PREFACE

The purpose of this study is to document the economic significance of the travel industry in Colorado from 1996 to 2013. These findings show the level of travel spending by overnight international and domestic visitors traveling to and through the state and the impact this spending had on the economy in terms of earnings, employment and tax revenue.

This study was prepared for the Colorado Tourism Office by Dean Runyan Associates. Dean Runyan Associates has specialized in research and planning services for the travel, tourism and recreation industry since 1984. With respect to economic impact analysis, the firm developed and currently maintains the Regional Travel Impact Model (RTIM), a proprietary computer model for analyzing travel economic impacts at the state, regional and local level. Dean Runyan Associates also has extensive experience in project feasibility analysis, market evaluation, survey research and travel and tourism planning.

Special thanks are due to the staff at the Colorado Tourism Office for their valuable support and assistance.

EXECUTIVE SUMMARY

This report describes the economic impacts of travel to and through Colorado and each of its sixty-four counties, four tourism regions, and eleven districts. The estimates of the direct impacts associated with traveler spending in Colorado were produced using the Regional Travel Impact Model (RTIM) developed by Dean Runyan Associates.

RECENT TRAVEL TRENDS IN THE COLORADO TRAVEL INDUSTRY

- Total direct travel spending in Colorado during 2013 was over **\$17.3 billion** – direct travel spending directly supported **150,600 jobs** with **earnings of over \$4.7 billion**.
- The Colorado travel industry experienced a 4.9 percent increase in spending from 2012 in current dollars. When adjusted for price changes, the increase in travel spending for Colorado was approximately 4.1%.

Colorado Visitor Spending Adjusted for Inflation, 2000-2013

Source: Dean Runyan Associates, Bureau of Labor Statistics and Rocky Mountain Lodging Report.

- Air travel to Colorado destinations on domestic flights was up 3 percent from the preceding year.
- The Colorado travel industry generated **\$976 million in local and state tax revenues** in the 2013 calendar year – this represents approximately **\$497 of tax revenue per household** in the state.

THE TRAVEL INDUSTRY BENEFITS ALL REGIONS OF COLORADO

While travel and tourism is important throughout the state, about 50 percent of all overnight travel spending occurs in the Denver Metro Region.

I. NATIONAL TRAVEL TRENDS

The national level data in this section focuses on visitor spending trends in current and real dollars, international visitation to the U.S., and trends in travel-generated employment.

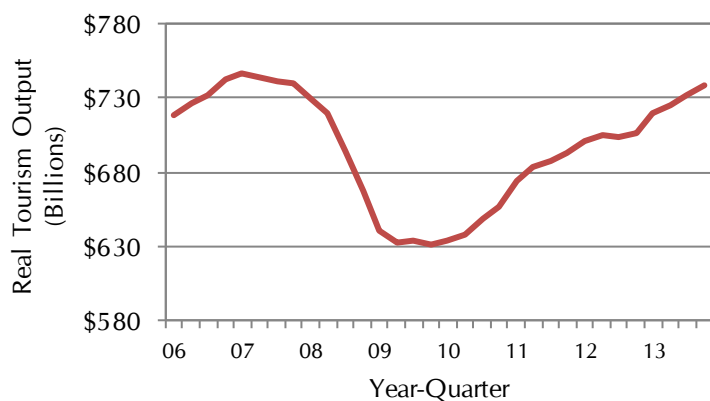

The following two graphs are derived from the Bureau of Economic Analysis Travel and Tourism Satellite Accounts.¹ Both graphs show direct tourism output for the United States – spending by domestic and international visitors.

Annual Direct Travel Spending in U.S., 2000-2013p

Spending by domestic and international visitors was \$900 billion in 2013 in current dollars. This represents a 4.0 percent increase over 2012. When adjusted for changes in prices (real dollars), spending increased by 3.6 percent – compared to a 2.8 percent increase from 2011 to 2012.

Direct Travel Spending in U.S.
2008-Q1 to 2013-Q4
Annualized Seasonally Adjusted in 2005 Dollars

On a seasonally adjusted quarterly basis, real travel spending in the last quarter of 2013 almost attained the previous high recorded in the first quarter of 2007.

