ACKNOWLEDGMENTS

A comprehensive report such as the Colorado Statistics of Income would not have been possible without the support of many individuals.

Mr. David Morrissey, director of the Legislative Council research staff, has given unyielding support to this study and many other research projects. This series of reports has been published as Legislative Council research publications over the years.

The concept for these reports was initiated by Dr. Reuben Zubrow of the University of Colorado. Dr. George Bardwell of the University of Denver provided the initial sample design. Their contributions have enabled the Department of Revenue to continue the Statistics of Income reports.

The Tax Analysis Section of the Department of Revenue is also grateful to the many sections within the Department who contributed to the success of this project. Data entry of the tax returns was under the supervision of Luella Zaragoza, Sally Hastings-Shills, and Cindy Nardini. During the past year, the collection of data has been made a more automated process. The Department of Revenue's Management Information Systems staff under the supervision of Kathy Thomas and Lee Buesing were responsible for this project development.

INTRODUCTION

Since 1972, the Colorado Legislative Council has commissioned studies to report on the income tax structure of our state. This publication marks the ninth of this series concerning individual income taxes.

A sample data base of over 18,000 tax returns drawn from a universe of over 1.4 million returns constitutes the basis for this report. From the data collected from each return, distributional analyses of sources of income, deductions, tax liability, and tax credits are presented. Estimates of Colorado income tax law changes on tax collections are discussed.

The report summarizes the distribution of household adjusted gross income by planning regions, major counties, and major cities in Colorado.

The report is intended primarily for the Colorado Legislature and should be particularly useful to committees such as the Legislative Finance Committees. It is also intended to be useful to the economist, researcher, demographer and planner.

For the first time, the data collected from the Colorado income tax returns has been supplemented by income and tax data from federal tax returns made available by the Internal Revenue Service. The combined data enabled the Tax Analysis Section to provide estimates of potential impacts on Colorado income tax revenues of the sweeping federal tax reform changes effective in 1987. The data base established through this study will also provide the means to analyze proposals to alter Colorado's tax structure in response to federal reform.

Inquires regarding this report may be directed to the Tax Analysis Section of the Department of Revenue.

Section 1. RECENT INCOME AND TAX TRENDS

This section examines the relation between sources of income, federal adjustments to income, Colorado modifications, deductions, and tax liability.

Tables I-1, I-2, and I-3 present the major sources of income as reported on resident tax returns (full year plus part year returns only) during the past years.

Wage and salary income increased to \$26.6 billion, a gain of only 3.4 percent from the prior year. The average wage and salary per return rose 2.2 percent to \$22,368. The prior year's reported total wages and average wages per return rose 9.9 percent and 5.5 percent, respectively. The number of returns reporting wage income in fiscal year 1986 actually dropped slightly. The comparative figures would seem to indicate the beginning of a soft economy in Colorado.

Net property income is a broad category consisting of interest and dividends, taxable capital gains, rents, royalties, partnership income, and pensions and annuities. Net property income decreased 2.8 percent from the prior year. The decrease was fueled primarily by a decline in taxable capital gains from \$1.2 billion to \$851 million. Interest income declined 4.5 percent, dividend income increased 2.2 percent, rents, royalties, and partnership income increased 34.5 percent (yet was still a negative \$435 million), and pension and annuity income increased 5.3 percent.

Business income declared on Colorado individual income tax returns also showed the softening of the economy with an 8.0 percent decrease.

Net farm income increased 21 percent but in the aggregate the amount remained in the negative column at \$170 million.

TABLE I-1. MAJOR SOURCES OF INCOME
ON RESIDENT TAX RETURNS
Fiscal Year 1986

	Number of Returns	Percent of Returns Reporting	Colorado Income		
			Amount (millions)	Percentage Change from FY 1985	Percentage Distribution
Wage and Salaries	1,189,048	84.7	\$26,597.7	3.7	81.4
Net Property Income	931,216	66.4	\$ 4,841.6	- 2.8	14.9
Positive	812,214	57.9	6,009.1	0.7	18.5
Negative	119,002	8.5	1,167.5	-18.0	- 3.6
Business Income	225,066	16.0	\$ 1,072.8	- 8.8	3.3
Positive	159,827	11.4	1,645.0	4.3	5.0
Negative	65,239	4.6	572.2	-42.7	- 1.7
Farm Income	37,006	2.7	\$(170.0)	21.0	- 0.5
Positive	15,125	1.1	143.1	9.2	0.4
Negative	21,881	1.6	313.1	9.5	- 0.9
Other Income	536,685	38.2	\$ 99.0	-59.3	0.3
Total Income	1,403,303	100.0	\$32,441.1	1.7	100.0

Other income decreased to \$99 million from \$243.4 million reported the prior year.

