apparatus; for gas fixtures and pipes; water pipes from town to university; out-buildings and sewerage; for services of architect and superintendent, and for fencing the grounds of the university.

The trustees have expended for the above items about \$6,500, leaving a balance of \$8,500, which, when paid over by the State Treasurer, will be available for salaries of teachers, purchase of library, and the improvement of the buildings and surrounding grounds. No part of this fund, however, can be used for the purchase of furniture, and I would recommend that you authorize the application of so much as is necessary to that purpose, so that the institution may be prepared for the reception of students with as little delay as possible.

By reason of their judicious and excellent management of its business the trustees will be able to transfer the university to the State regents thoroughly completed and free from debt. Ample provisions should be made for the support of this promising institution until the meeting of the next General Assembly.

DEAF MUTE INSTITUTE.

The reports of the officers of this institution, herewith submitted, show that its affairs have been for the past year, as from its commencement, so managed as to entitle them to the highest commendation.

An appropriation was made by the last legislature to pay off the indebtedness incurred the previous year, in the erection of a building for the accommodation of teachers and scholars, and an additional building for school and other purposes. This appropriation will suffice to complete these improvements and liquidate all outstanding indebtedness, and you will, therefore, not be called upon to make special appropriation for its support, as the revenue arising from the tax of one-fifth mill, as now provided by law, will be ample to meet its current expenses.

I would, therefore, recommend that the future expenses of this institution be provided for by a continuation of this tax, so that its support may be permanently secured. It should be recognized as belonging to the great free-school system of the State, for if, as we believe, all children should be educated at the public expense, should not these who are deprived by nature of certain faculties be entitled to especial care and consideration.

AGRICULTURAL COLLEGE.

This college was established by an act of the Legislative Assembly, February 11, 1870. The report of the Secretary of the Board of Trustees, shows that its affairs have been successfully managed. The property of the college, consisting of two hundred and forty acres of land lying in a beautiful plateau, within one and one-half miles of Fort Collins, has been improved by the erection of a substantial brick building, the construction of irrigating canals, and the planting of trees. Its present value is about \$5,000, but its cost to the territory was only \$1,000, the amount of the appropriation of 1874.

The citizens of Larimer county have liberally aided in this enterprise, from which much good will result in the future to our agriculturists. As yet it is in its infancy, but we may reasonably expect that it will grow, and become eventually an honor to the State. It is now free from debt and has in the Treasury an unexpended balance of \$457.34.

SCHOOL OF MINES.

The reports of the officers of this institution show that it has not been patronized during the past year as had been anticipated. It is hoped that the attendance will be largely increased and that it may accomplish all that was expected in its establishment. Financially its affairs are in a healthy condition, as may be seen by the following:

Balance of appropriation of 1874 \$ 7	
Received from other sources	3 25
Appropriation of 1876	00 00
Total	
	* ********
Balance on hand	9 45

It will be necessary under the constitution to provide for the transfer of this school to the officers who may be appointed by the State.

ROARD OF HEALTH.

In accordance with the provisions of an act passed by the last Assembly, creating a board of health, I appointed the following medical gentlemen to act as members, viz:

F. J. Bancroft, Denver; H. A. Lemen, Denver: W. H. Williams, Denver; A. V. Small, Trinidad; R. J. Collins, Georgetown; W. Edmondson, Central; T. N. Metcalf, Del Norte; T. G. Horn, Colorado Springs; T. M. Smith, Fort Collins.

The board met at Denver on the twelfth day of April last, organized, adopted a constitution and by-laws, and appointed standing committees to report at their next meeting, to be held on the fifteenth instant, upon topics connected with the diseases and climatology of Colorado. As soon as these reports are compiled and forwarded to me they will be submitted to your honorable body. The value of such a board in promoting and caring for public health, and in disseminating information which will advance medical science and benefit suffering humanity, cannot be overestimated.

It is both wise and economical to make liberal provision for continuing the work begun by this board. To accomplish it will require time, labor, and money, but the compilation, publication and distribution of authentic statistics, will prove of incalculable benefit not only to ourselves but to many in all parts of the United States and Europe. Daily inquiries are made for information which will be useful to invalids seeking a change of climate, and the information to be given should be reliable and explicit. I cannot, therefore, too strongly urge an appropriation sufficient to carry on the work in a thorough manner, and to make this board a permanent State institution.

IRRIGATION.

This subject is one of the most difficult which you will be called upon to consider. It should, however, receive prompt attention, as delay only increases the obstacles to a correct solution of the problem.

In some sections the water supply is wholly inadequate to the wants of the people, and, to remedy this deficiency, I would recommend that some general system may be adopted by your honorable body, so that the waters of the larger streams may be made, by means of suitable reservoirs and canals, to subserve the interests of mining, agriculture and manufactures. The filling of these reservoirs during times of high water, in Spring and early Summer, would work no injury to farms along the streams, while from the supply thus obtained large arid tracts of country, with no natural water courses, could be reclaimed and made productive.

The expense of executing such a work on a sufficiently large scale is too great to be undertaken by the State at present or by individual enterprise, and as the general government has made to other States large grants of swamp lands, which by labor and the expenditure of money have become very valuable, why should not we, with our vast unproductive plains, ask the government to assist us in like manner by a grant of lands which would enable the State to accomplish this most desirable object? I would, therefore, recommend that you, by memorial, assist our senators and representative in the Congress of the United States to secure the desired aid.

Your attention is respectfully called to section eight of article sixteen of the constitution, which gives to county commissioners authority to establish reasonable rates to be charged for the use of water.

TREE CULTURE.

Section seven article eighteen of the constitution authorizes the General Assembly to provide "that the increase in the value of private lands caused by the planting of hedges, orchards and forests thereon, shall not, for a limited time, to be fixed by law, be taken into account in assessing such lands for taxation."

The advantages to the State from arboriculture are so evident that I need not dwell upon the expediency of making a provision in the law in accordance with the section above quoted.

Every reasonable encouragement and aid should be given to all who engage in the cultivation of forest and fruit trees, the scarcity of which is so keenly felt.

GRASSHOPPERS.

That the soil of Colorado is wonderfully fertile is beyond all question, and with proper irrigation our vegetable products are unequaled, but the greatest drawback to agriculture has been the devastation of grasshoppers.

While the farmer is rejoicing in the prospect of an abundant harvest, swarms of these pests suddenly appear and strip the earth of every green thing, leaving dearth and want wherever they go.

It has been demonstrated by years of experiment that the young grasshoppers may be readily destroyed, but the ingenuity of man has thus far been unable to devise any means of destroying the flying myriads which swarm upon us from other sections, or of preventing their incursions.

The North-western States subject to their visits have sent representatives to a convention which met at Omaha on the 25th ultimo, to consider this matter, and to devise, if possible, some measures for their extermination. It is much to be regretted that Colorado had no representative in that convention, but there was no fund from which his expenses could be paid, and no one was found willing to bear them himself.

I would strongly urge a reasonable appropriation to be expended, as your honorable body may direct, in the investigation of the history, haunts and means of exterminating this insect, and also that you by statute prohibit the destruction of insectiverous birds.

CENTENNIAL COMMISSION.

The representation of Colorado at the Centennial Exposition was provided for by the appropriation of \$10,000, and the appointment of two commissioners.

The act providing the above does not require the commissioners to make report of their expenditures or transactions, hence I am not officially informed in regard to what they have done. I learn, however, from the press, and other sources, that the display from our State is exceedingly creditable and interesting, and I have no doubt that much good will result from the attention that our products have excited.

MINES AND MINING.

The present export of gold and silver bullion and ores amounts to nearly \$8,000,000 annually. With the prospect of early railroad communication with the South-western portion of the State, by which the people of the San Juan country will be enabled to add the product of the marvelously rich silver mines of that region to the yield of the mines of the North, we may reasonably expect that the amount exported will be increased to at least \$10,000,000 in the next year. An interest upon which the future wealth and prosperity of the people so much depends, should receive every encouragement at your hands.

Your attention is called to section two, article sixteen of

the constitution, which directs the General Assembly to "provide by law for the proper ventilation of mines, the construction of escapement shafts, and such other appliances as may be necessary to protect the health and secure the safety of the workmen therein; and shall prohibit the employment in the mines of children under twelve years of age."

I would suggest that in framing a law in conformity to the above, that you provide also for the proper drainage of mines, the preservation of the records and evidence of pre-emption and other titles to mines, and also the better protection of the locator in the rights of discovery.