Real travel spending has increased at a fairly constant pace over the past three years, with the exception of the last two quarters of 2012.

¹ See <http://www.bea.gov/industry/index.htm#satellite>.

The following three graphs are concerned with international travel to the U.S. The first graph is derived from the Bureau of Economic Analysis Travel and Tourism Satellite Accounts and International Transactions.² The following two graphs are derived from the monthly international arrival data released by the Office of Travel and Tourism Industries.³

International Direct Travel Spending in U.S.

Amounts in Real Dollars (Billions)

International Share of U.S. Internal Travel*

*Airfares for international flights on U.S. air carriers are not included.

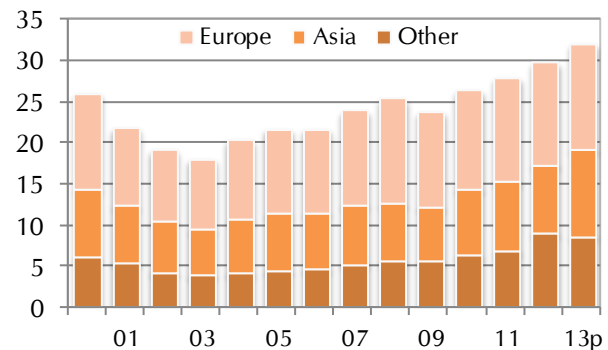

Spending by international visitors in the U.S. increased by 10.0 percent from 2012 to 2013 in real dollars – the fourth consecutive year of growth. This compares to a 2.4 percent rate of growth in real spending by domestic visitors.

(Note: These estimates have been calculated by Dean Runyan Associates.)

The growth and increased share of in international travel spending in the U.S. has been driven by an increase in overseas arrivals over the past four years – an average annual increase of more than 7.5 percent. The 2009-2013p average annual increase for Asian countries has been almost 13 percent.

(Note: December 2013 arrivals estimated by Dean Runyan Associates.)

Overseas Arrivals (Millions)

² See www.bea.gov/international/index.htm for quarterly international estimates of travel and tourism exports (travel to the U.S. by international visitors). Estimates of inflation-adjusted real spending by Dean Runyan Associates.

³ See <http://tinet.ita.doc.gov/research/monthly/index.html>. Annual and 4th quarter 2013 estimates by Dean Runyan Associates.

The following two graphs show quarterly employment trends since 2008 for seasonally adjusted data.* The first graph shows that travel-generated employment was at its lowest level in the first quarter of 2010 and has not yet fully recovered. (Employment is typically a lagging indicator of overall economic activity.) The second graph shows the employment trends of different types of businesses within the travel industry. In general, the leisure and hospitality sector has recovered more fully than transportation, retail and other business in the travel industry. This is in part due to the cyclical patterns of these industry sectors and in part due to structural changes. (For example, air transportation now uses fewer employees to transport an equivalent number of passengers.)

U.S. Travel Industry Employment

Seasonally Adjusted at Annual Rates
2008-Q1 to 2013-Q4

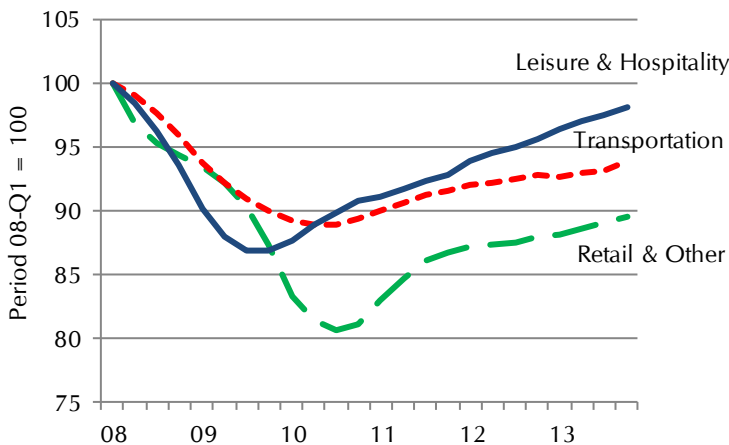

Travel industry employment includes the **leisure and hospitality** sector (arts, entertainment, recreation, accommodations and food services). This represents about two-thirds of all travel industry employment.