The sum of these income components totalled \$32.4 billion, an increase of 1.7 percent over the prior year. Tables I-2 and I-3 summarize the sources of income and present the adjustments, modifications, and deductions for the last four fiscal years.

Federal adjustments to total income consist primarily of IRA deductions and the two earner deduction. Other deductions consist primarily of business expenses. Payments to IRA accounts and deducted on the income tax return amounted to \$566.3 million in fiscal year 1986. Households with two income

earners are allowed to deduct ten percent of the smaller income up to a maximum of \$3,000. This benefit is designed to reduce the "marriage penalty" inherent in the federal tax rate structure. This deduction accounted for \$343.9 million in fiscal year 1986. Colorado adds this adjustment back to federal adjusted gross income since the same "marriage penalty" does not exist within Colorado's tax structure.

Federal adjusted gross income is total income minus business expenses and federal adjustments. It amounted to \$31.1 billion on returns filed in fiscal year 1986, an increase of 2.4 percent from the prior year.

Colorado modifications consist of additions to or subtractions from federal adjusted gross income. The addition of the two earner deduction amounted to an increase of \$343.9 million to federal income for Colorado tax purposes. Another addition, the employee retirement contribution for public employee groups such as the Public Employee Retirement Association and other approved plans which are tax exempt at the federal level but not for state income tax amounted to \$147.5 million. Other additions total \$400.1 million. Subtractions from federal AGI include United States government interest, \$151.9 million; the pension and annuity income exclusion up to a \$20,000 maximum, \$1,197.1 million; the child care expense, \$184.1 million; the Colorado interest exclusion, \$156.1 million; the Colorado dividend exclusion, \$28.6 million; and other miscellaneous subtractions, \$604.3 million.

Colorado adjusted gross income is the difference between federal AGI and Colorado modifications (returns where Colorado AGI is negative have been made equal to zero in this report) and is the basis upon which the income distributions are made in this report. The growth in Colorado AGI slowed to a 3.9 percent rate during the past year and totalled \$30.8 billion.

Colorado deductions consist of a personal exemption allowance, itemized deductions or the standard deduction, and the federal income tax deduction. Each taxpayer is allowed a personal exemption. Additional exemptions are granted for dependents, for taxpayers who are age 65 or over or blind, and for dependents who are mentally retarded. A total of 3,276,109 exemptions for a value of \$3.817 billion was claimed on resident returns.

The standard deduction of \$1,420 may be taken in lieu of itemized deductions and was used by 689,000 taxpayers last year for a total value of \$931.2 million. Fewer than 50 percent of taxpayers are now utilizing the standard deduction.

Itemized deductions consist of medical expenses, certain state and local taxes, interest expenses, charitable contributions, and miscellaneous deductions. Itemized deductions claimed on returns filed last fiscal year grew to \$6.093 billion, an increase of 6.3 percent from the prior year.

Federal income tax deduction. Federal income tax is deductible on all returns, i.e. itemized or standard deduction returns which include table returns, and amounted to \$4.231 billion.

Colorado taxable income is the result of subtracting these deductions from Colorado adjusted gross income. It is calculated as zero when deductions exceed Colorado AGI. Taxable income increased 4.2 percent last year to \$16.587 billion.

Colorado tax liability is the result of applying the Colorado rate structure to taxable income. Net normal tax liability is the result of subtracting tax credits from Colorado tax liability. This later concept of tax liability is used within this report. Net normal tax is defined as zero when credits exceed Colorado tax liability. A slight definitional change of tax credits was used in this year's report. The property tax credit was included this year as the data collection did not separate the property tax credit and heat credit as in past years. The property tax credit was justly considered as a reduction of property taxes in past years and not a reduction of income taxes even though the credit is granted on the income tax return. Colorado tax liability amounted to \$908 million in fiscal year 1986 while net normal tax liability was \$868.5 million.

