On The Map is a unique resource for identifying workforce characteristics within specific geographic areas and mapping the commuting patterns of workers. LED can answer questions as diverse as:

■ How many people work and live in my geographic area?

■ How many people work in my geogaphic area and live outside?

■ How many people live in my geographic area and work outside?

■ What distance and direction do commuters take to get to/from my area?

■ How might I characterize workers in my area: age, earnings, race, ethnicity, educational attainment, gender, industry distribution?

Colorado LED is a partnership between the Office of Labor Market Information and the U.S. Census Bureau. LED is sometimes referred to as Longitudinal Employer-Household Dynamics (LEHD).
Work Area Profile Report

The Local Employment Dynamics (LED) program combines workplace employment data with household demographic data. This report provides a comprehensive view of the workforce characteristics in a given geographic region by where workers live or where they work.

All Jobs, Jefferson County

Distance - Direction Report

Looking at only those workers employed in Jefferson County, this report aggregates jobs by the distance and direction of the worker's commute, as the crow flies, from home to work.

The default display on this Report is the "radar chart" shown below. If you prefer, it can easily be changed to display in a more conventional bar chart.

Job Counts by Distance/Direction in 2010
All Workers

Jobs by Distance - Work to Home

	2010 Count	Share
Total Jobs	218,698	100.0%
Less than 10 miles	109,135	49.9%
10 to 24 miles	75,661	34.6%
25 to 50 miles	15,289	7.0%
Greater than 50 miles	18,613	8.5%

The LED business location data include both workers at the business physical location and workers who primarily work from home and only occasionally commute to the workplace. These differences are not distinguishable in the data.
