On The Map is a unique resource for identifying workforce characteristics within specific geographic areas and mapping the commuting patterns of workers. LED can answer questions as diverse as:

- How many people work and live in my geographic area?
- How many people work in my geographic area and live outside?
- How many people live in my geographic area and work outside?
- What distance and direction do commuters take to get to/from my area?
- How might I characterize workers in my area: age, earnings, race, ethnicity, educational attainment, gender, industry distribution?

LED for Colorado is a partnership between Colorado Labor Market Information and the U.S. Census Bureau. LED is sometimes referred to as Longitudinal Employer-Household Dynamics (LEHD).

From [www.colmigateway.com](http://www.colmigateway.com) go to Products at the top of the page and click **On the MAP** under Local Employment Dynamics. Many valuable filters can be found to further define your search by age, income, and industry. Please note that active duty military are not part of the LED data set.

## Work Area Profile Report

The Local Employment Dynamics (LED) program combines workplace employment data with household demographic data. This report provides a comprehensive view of the workforce characteristics in a given geographic region by where workers live or where they work.

Colorado Springs MSA Employment	2010	
	Count

## Colorado Springs MSA Employment

Which of your industries contain the largest amount of employment?

Review the pie charts below. Which, if any, of the statistics surprise you?

### Jobs by Worker Earnings

### Jobs by Worker Race

### Jobs by Worker Educational Attainment

## Area Comparison Report

Expanding upon a basic demographic profile, this report details the geographic distribution of jobs within the Colorado Springs MSA. The Area Comparison Report can help you analyze County data at a much greater level of detail. This chart reviews the Colorado Springs MSA.

## Distance - Direction Report

Looking at only those workers employed in Colorado Springs MSA, this report aggregates jobs by the distance and direction of the worker's commute, as the crow flies, from home to work.

The default display on this Report is the "radar chart" shown below. If you prefer, it can easily be changed to display in a more conventional bar chart.

### Jobs by Distance - Work to Home

Total Jobs	2010	
	Count	Share
Less than 10 miles	128,622	60.4%
10 to 24 miles	35,616	16.7%
25 to 50 miles	16,324	7.7%
Greater than 50 miles	32,214	15.1%

The LED business location data include both workers at the business physical location and workers who primarily work from home and only occasionally commute to the workplace. These differences are not distinguishable in the data.