Section II. IMPACT OF TAX LAW CHANGES

Colorado has implemented a number of tax law changes in the last several years. In the latter part of the 1970's, the state had large surpluses and many tax reduction measures were passed at that time. During the last several years, tax increases were implemented to meet state budgetary problems. These changes will be reviewed in this section.

A. PRIOR TAX LAW CHANGES

In 1978, Colorado became the first state to adopt indexation to minimize the movement into higher tax brackets due to inflation induced higher incomes. Colorado has indexed its taxable income brackets to adjust for such bracket creep. It also indexed the standard deduction and personal exemption levels so that the real value of these amounts would also theoretically be held constant over time. The level of indexation or the annual inflation factor (AIF) is "determined by the general assembly . . . by using the best statistics available, including, but not limited to, the monthly national and Denver area consumer price indexes produced by the bureau of labor statistics of the United States department of labor and the commodity indexes published in 'The Wall Street Journal' by Dow Jones and Company." (CRS 39-22-103.5(2)(a)). In practice, the AIF has been set to accommodate the estimated level of budget balance. Table II-1 shows the levels of the AIF as applied to the three indexed components.

TABLE II-1. LEVELS OF STANDARD DEDUCTION,
PERSONAL EXEMPTION AND RATE BRACKETS

<u>Tax Year</u>	<u>Indexing Factor a/</u>	<u>Standard Deduction</u>	<u>Personal Exemption</u>	<u>Taxable Income Bracket Size</u>	<u>Bracket Range b/</u>
1977 <u>c/</u>	--	\$1,000	\$ 850	\$1,000	\$0-\$10,000
1978	1.06	\$1,060	\$ 901	\$1,060	\$0-\$10,600
1979	1.07	\$1,134	\$ 964	\$1,134	\$0-\$11,342
1980	1.09	\$1,236	\$1,051	\$1,236	\$0-\$12,363
1981	1.08	\$1,335	\$1,135	\$1,335	\$0-\$13,352
1982	1.06	\$1,415	\$1,203	\$1,415	\$0-\$14,153
1983	1.00	\$1,415	\$1,203	\$1,415	\$0-\$14,153
1984 <u>d/</u>	1.00	\$1,420	\$1,200	\$1,420	\$0-\$14,150
1985 <u>d/</u>	1.00	\$1,420	\$1,200	\$1,420	\$0-\$14,150

- a/ Annual indexing factors are presented. Compounded rates are: 1979, 1.1342; 1980, 1.2363; 1981, 1.3352; and 1982 through 1984, 1.4153.
- b/ Taxable incomes above upper limits shown are taxed at the maximum 8 percent rate.
- c/ 1977 was prior to indexation. It is given for comparison purposes.
- d/ The 1984 and 1985 values for the standard deduction, personal exemption, and taxable income bracket size differ from the 1983 values as these amounts are now required to be rounded to the nearest \$10.

Table II-2 shows the impacts of indexation on Colorado tax liability. It has grown from \$18 million in tax year 1978 to \$168.1 million in tax year 1985.

TABLE II-2. IMPACT OF INDEXATION ON
COLORADO INDIVIDUAL INCOME TAX LIABILITY
(Millions of Dollars)

<u>Tax Year</u>	<u>Normal Tax Liability With Indexing</u>	<u>Estimated Normal Tax Liability Without Indexing</u>	<u>Difference</u>
1978	\$438.4	\$ 456.4	\$ 18.0
1979	\$492.7	\$ 532.6	\$ 39.9
1980	\$560.2	\$ 640.7	\$ 80.5
1981	\$602.7	\$ 722.5	\$119.8
1982	\$642.0	\$ 793.1	\$151.1
1983	\$715.2	\$ 873.6	\$158.4
1984	\$876.6	\$1,040.1	\$163.5
1985	\$916.2	\$1,084.3	\$168.1

For the last 3 years, the legislature has set the AIF at zero percent in order to accommodate needed revenues. For 1983 and 1984, the AIF was to automatically be set at six percent unless otherwise specified by the legislature. In 1985, the law was amended to set the "normal" rate of indexation at three percent. The legislative actions to subsequently set the AIF at zero percent represent tax increases above the initially projected tax revenues. The revenue impact of reducing the AIF for the past three years amounted to \$26.7 million, \$28.2 million, and \$13.9 million.