I would especially recommend that you authorize the settlement, by boards of arbitrators, of controversies regarding titles to mining property, and thus save the contestants long and expensive litigation in the courts. This method, if adopted, would, in my judgment, have the effect of increasing public confidence and inducing large investments in this class of property.

Your attention is also called to section one, article sixteen, which creates the office of Commissioner of Mines.

CODIFICATION OF LAWS.

Complaint is made that under our present mode of procedure in the courts, business in civil cases is delayed and carried from term to term by the interposition of vexatious and sham defenses, so that it frequently requires two years to collect the value of a plain promissory note. Besides the injury which business suffers from this slow and defective system, counties are burdened with a heavy and unnecessary expense.

This calls for remedy at your hands. Whether the object can be best effected by a modification of our present system, or by the adoption of what is known as a civil code, which prevails in a majority of the States, is for you to determine.

I would also recommend that you provide for a thorough revision and codification of our all statutes.

CONCLUSION.

In severing my connection with the territorial officers, I desire to express my grateful obligations to them for their uniform courtesy, fidelity and efficiency, and also to the people for their generous confidence and steadfast support during my administration.

The people have chosen the officers to whom are now entrusted the concerns of our young State, and will demand purity, integrity and the strictest economy in the management of its affairs.

Upon you, Senators and Representatives, rests the responsibility of making our laws, and I trust that in your legislation you will have an single eye to the promotion of the general welfare. In this object it will be my greatest pleasure and chief aim to co-operate.

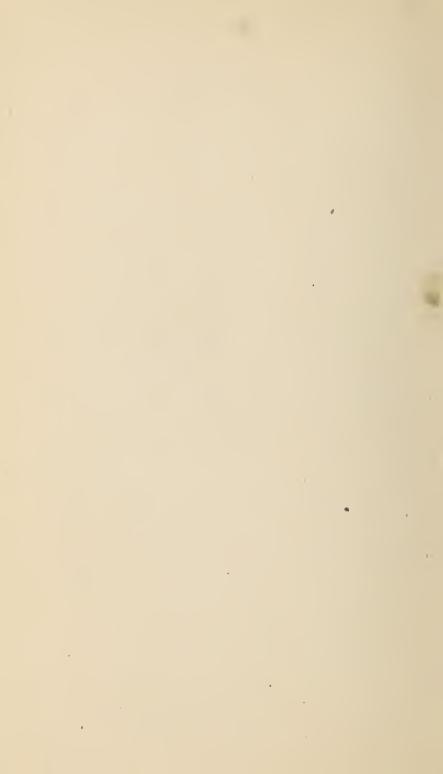

May your deliberations be harmonious and your labors successful; and, when you have transacted the business which has called you together, may you, by the blessing of God, return in safety and health to your homes, and receive the approving welcome of a gratified constituency.

JOHN L. ROUTT.

Denver, November 3, 1876.

AUDITOR'S REPORT.

AUDITOR'S REPORT.

To the Honorable, the General Assembly of the State of Colorado:

Gentlemen:—I have the honor of presenting herewith a report of the transactions of this office, embracing the period from December 31, 1875, to November 1, 1876.

RECEIPTS AND DISBURSEMENTS.

Including the balance in the Treasury, January 1, 1876, the receipts to November 1, 1876, have been \$64,307.09. The disbursements, during the same period, have been \$110,315.43, thus showing the disbursements to be in excess of the receipts, \$46,008.34.

For a statement in detail, giving the sources of revenue, receipts, and the disbursements during the time embraced in this report, I respectfully refer you to the accompanying exhibit, marked "A," where it will be seen that a large proportion of the disbursements were for special appropriations of the last Territorial Legislature.

EXHIBITS.

Your attention is respectfully directed to the exhibits hereto attached, viz:

EXHIBIT "B" shows the ledger balances on the books of the Auditor, November 1, 1876, which gives the sources of revenue receipts, by counties, and, also, shows the amount remaining to the credit of each particular fund. Many of these balances belong to old appropriations, which were in excess of the amount disbursed therefrom, but, which the Auditor did not feel authorized, without specific legislation, to credit back to the general fund, though, perhaps he would have been justified in so doing. I would, therefore, recommend the passage of a general law, directing the Auditor to credit back to the general appropriation fund, all unexpended balances at the close of the fiscal term. This exhibit, also, shows the amount of delinquent taxes charged against the different counties prior to the present year, the greater portion of which is considered wholly unavailable. The Territorial Legislature, at its last session, passed an act, the object of which was to relieve counties from the burden of these old delinquencies, but the reports made to this office from many of the counties, are so insufficient that they afford the Auditor but little, if any, data upon which to adjust these accounts in a satisfactory manner. A general law fixing a specific time, say four years, for the abatement of taxes shown to be unavailable, and authorizing the Auditor to make the proper credits, would, I think, meet the case; and, I therefore recommend the passage of such a law to your favorable consideration.

EXHIBIT "C" shows the assessed value of real and personal property in the State, as returned to this office by the different counties for the present year; and, also, the amount of revenue derivable from taxation thereon, as fixed by the last Territorial Legislature.

EXHIBIT "D" shows a classification, under appropriate heads, of the principal live stock interests of the State, giving numbers, value and tax, on each particular classification.

EXHIBIT "E" is an abstract of the assessment of property in the State, by counties, as returned to this office by the different county clerks.

EXHIBIT "F" shows the condition of the Deaf Mute Revenue Fund, the receipts and disbursements during the

period embraced in this report; and, also, the tax levy for the present year, together with the amount delinquent of previous years charged against the different counties.

FINANCIAL CONDITION.

The tax levy for the present year amounts, in round numbers, to \$66,000.00; add to this the amount, which it is estimated will be collected from delinquent taxes of previous years, say \$8,000, makes an aggregate of \$74,000 which, under existing laws, will be, or should be available by July 1, 1877. This source of revenue, it is thought, will be sufficient to pay off the present indebtedness of the State, including outstanding warrants estimated at \$50,000, and, also, leave a surplus of at least \$20,000 for other purposes.

The salaries of the Judicial and State officers, not being fixed, together with the time it will be necessary for the General Assembly to remain in session, consequent upon the vast amount of labor which will devolve upon it in adjusting matters to the change into statehood, renders it impossible for the Auditor to make any reliable estimate of the expenses of the State government for the next two fiscal years. It is believed, however, from data which is before him, that a four mill tax on the property valuation of the present year (which is thought to be far below its real value) for the year 1877, would produce revenue amply sufficient to pay off the entire obligations of the State, and leave it free from debt by January 1, 1878, and that a two mill tax for the year 1878, would be sufficient to meet the expenses of that year (1878) and leave a respectable balance in the Treasury, January 1, 1879.

CONCLUSION.

In concluding this report, I desire to express my sincere thanks to my associates in office, both Territorial and State, for the uniform courtesy and indulgence extended to me in the transaction of official business, and in closing my official connection with the State, to bespeak for my successor, the Hon. D. C. Crawford, a like courtesy and indulgence.

I have the honor to be, Very Respectfully,

L. C. CHARLES,

Auditor.

Denver, Colorado, November 1, A. D. 1876.

REPORT OF STATE TREASURER.

REPORT OF

STATE TREASURER.

Treasury Dep't, State of Colorado, Treasurer's Office, Denver, November 1st, 1876.

To the Legislative Assembly, State of Colorado: -

Gentlemen:—In compliance with the requirements of the law, I have the honor to submit herewith the following report of the receipts and disbursements of this department, from January 1 to November 1, 1876.

Very respectfully, your ob'dt servant, Fred. Z. Salomon,

State Treasurer.

REPORT OF. DEAF MUTE INSTITUTE.

REPORT OF

DEAF MUTE INSTITUTE.

To his Excellency John L. Routt, Governor of the State of Colorado:—

Another year has passed since submitting to you my last report of the Deaf Mute Institute of Colorado.

The board of trustees have endeavored by all the means within their power, to make the institution a credit to themselves, and an honor to the State.

On the 6th of January last, our Institution took formal possession of the new building, erected on the grounds donated by the "Colorado Springs Company," on one of the most beautiful and commanding sites that could have been selected for the purpose.

The building has been constructed with a view to comfort and economy, answering for the present, the purposes for which it was designed.

In order however to establish a more strict system of discipline and facilitate the progress of the pupils, it is deemed expedient by the Board to erect an additional building separate from the main building, for school rooms, printing office, library, and office for the meetings of the Trustees.