Transportation includes all air and ground transportation goods and services, including motor fuel and travel arrangement. This comprises about one-fifth of all travel industry employment. Slightly more than one-tenth of travel industry employment is in **retail and other** businesses.

Components of U.S. Travel Industry Employment

Year-Quarter 2008-1 = 100

II. COLORADO TRAVEL IMPACTS 1996-2013

THE SCOPE OF THE COLORADO TRAVEL INDUSTRY

The multi-billion dollar travel industry in Colorado is an important part of the state and local economies. The industry is represented primarily by businesses in the leisure and hospitality sector, transportation, and retail. The money that visitors spend on various goods and services while in Colorado produces business receipts at these firms, which in turn generate earnings and employment for Colorado residents. In addition, state and local governments collect taxes that are generated from visitor spending. Most of these taxes are imposed on the sale of a goods and services to visitors, thus avoiding a tax burden on local residents.

The focus of this report is on the ***overnight (both domestic and international) and day visitor*** components of the Colorado travel industry from 1996 through 2013. On the following pages are detailed travel spending, employment and earnings estimates, and tax receipts directly generated by overnight and day visitors to and through Colorado. Following this section, detailed travel impact estimates of *overnight* visitors for regions, districts and counties constitute the remainder of this report (impacts of day visitors available only at the state level).

DIRECT IMPACTS OF TRAVEL IN COLORADO: A SUMMARY

- Total direct travel spending in Colorado was approximately \$17.3 billion during 2013.
- Visitors that stayed overnight in commercial lodging (hotels, motels, rented condos, bed & breakfasts) accounted for about 60 percent of all visitor spending.
- Lodging expenses (including campgrounds) accounted for 20 percent of all spending by visitors to Colorado. Motor fuel and ground transportation accounted for 16 percent, and food & beverage services accounted for 22 percent of all visitor spending.
- Direct travel spending in Colorado generated over 150,523 jobs with earnings of \$4.7 billion in 2013.
- Direct travel spending generated \$975 million in local and state taxes (not including property taxes).
- Since 1996, visitor-generated spending has increased at an average annual rate of 4.0 percent, earnings by 3.1 percent, and local and state tax revenues by 5.0 percent and 2.9 percent, respectively.

Colorado Direct Travel Impacts, 1996-2013

	Spending (\$Billion)	Earnings (\$Billion)	Employment (Thousand)	Tax Receipts (\$Million)

96-13	4.0%	3.1%	0.4%	5.0%	2.9%	4.2%

Earnings include payroll, other earned income and proprietor income. Employment includes payroll employees and proprietors.

Annual Percentage Change for 1996-2013 is the average annual percentage change.

COLORADO TRAVEL TRENDS

The first graph, below, shows the trend in travel industry employment from 1996-2013.

Colorado Travel Industry Employment, 1996-2013

Source: Dean Runyan Associates, Inc.

Other indicators of visitor travel trends to Colorado are also shown. These include travel spending adjusted for inflation, taxable sales for lodging establishments and domestic air visitors to Colorado.

Colorado Visitor Spending Adjusted for Inflation, 2000-2013

Source: Dean Runyan Associates, Bureau of Labor Statistics and Rocky Mountain Lodging Report.

Taxable Sales of Lodging Establishments, 1996-2013

Current Dollars

Source: Dean Runyan Associates and Colorado Department of Revenue. Taxable Sales includes room rentals and other sales (e.g., food, entertainment) of lodging establishments. Some taxable room rentals (e.g., condos) not included.

Domestic Visitors to Colorado by Air Transportation, 2000-2013

Source: Dean Runyan Associates and Bureau of Transportation Origin-Destination Survey. This is an estimate of visitation, not the amount of spending in Colorado.

TAX IMPACTS

Approximately one-half of all travel-generated tax receipts accrue to local governments in Colorado. Local taxes include room taxes, sales taxes and auto rental taxes levied by cities, counties and special districts and regions. Property taxes are not included. State taxes include the 2.9 percent state sales tax, the 22 cents per gallon motor fuel tax, and income taxes on travel-generated earnings and travel-related business income.