Table II-3 shows the tax reductions by income class attributable to indexation for tax returns filed in fiscal year 1986.

TABLE II-3. TAX REDUCTIONS
ATTRIBUTABLE TO INDEXATION
Fiscal Year 1986
(Thousands of Dollars)

<u>Adjusted Gross Income Classes</u>	<u>Unindexed Gross Normal Tax Liability</u>	<u>Tax Reduction</u>	<u>Percentage Benefit Due To Indexation</u>
Under \$ 5,000	\$ 7,344	\$ 3,226	43.9
\$ 5,000 to \$15,000	94,165	25,493	27.1
\$15,000 to \$25,000	175,147	37,575	21.4
\$25,000 to \$50,000	445,465	70,883	15.9
\$50,000 and over	362,212	30,935	8.5
TOTAL	\$1,084,333	\$168,112	15.5

Indexation is generally more beneficial to lower income taxpayers. They tend to use the standard deduction, which is indexed, as opposed to itemized deductions, and they also get the benefit of the indexed personal exemption and the indexed tax brackets. Also, the value of an indexed personal exemption is worth more to lower income taxpayers as a percentage of taxable income. Indexation has clearly increased the progressivity of Colorado's tax structure.

Tax credits have also played an important role in granting tax relief to Colorado citizens. Some of the tax credits have also been designed to stimulate certain sectors of the economy. Table II-4 shows the impact of these credits for the last 5 years.

e - estimated

The general tax credit was first enacted for the 1979 tax year and was in effect also for the 1980 and 1981 tax years. Applied as a percentage against gross normal tax liability, it returned the largest amounts of tax to taxpayers in years when surpluses were large. The amounts which have been claimed in subsequent years represent the credit claimed on amended and delinquent tax returns.

Colorado's energy credit is patterned after the federal credit. Effective for the 1980 through 1985 tax years, the credit may be taken for taxpayers who made expenditures for energy conservation items (e.g., attic insulation, storm windows, etc.) or renewable energy items (e.g., solar panels). The energy

conservation credit accounted for \$9.5 million in fiscal year 1986. Taxpayers claimed \$16.4 million for the renewable energy credit. These credits were limited to the amount of a taxpayer's tax liability in one year. Since this credit tends to be rather large (a maximum \$3,000 for the renewable energy credit), many taxpayers carry over this credit to future years. Though 1985 is the last year for which expenditures qualify for the credit, an estimated minimum of \$11.3 million will be claimed in future years.

The investment credit allowed on individual income returns is 10% of the federal investment credit on Colorado property, and amounted to \$5.6 million in fiscal year 1986. The Federal Tax Reform Act of 1986 repealed the investment tax credit retroactive to January 1, 1986. Therefore, the Colorado credit has been effectively repealed. Any investment tax credit claimed on subsequent Colorado returns will be the result of an amended or delinquent return for prior tax years, a carryover of unused credit from a prior tax year, or a credit for certain types of qualified property to which the investment credit still applies. (The latter case is expected to be relatively small).

The inventory tax credit was intended to offset the property tax assessed on inventories by local governments. This property tax is no longer in effect. Data presented in Table II-5 for this credit is presented for informational purposes for prior years. This credit did not appear on 1985 tax returns.

The heat credit was designed to offset the high cost of home heating for Colorado elderly and disabled citizens meeting certain income requirements. These taxpayers received \$3.2 million during the past year. Benefits have been declining over the last few years as incomes have risen above the maximum thresholds.

In late 1983, the rate of growth in state revenues had slowed dramatically. The legislature repealed a credit which had been built into the statutory rates since 1963. Repeal of the credit had the effect of increasing the tax rates by 1/2 percent for the first 9 taxable income brackets. As the impacts of the tax rates are cumulative throughout the brackets, the last two taxable income brackets also experience increased taxes. For taxpayers in the highest taxable income bracket (taxable incomes above \$14,150), the increase was \$63.10. The repeal of this credit yielded an additional \$59.5 million in fiscal 1985 and \$60.6 million in fiscal 1986. Table II-6 shows the impact of the increase by major income class for fiscal 1986.