An appropriation has already been made by the Territorial Legislature for the above purposes, but in consequence of the present condition of the finances, the warrants now in the hands of the Treasurer of the "Deaf Mute Institute" not being at the present time available,

it seems necessary that some decisive action should be taken by the Legislature, about to assemble, to relieve the Board of its present embarrassment.

I would therefore earnestly urge upon their consideration the propriety of so modifying the Act passed by the last Territorial Ligislature, entitled, "An Act for the relief of the Institute for the education of Deaf Mutes," as to give to the Board the sole use and benefit of the revenue derived from the one fifth of one mill tax, at least until the next session of our State Legislature, so that the Institution may be placed upon a firm financial basis.

No member of the Legislature, nor tax payer of the State, who is at all conversant with the character and wants of so worthy a public charity as the Institution for the education of the Deaf Mutes of our State, can for a moment entertain any other than the feelings of sympathy and heartfelt desire for the welfare of the class of unfortunates this Institution is designed to benefit.

For a full report of the domestic department, I would respectfully refer your Excellency to the report of Mrs. M. E. Kennedy, the Matron of the Institution.

For the expenses of the sustenance department, you are respectfully referred to the report of the Steward, Mr. J. R. Kennedy.

For a statement of the financial condition of the Institution, you are respectfully referred to the report of our Treasurer, J. S. Wolfe. All of these reports will be found accompanying the above, and are a part of the report of the President to your excellency.

I have the honor also to present with the above, a report from the Principal, Mr. J. P. Ralstin, containing some suggestions of an important character, which I wish to present for your consideration.

In behalf of the Board permit me to say, that during the past three years, from the organization of the "Institute for the education of Deaf Mutes," until the present time, nothing but their united and determined efforts could have resulted in placing the Institution in so prosperous a con-

dition; and now as we are about to deliver up our trust and give an account of our Stewardship to the State of Colorado, permit me to thank most kindly the friends who have so assiduously labored for its success and prosperity, and among its warmest friends and supporters, it affords me great pleasure to class his Excellency, the Governor of the State of Colorado.

R. G. Buckingham, *President*.

Deaf Mute Institute, Colorado Springs, Colorado, October 26th, 1876.

To the Board of Trustees of the Colorado Institute for the Education of Deaf Mutes:

Gentlemen:—In respect to comfort and convenience our accommodations this year surpass those of the preceding, notwithstanding the increased number of pupils; but in order to secure the benefits of our increased room, we have exerted ourselves to the utmost during the entire year; the hurry and confusion of moving and settling again, in cold weather, the preparation at the same time for the exhibition of our pupils before the Legislature, and the constant necessary additions and improvements to the building, all being successfully accomplished without employing more assistance than was at hand for the daily routine of household work.

As usual, myself and the girls have done all the work required each week during the school term, except the cooking and washing, but in the past vacation the absence of any regular help outside of washing made it necessary for me to attend to the cooking myself, besides my other duties preparatory to opening school.

The health and deportment of the pupils have been excellent.

Before closing I cannot forbear mentioning the marked

improvement of the girls in the work they have been taught. Those who entered a year ago, unable, and frequently unwilling, to take even a crooked stitch, can now use a needle well in all plain sewing, and one of those here since the first year of school has this year returned with a wardrobe for herself, cut and made largely by herself.

I have procured a dress model for the purpose of having the girls learn the art of cutting and making dresses, and hope to send them—or a portion of them—home, when this term of school closes, with a thorough knowledge of the business. There is one serious obstacle in the way, however, that is, we have no room suitable for that purpose. One of those rooms used now for school would be just the thing, and if the school house could *possibly* be built this year, so that we could have those rooms—one for the boys' home room, and the other for the girls' sitting and working room—we would all be benefited in many respects, besides being made happy and grateful.

With many thanks for your consideration and kindness shown us during the past year,

Respectfully submitted.

M. E. Kennedy.

TREASURER'S REPORT.

To the Honorable Board of Trustees for the Education of Deaf Mutes:—

Gentlemen:—I beg leave to submit the following report of monies received and paid out by me since my last report, on October 1st, 1875.

Yours, respectfully,

J. S. Wolfe,
Treasurer Deaf Mute Institute.

J. S. Wolfe, *Treasurer*, to Deaf Mute Institute.

Having examined the above Report of the Treasurer of the Board of Trustees of the Institute for the Education of Mutes for the State of Colorado, I find the same to be correct and in accord with the amount of funds received and the amount for which warrants have been drawn.

> A. Z. SHELDON, Sec'y D. M. Institute.

STEWARD'S REPORT.

Gentlemen of the Board of Trustees:

I have the honor to submit my third annual report from the Domestic Department of your Institute for the education of the deaf mutes of Colorado:

HEALTH.

As was it in my reports of former years, so is it my pleasure now to refer to the continued general good health, through the past year of the beneficiaries of your institution. While it is true that we have not been wholly free from petty ailments, it is a matter of gratulation, not only that these have been fewer than in former years, but that

we have not been called upon to combat a single case of stubborn illness. This increased degree of healthfulness is not only due to the causes assigned in former reports—to climate and the untiring motherly surveillance exercised by the matron over the inmates of the institution—but is partly due to the better sanitary regulations we are able to enforce in our new and more commodious quarters.

Under this head I cannot refrain from mentioning the decease of little Owen Wall at the home of his parents in Denver, on the 22d of August last. He was among our first and most promising pupils, and is the first member of our little flock to enter voiceful joy "Over There." He passed away after a short illness; and it is a sad satisfaction to us that he was spared in health far into vacation to enjoy many happy weeks with his parents, and that it was their consolatory privilege to attend him through his sickness and minister to him in his last moments.

GARDEN.

Notwithstanding the discouragements of former years, we planted more abundantly and variously last Spring than ever before. As the Spring months passed, our garden developed a thriftiness that augured a most bountiful harvest. We, however, had hardly begun to supply our table from the maturing crop of vegetables, before the predatory grasshopper made its disastrous advent. In a short time this voracious pest had despoiled our two acres of their entire vegetable encumbrance, save inaccessible tubers and a few impenetrable squashes.

IMPROVEMENTS.

On the 6th of last January we installed ourselves in the new building which your active appreciation of our necessities had provided for us. We can assure you that our new home has not only proven convenient in its entire arrangement, but that its architectural beauty has been much admired by our many visitors. The expressed opinion of our citizens is that your Institute building was not only

erected at a surprisingly small cost, but that as a public improvement it is a credit to the State.

A large number and variety of trees have been transplanted in the Institute grounds during the present year. These have flourished beyond all expectation. In a few years they will contribute a sylvan charm to the beautiful and commanding site of the Institute.

Much care has been bestowed upon and great labor expended in the arrangement of walks and construction of terraces. These latter have been seeded in clover and blue grass and adorned with evergreens and flowering shrubbery.

STOCK.

During the past year an excellent milch cow and a flock of fifty chickens have been added to the property of the Institute. These are valuable acquisitions, since they wholly supply the Institute with milk and eggs. The yield of milk in seven months has alone saved to the Institute a sum greater than the amount expended in the purchase and maintenance of both chickens and cow.

SCHOOL BUILDING.

During the few months we have occupied the new building, two rooms, comprising half of the space on the middle floor, have been used for the school and for the pupils' sitting-rooms. Because of the great number of pupils, this has been a necessary rather than a desirable arrangement. It has many disadvantages, prominent among which may be mentioned the greater damage to school furniture and books, than if a separate school building were provided, which would be accessible to the pupils only during school hours. Not only would a separate building for the school lessen the damage to furniture and books, but it would afford the matron and her assistants several hours of respite from the wearing annoyance and confusion occasioned by the continued presence of restless pupils in and near her department. It would also be an advantage to the

school to be removed from the unavoidable bustle of the domestic department. The addition of such a building to the Institute would increase its present capacity to accommodate thirty pupils to that of accommodating fifty.

Such a building as would meet the demands of the Institute for the next several years could, in my opinion, be erected and furnished at a cost not exceeding two thousand dollars.

TRADES.

It is no longer a matter of discussion that young men, however circumstanced, should begin life masters of a trade or profession. Indeed the tendency is to encourage the acquirement of skill in some trade by even those who would devote their lives to a profession. Our national system of co-education of the sexes, together with a growing sentiment that woman may properly and successfully exert herself in many of our various industries and professions, has in the last few years resulted in the successful employment of a host of worthy young women in the various skilled arts. If our girls have a taste for any of these suitable vocations in which they are capable of attaining excellence, why not fit them for it as carefully and thoroughly as do we fit our boys for their part in life?