Travel-Generated Tax Impacts: Local & State Receipts, 2013
(\$Million)

III. REGIONAL OVERNIGHT VISITOR IMPACTS 2002-2013

COLORADO REGIONS

Denver Metro

Adams
Arapahoe
Broomfield
Denver
Douglas
Jefferson

Mountain Resort

Eagle
Grand
Gunnison
La Plata
Montrose
Pitkin
Routt
San Miguel
Summit

Pikes Peak

El Paso
Fremont
Teller

Other

all remaining counties

Travel-generated earnings are distributed roughly 47 percent to the Denver Metro region, one-quarter to the Mountain Resort region, and the remainder to the Pikes Peak region and all other counties. However, the size of travel-generated earnings in relation to total earnings is actually much lower in the Denver Metro region as compared to the Mountain Resort region (as shown in the bar chart).

Appendix C. NAICS Industries

Regional Travel Impact Model

This appendix provides a brief overview of methodology, terminology and limitations of the Regional Travel Impact Model.

Direct Impacts

The estimates of the direct impacts associated with traveler spending in Colorado were produced using the Regional Travel Impact Model (RTIM) developed by Dean Runyan Associates. The input data used to detail the economic impacts of the Colorado travel industry were gathered from various local, state and federal sources.

Travel impacts consist of estimates of travel spending and the employment, earnings and tax receipts generated by this spending. These estimates are also broken out by type of traveler accommodation and by the type of business in which the expenditures occur.

Types of Travel Impacts Included

Most of the travel that occurs in Colorado is included in the scope of this analysis. The purpose of such travel can be for business, pleasure, shopping, to attend meetings, or for personal, medical or educational purposes. All trips to Colorado by U.S. residents and foreign visitors are included. The travel of Colorado residents to other destinations within Colorado is included, provided that it is neither commuting nor other routine travel. Travel to non-Colorado destinations by Colorado residents is not included as a component of visitor spending. Outbound air travel impacts and spending on travel arrangement services are included in the "Other Travel" category.

The impacts associated with both overnight and day travel are included if the travelers remain at the destination overnight or the destination is over 50 miles, one-way, from the traveler's home. These definitions are used to screen and, if necessary, to interpret and adjust local data used for travel impact measurements.

Transportation Impacts

The focus of this analysis is on the destination-specific impacts of visitors. This is straightforward with respect to the spending on commodities such as accommodations, food services, recreation and retail purchases. It is less obvious with respect to ground and air transportation services, in that transportation provides a link between an origin and destination. In this report, the impacts related to spending on transportation are allocated to the location (i.e., county) in which those spending impacts occur, regardless of whether that location is the ultimate destination of the visitor. For this reason, urban counties will tend to have relatively greater transportation impacts even though some of that spending on transportation will be related to visits at other destinations.

Impact Categories

The specific categories of travel impacts included in this analysis are as follows:

Impact Category	Description
Expenditures	Purchases by travelers during their trip, including lodging taxes and other applicable local and state taxes, paid by the traveler at the point of sale.
Earnings	The earnings (wage and salary disbursements, earned benefits and proprietor income) of employees and owners of businesses that receive travel expenditures. Only the earnings attributable to travel expenditures are included; this typically is only a portion of all business receipts.
Employment	Employment associated with the above earnings; this includes both full- and part-time positions of wage and salary workers and proprietors.
Local Tax Receipts	Tax receipts collected by counties and municipalities, as levied on applicable travel-related purchases, including lodging, food and beverage service, retail goods and motor fuel taxes. The local share of the state sales tax is also included in this category. Property taxes are not included.
State Tax Receipts	The state share of the state sales tax, state lodging and motor fuel taxes, auto rental taxes, modified business taxes, entertainment taxes and gaming taxes are included in state tax receipts.