TABLE II-6. IMPACT OF THE REPEAL
OF THE 1/2 PERCENT CREDIT
All Returns
Fiscal Year 1986
(Thousands of Dollars)

<u>Adjusted Gross Income Classes</u>	<u>Number of Taxable Returns</u>	<u>Tax With New Rates</u>	<u>Tax With Old Rates</u>	<u>Average Increase</u>	<u>Average Percentage Increase</u>
Under \$ 5,000	117,627	\$ 4,117	\$ 3,448	\$ 6	19.4
\$ 5,000 to \$15,000	351,530	68,672	59,808	25	14.8
\$15,000 to \$25,000	257,163	137,572	123,925	53	11.0
\$25,000 to \$50,000	346,690	374,582	347,655	78	7.7
\$50,000 and over	114,379	331,277	320,787	92	3.3
TOTAL	1,187,389	\$916,220	\$855,623	\$51	7.1

Average increases range from \$6 in the lowest income class to \$92 in the highest income class. The average percentage increase was greatest in the lowest income class of 19.4 percent and fell to an average 3.3 percent increase in the highest income class. Colorado's tax structure can be considered less progressive than before the temporary repeal of the 1/2 percent credit. Originally scheduled for only 1984 and 1985, the repeal of this credit has since been extended twice and will remain in effect through 1990.

Four other major tax law changes have taken place since 1978. Beginning in 1980, Colorado has exempted from taxation the first \$200 of interest income and \$200 of dividend income per individual (\$400 each for married couples). This measure was intended to increase savings by increasing the net return on savings. This modification reduced Colorado tax liability for taxpayers by \$10.8 million in fiscal year 1986. The impacts of this change and the other three changes detailed below are presented in Table II-7.

TABLE II-7. SUMMARY OF THE FISCAL IMPACT
OF OTHER TAX REDUCTION MEASURES
Fiscal Years 1982-1986

	Fiscal Year				
	1982	1983	1984	1985	1986
Interest/Dividend Exclusion	\$ 2.3	\$ 6.8	\$ 7.7	\$10.9	\$10.8
Optional Itemization	2.4	1.9	6.2	2.0	2.3
Low Income Allowance	6.3	6.3	6.0	7.5	7.6
Personal Exemption	18.7	18.9	19.5	22.7	23.0
TOTAL	\$29.7	\$33.9	\$39.4	\$43.1	\$43.7

Colorado allows its taxpayers to itemize their deductions on the state tax returns even if they did not do so on the federal return. A large difference between the state standard deduction (\$1,420) and the federal zero bracket amount (\$2,390 for single individuals and \$3,540 for married individuals in 1985) prompted this change. This benefit reduced tax liabilities by \$2.3 million in fiscal year 1986. Use of this provision has varied over the years.

Although it is a tax break for Colorado citizens, many taxpayers may not take advantage of this provision as they must file a federal tax return first and determine whether or not itemized deductions may be used on the federal return. The potential loss due to this provision may increase in 1988. The Federal Tax Reform Act raises the federal standard deduction (replacing the zero bracket amount) to \$3,000 for single individuals and \$5,000 for married individuals. In addition, several itemized deductions will be dropped from the current allowable deductions. Estimates of the number of taxpayers who currently itemize on the federal return who will no longer do so range from 1/3 to 1/2. To the extent that taxpayers are aware of the Colorado provision, they will continue to itemize on the Colorado return if the value of their itemized deductions remains above the Colorado standard deduction, currently set at \$1,480 for 1988.

A percentage low income allowance was built into Colorado's standard deduction prior to 1980. This had the impact of limiting the standard deduction for many taxpayers below the \$1,000 maximum (before the annual inflation factor was applied to it). Repeal of the low income allowance gave the maximum standard deduction to all taxpayers using this deduction. Colorado taxpayers benefited by \$7.6 million from this provision.