But what may be urged in favor of fitting our girls and boys, who are in the full enjoyment of all their faculties, for the pursuit of some avocation, may be more earnestly plead in favor of our unfortunate classes. They should not be left to glean from varied drudgery a mere pittance all their lives. This world is full of beauty to them, for which they have a keen and devout appreciation, and cruel indeed is the system that would rob them of a benefit which would contribute to their greatest possible happiness.

Our Deaf Mutes are not only apt in the acquirement of skill but are capable of mastering most all of the trades. They are among our most expert and industrious artizans, and as teachers have in the instruction of their unfortunate class attained unrivalled proficiency. The equipment of Deaf Mutes with a trade is now receiving the unanimous attention of our Institutes. The conviction is now general that these unfortunates should not be dismissed from our public institutions until they can go forth the possessors of marketable skill as well as of informed minds.

The officers of the Institute attaching much importance to this matter, encouraged Mr. O. J. Kennedy to continue through the past year, the publication of the INDEX referred to in a former report. The appearance of the INDEX during this time, though flatteringly received by the State press, was under many disadvantages. Not only had the small press from which it was worked off become hopelessly impared, but the meagre supply of already damaged type soon became worthless. Under all these difficulties the interest of our boys at the case continued unabated and their skill as compositors rapidly increased. They were charmed with the novelty and were proud of the dignity of their tasks.

It is difficult to estimate how great beneft might accrue to the inmates of the Institute, were they provided with a well furnished office and superintended by a person whose entire attention and effort would be confined to their advancement in this particular. An office properly furnished and entrusted to the charge of a suitable person upon whom would be imposed no other duties than its judicious management, might in my opinion, within a year be made to contribute largely to its support; and in a few years rendered self-sustaining and even profitable.

Though the object of this department would be to skill the pupils in all the branches of printing, there are other benefits that would incidentally accrue to the Institute through it. It would not only advertise our Institute and its work throughout the State but would herald our existence and advancement to kindred institutions.

EXPENDITURES.

In accordance with the law requiring an itemized state-

ment of expenditures, I have prepared the following exhibit of expenses for the year ending October 14th, 1876:

GROCERIES AND PROVISIONS.

Flour and Meal\$	95	00

REPORT OF SECRETARY

OF THE

AGRICULTURAL COLLEGE

OF COLORADO.

REPORT OF SECRETARY

OF THE

Agricultural College of Colorado.

To His Excellency, John L. Routt, Governor of the State of Colorado:

The undersigned begs leave to submit for your consideration the following statement of the receipts and expenditures, assets and liabilities, of the Agricultural College of Colorado, established by an act of the Legislature of A. D. 1870, from the time of its organization to the first day of October, A. D. 1876, and the particular object for which each sum of money has been expended:

AMOUNTS FOR WHICH ORDERS HAVE BEEN DRAWN	AND PAID.
Larimer County Land Improvement Company, for water	
rights for the s. 1/2 of n. e. 1/4 and n. 1/2 of s. e. 1/4,	
and n. 1/2 of s. w. 1/4 of Sec. 14, T. 7 N., R. 69 W	696 00
A. H. Patterson, abstracts of title and recording	18 50
Benedict & Phelps, attorneys' fees	5 00
L. R. Rhodes, attorney's fees	15 00
A. K. & E. B. Yount, procuring \$1,000 appropriation	27 00
Burke & Smith, fence contract	407 35
Myrich & Sullivan, printing	3 00
F. C. Avery, surveying	5 00
Barronette & Boyd, building house on grounds	420 00
Wm. N. Byers, order book,	3 11
A. H. Patterson, fence,	52 50
	\$1,705 76
TOTAL ASSETS.	
Subscriptions from all sources,	\$1,123 00
Appropriation by Legislature	1,000 00
Interest on the balance (\$417.24)	

- \$2,160 00

TOTAL LIABILITIES.

Orders paid as above mentioned,	\$1,705 76
Assets over and above indebtedness paid,	\$454 24

I, James M. Galloway, Secretary of the Agricultural College of Colorado, do hereby certify that the above and foregoing is a true statement of the receipts and expenditures of the Agricultural College of Colorado, from the time of its organization to the first day of October, A. D. 1876, and that the balance in the hands of the Treasurer of the said Agricultural College, is \$454.24; and I further certify that in addition to the above, said Agricultural College is the owner of the following real estate, (with improvements thereon,) to-wit: s. ½ of n. e. ¼ and n. ½ of s. e. ¼ and n. ½ of s. w. ¼ of Sec. 14, T. 7, n., R. 69 w., containing 240 acres, valued at about \$5,000, situate, lying and being in the County of Larimer and State of Colorado.

JAMES M. GALLOWAY, Secretary.

REPORT OF UNIVERSITY OF COLORADO.

REPORT OF

UNIVERSITY OF COLORADO.

BOULDER, October 25th, 1876.

GOVERNOR ROUTT:

Dear Sir:—At the suggestion of Mr. Corning I herewith transmit to you a concise and hastily written history of the University of Colorado, with the view of enabling you to understand its past struggles, its present status, and its future wants.

The act establishing this institution was introduced by Chas. F. Holly, a member of the Territorial House from Boulder County, and passed at the session of 1862. Fifteen Trustees were named to take charge of the institution, among which were J. B. Chaffee, Amos Steck, Gov. Gilpin, A. A. Bradford, and other prominent men of the Territory. But the act remained a dead letter on the statutes until the session of 1870, when an amendment to the original bill was proposed, adding five new Trustees, all of whom lived in the vicinity of Boulder, and have a direct interest in the permanent establishment and building up of this institution.

A meeting of the Trustees, or as many of them as could be got together, was held on the 29th of January, 1870, at Boulder. At this first meeting there were present Gov. Gilpin, Edwin Scudder, B. M. Sanford, T. J. Graham, J. M. Smith, Granville Berkley, and Amos Widner.

An organization was effected by electing Granville Berkley President, T. J. Graham Secretary, and Edwin Scudder Treasurer. Nothing further was done than to authorize

the location of the grounds on which to erect a building when there should be an appropriation for that purpose.

But it was not until a year after that the present site was procured and a deed made out to the Trustees for the same, with an additional tract of eighty acres donated by Anthony Arnett, lying in the vicinity of Boulder.

During the Legislative session of 1872, an effort was made to get an appropriation to put up a building, but the bill failed to pass, and nothing further was done till the ensuing session of 1874, when the Legislature appropriated fifteen thousand dollars, conditional that a like amount should be secured by donation, etc. This encouragement from the Legislature induced the Trustees to make another effort. A meeting was called, and a new organization was effected by the adoption of a code of by-laws and the election of new officers. Rev. N. Thompson was elected President, Amos Widner Secretary, and Geo. C. Corning Treasurer. A committee was appointed to solicit subscriptions to meet the requirements of the Legislature, to enable the Trustees to avail themselves of the Legislative appropriation.

The officers of the Board had correspondence with a number of the best educators in the country, receiving suggestions and plans in regard to the contemplated building.

The Committee on subscription reported, at a meeting of the Board held on the 18th of May, 1875, that it had succeeded in raising the amount required by law to enable the Trustees to draw on the Territorial Treasurer for the fifteen thousand dollars. This was done, and the thirty thousand dollars was placed to the credit of the University.

An architect was employed, plans adopted, and the contract let to the lowest responsible bidder. It was completed and accepted on the 18th day of last April.

You are aware, also, that at the last winter's session the Legislature appropriated fifteen thousand dollars to the University, to be paid in installments. Two of those installments, that is to say, one-half the amount appropriated, have been drawn, and about six thousand dollars been

spent in compliance to the specific object named in the act making the appropriation, to wit, fencing the grounds, planting out trees, supplying the building with water by means of pipes, furnishing and placing gas pipes, also providing the building with drainage, sewerage, etc.

