

SOUTH PLATTE DECISION SUPPORT SYSTEM

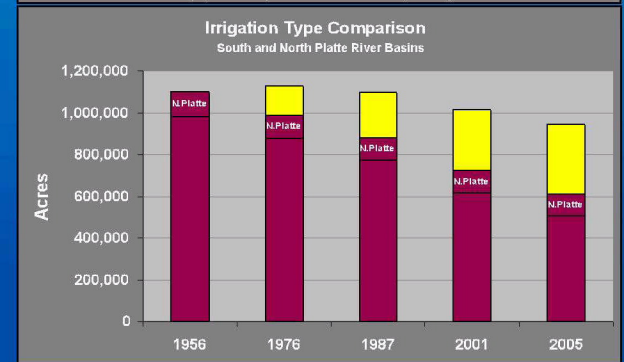

Historic Irrigation Types

SPDSS Irrigated Acreage Irrigation Types

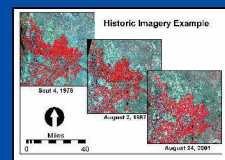

Flood **Sprinkler**

The North Platte River Basin is not displayed on the maps. In the North Platte Basin only flood irrigation is used.

About the Poster

This poster displays historic irrigated agriculture in the South Platte River Basin of Colorado. Acreage is summarized by irrigation type and displayed by the SPDSS study periods. The irrigated acreage is a product of the SPDSS and was obtained using satellite imagery, aerial photography, vegetation indices, and GIS analysis. For more information visit: <http://cdss.state.co.us>