Colorado's basic personal exemption was raised from \$750 to \$850 beginning in 1978. This provision benefited Colorado taxpayers by \$23.0 million in fiscal year 1986.

a/ Full-year, part-year, and non-resident returns.

b/ In all tables, net normal tax equals gross normal tax (base x rate) less credits.

c/ In all tables, the total may not equal sum of items because of rounding.

a/ The investment credit is net of the investment credit recapture.

b/ Other credits include: new business facilities, commercial energy credit, employed handicapped credit, and the crop and livestock credit.

c/ Total number of returns does not equal sum of components since some taxpayers claimed more than one type of credit.

a/ "Colorado Income" differs from Colorado adjusted gross income due to: 1) Federal adjustments such as IRA payments or business expenses; 2) Colorado modifications such as tax exempt interest; and 3) the treatment of negative Colorado adjusted gross income as zero.

b/ Property income consists of interest, dividends, capital gains, rents, royalties, annuities and pension income, and partnership income.

a/ Full-year and part-year residents residing out of state.

COUNTIES IN MAJOR PLANNING REGIONS

Region 1 - South Platte Valley	Logan, Morgan, Phillips, Sedgwick, Washington, Yuma.
Region 2 - Northern Front Range	Larimer, Weld.
Region 3 - Denver Metropolitan	Adams, Arapahoe, Boulder, Clear Creek, Denver, Douglas, Gilpin, Jefferson.
Region 4 - Pikes Peak	El Paso, Park, Teller.
Region 5 - High Plains	Cheyenne, Elbert, Kit Carson, Lincoln.
Region 6 - Lower Arkansas Valley	Baca, Bent, Crowley, Kiowa, Otero, Prowers.
Region 7 - Spanish Peaks	Huerfano, Law Animas, Pueblo.
Region 8 - San Luis Valley	Alamosa, Conejos, Costilla, Mineral, Rio Grande, Saguache.
Region 9 - San Juan Basin	Archuleta, Dolores, La Plata, Montezuma, San Juan.
Region 10 - Black Canyon	Delta, Gunnison, Hinsdale, Montrose, Ouray, San Miguel.
Region 11 - Plateau	Garfield, Mesa, Moffat, Rio Blanco.
Region 12 - Northern Mountain	Eagle, Grand, Jackson, Pitkin, Routt, Summit.
Region 13 - Upper Arkansas Valley	Chaffee, Custer, Fremont, Lake.
Region 14 - Out of State	Full-year and part-year residents residing out of state.

a/ Includes cities with less than 20,000 population and rural areas.

APPENDIX: DESCRIPTION AND LIMITATIONS OF
STATISTICAL SAMPLE

This study was based on a sample of tax returns filed during fiscal year 1986. Tax returns within the scope of the study consisted primarily of 1985 returns but did contain approximately 1,700 returns from the 1984 tax year.

The study focused on the distribution of income and tax liability by income size and major planning region of the state. Therefore, a stratified random sample was designed consisting of 13 income strata and 15 geographic regions. The 13 income strata have been compressed into the ten income classes presented in the detailed tables of the text. The number of regions include the 13 major planning regions as defined by the Colorado Department of Local Affairs and two additional regions for the purpose of categorizing returns with out-of-state addresses.

Sampling ratios ranged from 1:1 to 1:546. As income levels increase, the sampling rate increases and a tax return is more likely to be included within the sample. The data base in fiscal year 1986 consisted of 18,286 tax returns.

Table A-1 presents the sample size, estimated number of returns in the universe, and the statistical reliability of adjusted gross income and net normal tax by income class. For example, the sampling error (expressed as the standard error of the mean divided by the mean) in the \$20,000 to \$25,000 income class was 53/100 of one percent. The implications of this accuracy level are that there is a 95% probability that the estimated total adjusted gross income of \$2,670 billion in this income class would not differ by more than 1.04 percent in either direction. The 95 percent confidence interval around the sample value would be \$27 million in either direction.

Table A-2 presents the sample size, estimated number of returns in the universe, and the statistical reliability of adjusted gross income and net normal tax for the major planning regions. The same statistical inferences as discussed above may also be applied to this table.

The overall sampling error for adjusted gross income was 28/100 of one percent and for net normal tax was 59/100 of one percent. The 95 percent confidence intervals around the sample values for adjusted gross income and net normal tax are \$170.7 million and \$10.1 million, respectively.

The sample data were carefully controlled with a series of programmed computer checks to eliminate taxpayer and transcriber errors. As a result, it is felt that a complete tabulation of all tax returns would not yield significantly better data.

TABLE A-1. STATISTICAL RELIABILITY OF THE COLORADO INDIVIDUAL INCOME TAX SAMPLE
Fiscal Year 1986