The present Board of Trustees, when they hand over the building to the incoming regency, which they will do now in a few days, will place at their disposal about eight thousand five hundred dollars of the last winter's appropri-The Auditor's warrants for this will not issue till January and July next, for which reason the money is not available for present purposes. The institution will be handed over without having a dollar's indebtedness, and the present Board, in stepping down and out, have the gratifying reflection that in the erection and completing of the first building of the Colorado University, not a dollar has been lost or misspent, or appropriated for any other than the best interest of the institution. The building is now thoroughly completed and ready for occupation, with the exception of furniture, and it is hoped that the Legislature may provide some means by which a school may be opened at once. Scarcely a week goes by but the Secretary has letters of inquiry and applications from every part of the State, and many from the Eastern and Western States. wishing to know how we are getting along, etc.

Very respectfully,

Amos Widner,

Trustee.

REPORT OF PENITENTIARY COMMISSIONERS,

—FOR—

Three-quarters of Year ending Sept. 30, 1876.

REPORT OF

Penitentiary Commissioners,

-FOR-

THREE QUARTERS OF YEAR ENDING SEPT. 30, 1876.

Colorado State Penitentiary, Cañon City, October 1, 1876.

To His Excellency, John L. Routt, Governor of Colorado: -

SIR:—In compliance with your request, and in conformity with the law, we have the honor to submit the special report of the condition of the Penitentiary for the three-quarters of the year ending September 30, 1876, as we are required by law to make our regular annual report at the close of this quarter. We have not made this report as full and exhaustive as we should otherwise have done.

On January 1, 1876, there were confined in the Penitentiary 72 convicts; since that date 34 have been received, 17 discharged on expiration of sentence, 2 on writ of supersedeas, 2 pardoned and 3 escaped, leaving the aggregate at this date 79.

The greatest number in the Penitentiary at one time was 84, the least number 72, and the average number 78.

These convicts have been employed as follows:

	January.	February.	March.	April.	May.	June.	July.	August.	September.	Total days' work.

Total,	9241/2	1020	1133	11061/2	12871/2	1213	1361	10041/2	1754/2	114641/2

Of the 79 convicts in the Penitentiary at this date, one was 15 years of age at the date of his conviction, one was 16, one was 18, one was 19, four were 20, three were 21, four were 22, eight were 23, seven were 24, two were 25, eight were 26, seven were 27, four were 28, two were 29, two were 30, four were 31, three were 32, three were 33, one was 34, three were 35, three were 36, one was 38, one was 39, one was 40, one was 41, two were 43, and one was 55.

Of these I is a native of Austria, 3 of Canada, 5 of England, I of Germany, I of the Isle of Man, 6 of Ireland, 6 of Italy, 4 of Mexico, I of Norway, 2 of Prussia, and 49 of the United States. Total number of foreigners, 30.

They were sentenced to serve the following terms of imprisonment, to-wit: I, six months, and until he pays a fine of \$66.75; I3 for one year; II for two years; I for two and a half years; I6 for three years; 3 for four years; I for four and a half years; 3 for five years; 4 for six years; 2 for eight years; 9 for ten years; 2 for fifteen years, and I0 for life.

Eleven of these were convicted of assault with intent to

kill; one of assault to rape; one of assault to rob; nine of burglary; seven of burglary and larceny; one of counterfeiting; one of forgery; one of incest; one of involuntary manslaughter; twenty-four for larceny; one of manslaughter; one of misusing the Post Office; twelve for murder; one of obtaining money by false pretense; six of robbery; one of salting ores.

Twenty-two of these convicts were sent from Arapahoe County, 10 from Bent, 6 from Boulder, 2 from Clear Creek, 1 from Douglas, 5 from Elbert, 4 from El Paso, 2 from Fremont, 2 from Gilpin, 6 from Jefferson, 1 from Las Animas, 2 from Park, 9 from Pueblo, 1 from Saguache, and 6 from Weld.

Five convicts have made attempts to escape, two of whom have been recaptured. On March 6, 1876, Jack Reynolds, sentenced in Arapahoe County, May 6, 1875, to three years, while at work with 19 other convicts repairing the ditch, about two miles from the Penitentiary, made a dash, and, although several shots were fired at him by the two guards in charge, owing to the thick underbrush, made his escape. He was recaptured in Cheyenne, W. T., and returned March 29, 1876.

William A. Campbell, sent from Arapahoe County May 6, 1875, for two years, escaped while employed cleaning up the grounds outside of the fence on the evening of April 27, 1876.

Amos Snider, sent from Douglas County June 30, 1875, for two years, escaped May 8, 1876, while at work with other convicts on the lime quarry outside of the fence.

Henry Case, sent from Bent County November 29, 1875, for four years, made a desperate attempt to escape by jumping over the dump at the stone quarry and running into the mountains, at 10 o'clock A. M., August 23, 1876. He was recaptured at 10 o'clock P. M. of the same day.

James Johnson, sent from Bent County May 3, 1876, for five years, escaped at 4:45 P. M., September 6, 1876, by crawling through the fence during a sudden gale of wind, which caused a blinding dust, other convicts attracting the guard's attention in another direction at the time.

Two have been pardoned by your Excellency:

Morris James, sent July 3, 1875, from Las Animas County, for ten years—in compliance with the Statute concerning "Insane Convicts," and W. H. Johnson, sent from Pueblo County, January 7, 1875, for three years—upon the Penitentiary Physician's certificate of said Johnson having contracted a disease which would be incurable in prison.

The following supplies all of good quality have been furnished:

Enough clothing has been furnished so that each convict could change his shirt and pants once a week, and 107 pairs of shoes have been made and issued.

The general health of the convicts has been good, there having been but two or three severe cases of sickness, and no deaths.

The treatment of the convicts by the Warden has been uniformly kind, although they have been made to work, and to understand that any violation of the rules and regulations would be punished.

The following tabular statement shows the number of offenses and punishments:

====	Oppenses.	Punishments.			
1876.	Talking at work. Talking in cell. Fighting. Passing articles without permission. Passing articles without permission. Leaving work without permission. Talking in ranks. Insolence to officers. REPORT OF SCHOOL OF MINES,

OF COLORADO.

REPORT OF

School of Mines, of Colorado.

His Excellency, Governor John L. Routt, and the Legislative Assembly of Colorado.

Gentlemen:—The Board of Trustees of the Territorial School of Mines, pursuant to the provisions of the several Acts passed by the Legislature in 1874, and in 1876, met at Golden, Colorado, on the 15th day of February, A. D. 1876.

Present:—Hon. Wm. A. H. Loveland, President; Hon. Adair Wilson; J. H. Yonley; Captain James T. Smith; Edward L. Berthoud, Sec'y and Register.

The Board of Trustees then proceeded to elect Captain James T. Smith a member of the executive board, *vice* C. C. Davis, Esq., who has left the Territory.

Professor Gregory Board, E. M. was then elected as Professor in charge of the department of instruction of the Territorial School of Mines. He was empowered to prescribe the qualifications necessary for those entering the school for instruction, and to prescribe such classes, recitations, lectures, exercises and studies as may be required, and generally to oversee the whole system of instruction taught in the School of Mines.

He was also authorized, in connection with any other member of the faculty he may call to his assistance, to conduct such examination in Civil or Mining Engineering, Chemistry, Metallurgy, both theoretical and practical, Mineralogy, Geology, and Assaying, and to grant diplomas for proficiency in any of those studies; such diplomas to be

graded strictly in accordance to the proficiency of the individual examined, who applies for a diploma in Arts and Sciences.

The Board also prescribed the salary of the Professor in charge to be \$100.00 per month, for every month employed in the Territorial School of Mines as Professor in charge; and also recommend that the school be re-opened immediately for instruction.

Immediately following the adjournment of the Board of Trustees, I instructed the Secretary to begin to prepare for an immediate opening of the Spring term, and to submit to me an estimate of what was required to complete all arrangements for the proximate term. This was immediately done; new and complete apparatus and chemicals ordered; the rooms placed in full repair; text books purchased; and on the 4th of March, 1876, term of the four months' session began, with six scholars on the roll, and an attendance of twenty scholars to the lectures of Chemistry and Metallurgy.

I have the honor to report to the Honorable Governor and the Legislative Assembly of Colorado Territory, that the following gentlemen compose the Board of Trustees and Executive Committee, and the Official Board of the Trustees:—

BOARD OF TRUSTEES.

Hon. Wm. A. H. Loveland, - Jefferson County.

"Alpheus Wright, - - Boulder "

N. P. Hill, - - - - Gilpin "

W. W. Ware, Esq., - - - Clear Creek "

Hon. Adair Wilson, - - - Rio Grande "

"J. H. Yonley, - - Summit "

Capt. James T. Smith, - - - Arapahoe "

EXECUTIVE COMMITTEE.

Hon Wm. A. H. Loveland, *Pres. of the Board*. Hon. Alpheus Wright. Capt. James T. Smith.

OFFICERS.

President.—Hon. W. A. H. Loveland. Secretary.—E. L. Berthoud, T. M., C. E.

The school at present is in a flourishing condition, but the smallness of the fund that has been heretofore appropriated prevents the adequate remuneration of additional teachers that are imperatively required; and to-day the Board of Trustees have hardly enough to pay the Professor in charge, as all other teachers to this date, in Engineering, Geology, Drawing and Telegraphing, have given their services gratuitously.

I would therefore earnestly, in behalf of the Board, request the Honorable Legislative Assembly of Colorado, to consider the imperative necessity of assistance sufficient to pay for eight months in the year, a moderate salary to an assistant instructor; and for the Winter term, to pay a skilled lecturer in Chemistry, Geology and Physics.

The present fund on hand is inadequate for this; the number of scholars increases term after term. The school, as decided by the last Act of the Territorial Legislature, is a "free school" of science, for the youth of the new State of Colorado, and as such it deserves encouragement and assistance from the people of a region, destined, in a few years, to be the most remarkable and the most wealthy mining region of the whole world.

To give proper accommodations and facilities for this rising institution, the building should be enlarged, and one large addition to its Chemical laboratory, and to its Physical apparatus, are very much needed.

I have the honor to present herewith the estimates and reports of the Professor in charge, and of the Secretary of the Board, and earnestly hope the Honorable Legislative Assembly will grant enough means to properly carry on the school, and its improvements and accessories, until 1879.

Respectfully submitted,

Your obed'nt serv't,

WM. A. H. LOVELAND,

President Board of Trustees, State School of Mines.

GOLDEN, Oct. 20, 1876.

Following the instructions given by the Honorable Board of Trustees, at their last meeting, held 15th day of February, A. D. 1876, Professor Board prepared a full course of instruction, and with him we have prepared and arranged a course of instruction, and prescribed the length of terms and vacations, so as to be most advantageous. In accordance with the choice of the Board of Trustees and the Executive Committee, the following gentlemen were selected to give instruction and to lecture upon the several sciences, as set forth in the circular published by the Board of Trustees:—

FACULTY.

Prof. Gregory Board, M. E	Mineralogy, Metallurgy, Assaying
E. L. Berthoud, C. E	Civil Engineering, Geology
Richard Pearce, F. G. S	Practical Metallurgy
Theo. F. Van Wagenen, M. E	
James Teal,	Mechanical Preparation of Ores
William West,	
J. H. Yonley,	
Rev. Thos. L. Bellam, A. M	

While Professor Gregory Board, E. M. prepared carefully the following "curriculum."

COURSE OF STUDIES.

First Term.

Chemistry, theoretical and practical. Blowpipe Analysis, and Assaying. Mineralogy. Drawing. Civil Engineering.

Second Term.

Metallurgy and applied Chemistry.
Mining Engineering
Mineralogy.
Geology.
Drawing.
Assaying.

In addition to the above, ample provision is made for field work, and for visiting mines and works for the treatment of ores.

DIPLOMAS.

When a student completes the course of instruction, in either the regular or special courses, he will, after passing a thorough examination, be entitled to receive a Territorial or State diploma, setting forth his actual proficiency. The right of examination is extended to persons who are not students, but who may wish to obtain the Territorial or State diploma.

ASSAYING.

As the Professor in charge is by law a Territorial Assayer, special attention will be given to the thorough examination of ores and mines, for which the school affords every facility.

The first term of 1876 began March 6th, and ended on the 24th June, A. D. 1876.

The attendance during the first term was six students in assaying, metallurgy and chemistry and physics.

Twenty students attended lectures twice weekly, upon chemistry and metallurgy, illustrated by experiments.

The second term, now open, began upon the 4th day of September, A. D. 1876, and will end on the 23d day of December, 1876.

During this term telegraphy is taught at the State School of Mines by a volunteer instructor, formerly an operator of the Western Union Telegraph Company, receiving no compensation for his instruction, and as he has his own instruments to teach this art, he receives from pupils whatever fee they are willing to give him for instruction, but in no way controlled by the Board, but simply under direction of the professor in charge.

Average attendance this term seven pupils, and the usual lectures in preparation with experiments and illustrations in chemistry, metallurgy, etc., etc.

WORK DONE DURING THE YEAR.

In accordance with the rules of the School of Mines since 1874, the usual meteorological register has been kept continually during the year 1876.

The meteorological register kept is carried out strictly under the rules and directions of the chief signal officer of the U. S. army. It is sent monthly to the signal office at Washington, and I have the pleasure to state to the Hon. Board of Trustees, that the humble part we have here in Colorado taken to illustrate and work out the intricate problems of temperature, rainfall, storms, etc., etc., and of all natural and periodical phenomena generally is fully appreciated.

Abroad as well as at home the Signal Service and "volunteer observers" of the United States, having at Paris last spring received from the assembled science of the world, the compliments of extraordinary merit, and the acknowledgment of superior unexcelled skill, and success in the department of meteorology.

I would also add, that during September and continuing during October, observations on the amount of atmospheric "ozone" have been made in connection with the meteorological record. Yet it is premature to say what will be the ultimate success of this, which to some present strong points of a seeming coincidence between the amount of "ozone" in the air and the absence or presence of lung and throat complaints, epizootic epidemics and hard colds, which in Colorado occasionally arise, as it were suddenly, and as suddenly cease.

Inclosed I present a summary of the meteorological observations from 1st January to 30th September inclusive, as an earnest of what can be done to enable us to obtain in time an average of the climatic condition of Eastern Colorado.

Summary of meteorology for nine months, beginning January 1, 1876, and ending September 30, 1876; State School of Mines, at Golden, Colorado.

Latitude, 39,° 44′ north; Longitude, 105,° 8″ 10′ west; Altitude, 5,618 feet above the sea.

In the report presented to the Legislature, in February, 1876, by yourself as President of the Board, a modest request was made, asking if the Territorial Legislature would assist in the work of collecting for the Philadelphia Exposition, a full collection of the ores, minerals, etc., so abundantly found in our Territory. This collection having been begun by the Secretary of the Board of Trustees, who had already forwarded several boxes of type minerals and fossils, although not receiving any direct aid from the Legislature. In March, 1876, the zeal and the foresight of the Centennial Commissioners of Colorado appropriated a small amount to aid in this work. A superb collection of fossils, and the principal minerals found in Jefferson County, with the industrial products of her minerals, was procured for the Centennial Colorado collection, besides a full collection made by your Secretary for the Agricultural department of the United States Exhibition, of all the virgin soils of Colorado, and the country from whom they are derived.

For all this, your Honorable Board of Trustees, the Golden School of Mines received credit, and the telegraph informs us that the State School of Mines of Golden has received one of the two premiums given to Colorado for the "best geological collection." We believe your work has not been in vain, and that the actual benefit of such a School of Science cannot be measured in value, but is of vast increased amount and indefinitely valuable in develop-

ing the value of our mining districts and properly presenting their claims to the monied capital of the world.

I will now present to the President of the Honorable Board of Trustees the condensed statement of the receipts and expenses from February 15, 1876, to October 20, 1876—but will here add what I believe is imperatively required during the years 1876 and 1877, and give an approximate estimate of what the School really needs in addition to present facilities:

SUMMARY STATEMENT.

RECEIPTS.

January 18th, 1876.		
Balance of appropriation of 1874 on hand\$	79 28	
February 11th, 1876, Appropriation		
June 30th, Cash from assays to date	11 25	
October 1st, Cash from students for apparatus and chemi-	62 00	
cals	35 00	
October 1st, Cash tuition from non-resident	25 00	\$3,702 53
Total receipts		\$3,702 53
EXPENDITURES.		
To date October 31st, 1876.		
Salaries\$	735 00	
Fuel	42 77	
Insurance	83 50	
Sundries	105 72	
Postage, printing, papers, books, etc	128 70 32 89	
Hardware	39 75	
Apparatus, fixtures and chemicals	39 75	\$1,533 08
	5-175	
		\$1,533 08
Leaving a balance unexpended of \$2,179 45, which leav	es for the	year 1876,
yet unexpended the sum of \$429 45.		
ESTIMATE OF AMOUNTS REQUIRED TO DECEMBE	0 /	78.
For salaries of two Instructors and Secretary\$2	,000 00	
For Books of Reference, Maps, Charts, etc	375 00	
For Physical and Chemical Apparatus	725 00	
For Contingencies, Repairs, Insurance For Fuel, Printing, Chemicals	575 oo 600 oo	
For building wing to School of Mines		
For Fencing, Outhouse and Water Supply		\$10,025 0 0
Total		\$10,025'00
Deduct unexpended appropriation		2,179 45
Leaves amount to be granted		\$7,845 55

I would inform the Hon. Board of Trustees that we have but few books of reference yet; that an addition of \$150 more is absolutely necessary for the students and for the professors to consult. We have no standard works in Metallurgy, Mining, Engineering and the Lecture Arts. We have no Geological Charts, no Spectroscope, or Electrical Apparatus. All that so far have been used as books of reference have been loaned to the school, or belong to the professors. We are in receipt continually of books, maps, and the U.S. publications of the geological survey in the west; several valuable works. Dusts and specimens of ores, fossils and minerals, are continually received, but we must have more space to accommodate students who come from all over the Union to get the benefit of the Institution of the only mining school west of St. Louis or New York.

Respectfully submitted,

EDWARD L. BERTHOUD,

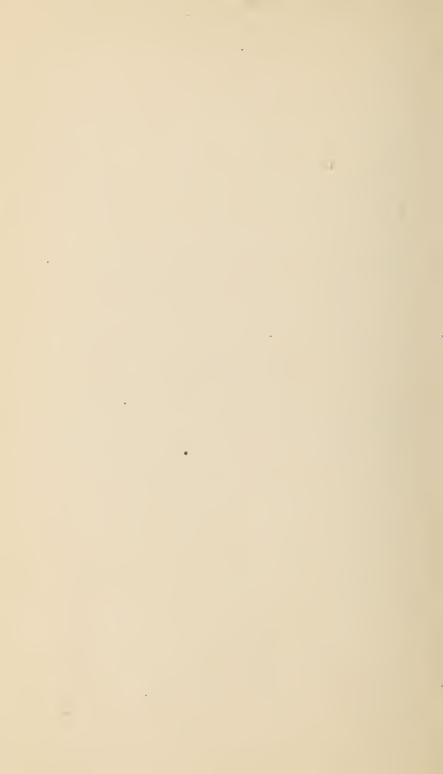

Sec'y State Board School of Mines.

Golden, October 20, 1876.

OF THE

Superintendent of Public Instruction.

OE THE

Superintendent of Public Instruction.

State of Colorado,
Office of Superintendent of Public Instruction,
Denver, October 1, 1876.

To His Excellency, JOHN L. ROUTT, Governor:

SIR:—I herewith submit the report of the department of Public Instruction so far as I have data at this time. From six of the counties of the State no reports have been transmitted. I have, however, included in the statistics below, estimates based on former reports which cannot vary materially from the official reports.

By comparing the statistics of the year which ended Aug. 31, 1876, with the preceding year, it will be seen that, so far as ways and means are concerned, there has been a healthy growth of our Public School System. The increase in the number of children has been about eight per cent. Although this increase is not evidenced by the figures, owing to the fact that the minimum school age is now 6 years instead of 5 years. The percentage of enrollment on the number of school age is somewhat larger, being sixty-two per cent against fifty-four per cent for the former year.

STATISTICAL SUMMARY.

1875.

The statistical summary for the school year, ending Sept. 30, 1875, is as follows:

Average rate of County tax levied for school purposes, 3½ mills. Total school fund realized, including special taxes, &c., \$247,179.07

EXPENDITURES.

For sites and buildings	4
For salaries of teachers and superintendents 102,783 3	
For fuel, rent, insurance, &c	6
Total	6
Number of school districts	9
Number of school houses	8
Value of public school property \$414,008 6	6
Number of persons, between the ages of 5 and 21 23,27	4
Number enrolled in the school	8
Number of teachers employed	7
Average salary of male teachers \$60 o	Ю
Average salary of female teachers 48 o	0
Average number of days, schools were in session	6

1876.

Summary of statistics for the school year, ending August 31, 1876:

Average rate of County tax for school purposes, 31/3 mills.

INCOME.

	iii.
Amount on hand at beginning of school year	\$ 35,002 11
Amount realized from County tax	127,582 50
Amount of County Superintendents' salaries, paid	
from general County fund	5,967 00

Number of school houses	217
Value of Public School property	
Number of persons between the ages of 6 and 21	
•	

Number enrolled in the school

14,364

Number of teachers employed	401
Average salary of male teachers	\$60 00
Average salary of female teachers	48 00
Average number of days, schools were in session	100
Number of persons under 6 years of age	11,438
Total number of persons under 21 years of age.	33,400

SCHOOL PROPERTY.

The value of school property has been materially increased by the erection of, and additions to school houses. The Southern portion of the State has contributed largely to this end: Pueblo, by the erection of a \$20,000 building; Del Norte, by an \$8,000 building; and other districts by smaller ones. Very many of the rural districts throughout the State have built school houses, commensurate to their wants. Many of the old houses have been furnished with charts, maps, globes, dictionaries, etc., to an extent, far exceeding that of any former year. To superintendents and teachers, these last mentioned acquisitions are equally gratifying with the first. All afford indisputable evidence of zeal in the maintenance of our public schools.

TEACHERS.

As being more important than the foregoing, it is gratifying to be able to state that the standard of qualification in teachers has been raised. In several instances, inferiority and mediocrity have given place to their betters, and this without materially increasing expenses.

THE NEW SCHOOL LAW.

The school law, passed at the last session of the Territorial Legislature, has, in the main, proved satisfactory. With some slight amendments and such additions as the new order of affairs will necessitate, it will, I believe, prove effective.

The only serious objections to the law that have come to my knowledge are the following:

First—That it requires a school to be maintained 120

days during each year to entitle a district to a portion of the county fund.

Second—That one half of the county fund shall be apportioned according to the aggregate attendance at school in each district, instead of, as heretofore, according to the number of persons of school age residing in each district; that by this method of apportionment small districts, in which schools are maintained but 120 days, are crippled in their finances.

Third—That the salary of the County Superintendent may not exceed \$800 per annum, and that in county warrants.

Fourth—That the school fund must remain in the hands of the County Treasurer until drawn therefrom by the district boards.

I desire to refer briefly to these objections. It will be seen that the question of *moncy* is involved in every objection. I have heard nothing against the wholesomeness of any of said provisions, and firmly believe that every one of them will prove conducive to the welfare of the schools.

First—That every school room should be open for at least 120 days each year, I have no doubts. Many of the States require more than this. This provision has no terrors for a majority of the school districts, since without this requirement schools have been maintained for a longer time every year than that specified and now required by law. There are, however, school districts the directors of which have had as much as \$1,000 on hand after having supported a cheap school for sixty days, which money, by closing the school, they were able to retain and use. In some instances the county funds have been paid year after year to districts that opened no school at all, the directors being pecuniarily interested in keeping the school house closed. It was to reach such cases that the provision in question was incorporated, and if it be permitted to remain and be rigidly enforced, the end sought will be attained. The Legislature cannot be too careful in so guarding the finances pertaining to the schools that the money may not

be diverted from the uses for which it was paid, and absorbed and frittered away by selfish and mercenary persons who seek and obtain school offices for no other purpose than to reap the advantage arising from the custody of the cash. Tens of thousands of dollars of this sacred fund have been stolen and misused during the few years since Colorado became organized as a territory. I fear this will not be stopped until defalcation of public school money is made a crime.

Second—The second objection, which relates to the manner of apportioning the county fund, is, in a measure, a valid one, and calls for a remedy. Under the present law one half of the public money is apportioned according to the aggregate at school, and the other half according to the number of persons between the ages of six and twentyone years. By this method the amount received by districts, in which school is maintained but 120 days each year, is smaller than heretofore. In the original bill this difficulty was anticipated and provided for, but the Legislature deemed it best to change the provision. The only object in having a free public school system is that the wealthy localities are made to contribute to the support of the weaker. This method of apportionment is a compromise between the former method, which was manifestly unjust and unreasonable as well as admitting of the practice of gross frauds, and the more equitable method adopted by some of the older States of dividing it all according to the actual attendance at school. The school tax is levied and collected for the support of schools, and it should be used where it is made to do the most good. I cannot here enter into a full narration of the many frauds that have been practiced under the former law. Infants and adults have been placed upon the census lists and have drawn public money; the enumeration has been inordinately swelled by counting myths and persons removed from the districts. In many instances the reported attendance at school being but seven per cent. of the number of persons who draw public money. From a report now before me I copy:

Number drawing public money	. 71
Enrolled in school	. II
Average daily attendance	. 5
From another:	
Number drawing public money	. 167
Enrolled in school	
Average daily attendance	. 11
From another:	
Number drawing public money	. 245
Enrolled in school	
Average daily attendance	. 15

This list can be extended ten-fold, and the figures need no comment. Their significance cannot be mistaken.

In many of our rural districts the voting majority is wholly with bachelors and persons not heads of families. and who have no interest in schools. These voters elect school directors from their own class, draw and control the school fund, maintain a poor, cheap school for sixty days, always vote down any proposition to levy a special tax, etc., etc., and shout Vox populi! Vox Dei! Make the amount of money received by each district dependent upon the amount of school kept and the attendance, and you make every parent who sends to school interested in having his shiftless neighbor send his children to school, and thus in a measure obtain what might be termed "moral compulsory education." I think the essential features of this method of apportionment should remain. The objection may be removed by apportioning outright from the whole fund say one hundred and fifty dollars to each district in the country, irrespective of its size, and let the balance of the fund be apportioned as the law now prescribes

Third—The third objection that the salary of county superintendents is limited to eight hundred dollars will not be considered very serious, when 1 state that but one county superintendent has reached the limit of eight hundred dollars.

Fourth—The fourth objection calls for no answer from

me since it is a question of practical policy rather than one affecting directly the welfare of the schools. Certainly the chances for embezzlement of the school fund are reduced one-half by having the money pass through the hands of one official instead of two. Instances could be cited forcibly illustrating the advantages of the law as it now stands.

Finally, permit me to say: While our school system is by no means all that could be desired; while there remains much to do by way of inducing, or even compelling indifferent, ignorant and selfish parents to give their children an opportunity to acquire at least such an education as shall take them out of the ignominous class known as illiterates: that shall enable them to be able to read their ballots and their letters of correspondence; while there is yet a large field—a very large field—in our new State wherein the schoolmaster may find work; yet Colorado is justly entitled to honor in that she enters the sisterhood with a better developed and more liberally supported school system than was ever possessed by any other State at the time of admission into the Union. This condition, attained in so brief a period, and in spite of great embarrassments. augurs a brilliant future for the Centennial State. May the first session of our General Assembly be fully imbued with the importance of sustaining liberally, and guarding carefully what has been well termed "the bulwork of our liberties,"—the public schools.

Respectfully, your obedient servant,

H. M. HALE,

State Superintendent Public Instruction,

OF THE

ADJUTANT GENERAL.

OF THE

ADJUTANT GENERAL.

STATE OF COLORADO,
ADJUTANT GENERAL'S OFFICE,
DENVER, October 21, 1876.

To His Excellency, JOHN L. ROUTT, Governor:

SIR:—I have the honor to present to your Excellency the following report of the Adjutant General's Office:

MILITIA.

Since my last report, (made December 31, 1875,) two companies of militia have been organized, one at Sterling, Weld county, named the "Sterling Scouts," and the other at Colorado Springs, El Paso county, the latter to take the place of the "Pike's Peak Rangers," whose term of service had expired. Both of these are cavalry companies. The present organized and armed military force of the State is therefore as follows: Two companies of infantry, two companies of cavalry, and "The Mitchell Guards," a private military corporation of the city of Denver, who are armed with Springfield B. L. Muskets, and who by law are "at all times subject to the command of the Governor." The military establishment would doubtless be increased by several companies if we could furnish arms for them. The Germans of Denver desire to organize a cavalry company, and the colored people of Denver desire to form an infantry company if we could arm and equip them, and, knowing how heartily both nationalities enter into such matters, I am confident that the companies would be an honor to the

city and State and a real source of dependence in case of trouble; but while we cannot even supply any new companies with arms, to say nothing of fully equipping and uniforming them, (which I believe we ought to do for all our soldiers) there is but little encouragement for any one to make special efforts looking towards the organization of new military companies.

On the 15th of August an armed body of masked men boarded the Colorado Central Railroad train and took therefrom by force of arms, His Honor, Judge Stone, who was on his way to Boulder county for the purpose of holding court. Fearing that further obstructions would be placed in the way of holding court, the "Governor's Guards," of Denver, were ordered out to assist in keeping the peace and to rescue Judge Stone from his captors. Fortunately the Judge was quickly released, and no further demonstrations against law and order being made, there was no collision, and the Guards returned to their homes. I wish to call your Excellency's attention to the promptness and alacrity which the Guards displayed in leaving their business and homes to obey your orders.

With this exception the services of the militia have not been required, though the necessity of having well armed and efficient military companies in different parts of the State has been several times illustrated since my last report, notably, when in July prior to the arming of the "Sterling Scouts," a band of Sioux Indians raided the northern part of Weld county, killing three men and running off considerable stock, and again, in the early part of the present month, when intelligence was received of a threatened outbreak of the Indians in La Plata county.

Since the arming of the "Sterling Scouts," their portion of the State has been nearly if not quite free from hostile Indians, and the General Government has sent troops for the protection of our southern border. Probably a good militia company in Parrott City would overawe the Indians and facilitate the settlement of that section of the State.

ORDNANCE AND ORDNANCE STORES.

Below you will find a statement of the number and kind of ordnance and ordnance stores remaining in my possession at this date, and also the number and kind of arms and equipments which have been issued to the different companies and officers of the militia.

In order to arm the Emmett Guards of Central City I recalled the twenty-five Spencer rifles which had been issued to the High School Squad of Denver, which enabled me with what I had on hand to fully supply them. At a little expense I fitted bayonets to the guns and thus equipped them with very good and presentable arms. I had to purchase a few bayonet scabbards, which I bought of one of our gunsmiths for seventy-five cents apiece, a reasonable price.

The Sterling Scouts I armed with the Spencer carbines and equipments complete.

At the time of the Indian troubles in the northeastern part of the State, when the settlers were very uneasy and much alarmed, I sent to Brigadier General J. L. Brush, at Greeley, twenty-five Spencer rifles and twenty-five Spencer carbines which were recalled from Golden and the School of Mines. These were to be issued only in case of absolute necessity, and then to well organized companies if possible. These arms are doubtless stored in Greeley subject to your orders.

The High School Squad has been supplied with some of the unserviceable muzzle loading Springfield muskets and bayonets which are lighter and better for their use than the Spencer rifle, which they formerly had.

I would respectfully suggest that your Excellency urge upon the Honorable Senators and Representative in Congress from our State the propriety of trying to secure legislation looking toward the cancelling of our indebtedness to the government for arms heretofore issued to the Territory of Colorado, and to our being supplied with what

arms and equipments we need. A battery of light artillery and one thousand stand of Springfield muskets and carbines would probably be all we should require for some years to come.

STATEMENT OF ORDNANCE STORES ISSUED BY ROBERT S. ROE, ADJUTANT GENERAL OF COLORADO.

RECORDS.

I am sorry to be obliged to report that the records of the Colorado soldiers who fought in the late war are still in the same incomplete condition that they were at my last report. I wrote to the Adjutant General of the army, at Washington, asking for copies of the missing muster rolls, but received a reply stating that copies of muster rolls were only furnished to those States which gave bounties to their soldiers.

I presume that much of the missing information could be obtained from the late officers of the First and Second regiments of Colorado volunteers, but the last Territorial Legislature made *no provision* for the expenses of my office, and I did not feel justified in going to any expense at this present time for this object. There should however, as soon as possible, be an effort made to complete these records, for the longer the matter is delayed the less likelihood is there of my being able to obtain the required papers and documents.

MILITIA LAW.

The present militia law is a very unsatisfactory one in many respects—especially so in the provision for enrolling the militia, for calling out the militia in case of insurrection or invasion, and for collecting the military fund.

I hope to present my views on this subject to your Excellency in the draft of a new law in time for its consideration by the State Legislature about to convene, should it meet with your approval. I had expected to have enclosed it herewith, but not having been able to give the time and thought to the subject which it deserves and not having sufficient knowledge of the laws of other States, I must take a little more time ere I can satisfy myself in this matter.

In conclusion, I have the honor to be, Sir, very respectfully, your obedient servant.

ROBERT S. ROE,

Adjutant General.