Visitor Categories

Travelers are classified according to the type of accommodation in which they stay. The types of visitors are as follows:

Type of Visitor	Description
Hotel, Motel, B&B	Travelers staying in hotels, motels, resorts, bed & breakfast establishments, and other commercial accommodations, excluding campgrounds, where a transient lodging tax is collected.
Campground	Travelers staying in a privately owned (i.e., commercial) or publicly managed campgrounds.
Private Home	Travelers staying as guests with friends or relatives.
Vacation Home	Travelers using their own vacation home or timeshare and those borrowing or renting a vacation home where a transient lodging tax is not collected.
Day Travel	Both in-state and out-of-state residents whose trip does not include an overnight stay at a destination in Colorado.

Reporting Format

A description of the headings and categories of the detailed direct impact tables is provided below.

- *Total Direct Travel Spending* includes the total visitor spending at destination, described above, plus spending on travel agencies and resident air travel (other spending). Total direct travel spending does not include secondary (indirect and induced) effects.
- *Visitor Spending by Type of Traveler Accommodation* refers to the total direct spending of each category of visitor at that destination (county or state). For example, the spending of visitors that stayed at hotels or motels includes their spending on accommodations, food & beverage service, recreation, transportation and all other visitor related commodities.
- *Visitor Spending by Commodity Purchased* refers to the total spending on each commodity for all types of visitors. For example, the total spending on Food & Beverage Services includes spending by visitors staying in hotels, private campgrounds, private homes and the other types of accommodation. The total spending on commodities is identical to the total spending by type of accommodation.

The next two sections, *Travel-Generated Earnings and Employment by Industry*, provide estimates of travel-generated earnings and employment that are based on an industry, rather than a commodity, classification. A business that is classified in a particular industry may include more than one commodity. For example, a resort that is classified in the accommodation industry may provide accommodations, food and beverages, and recreation.

- *Industry Earnings Generated by Travel Spending* includes the payroll, other earned benefits and proprietor income of all employees in that industry classification.
- *Industry Employment Generated by Travel Spending* includes all full- and part-time employees. This includes payroll employees covered by unemployment insurance and those that are not, as well as proprietors.

The final section provides an estimate of tax receipts generated by travel spending.

- *Tax Revenues Generated by Travel Spending* provides a breakout of local and state tax receipts. The specific taxes are listed on the preceding page.

Interpretation of Impact estimates

Users of this report should be aware of several issues regarding the interpretation of the impact estimates contained herein.

- The employment estimates in this report are estimates of the total number of full- and part-time jobs directly generated by travel spending, rather than the number of individuals employed. Both payroll jobs and self-employment are included in these estimates. Caution should therefore be used in comparing these estimates with other employment data series.
- In general, estimates of small geographic areas (e.g., rural counties) are less reliable than estimates for regions or metropolitan counties. Trend analysis and comparisons of counties with relatively low levels of travel-related economic activity should therefore be interpreted cautiously.
- The estimates of travel impacts published in this report will necessarily differ somewhat from estimates generated from different models, methodologies and data sources. Nonetheless, it should be emphasized that all credible estimates of direct travel impacts at the state level, including those of Dean Runyan Associates, are of similar magnitude.

DEFINITION OF TERMS

Accommodation: Spending for lodging by hotel and motel guests, campers and vacation home users.

Air Transportation: Air passenger spending attributable to travelers in and to Colorado. The spending total includes air travel spending made outside Colorado for travel to Colorado, purchases by Colorado residents who travel outside the state, and air travel within the state.

Campers: Travelers staying at RV parks and commercial campgrounds or at public campgrounds such as those in State or National Parks.

Day Visitor: A traveler whose trip does not include an overnight stay and who travels out of his/her local area (50+ miles one way).

Destination Spending: Spending by travelers at or near their destinations. This excludes spending on air transportation and for travel arrangement. All automobile operating expenses are included in the ground transportation component of destination spending.

Earnings: Total earnings include wage and salary disbursements, other earned benefits and proprietor income. Only the earnings attributable to travel expenditures are included.

Eating, Drinking: Businesses serving food and beverages for immediate consumption. In addition to table service restaurants, this category includes fast-food outlets and refreshment stands.

Employment: Industry employment (jobs) associated with the travel-generated payroll and proprietors. This includes both full- and part-time positions.

Expenditures: Purchases by travelers during their trip, including lodging taxes and other applicable local and state taxes paid by the traveler at the point of sale.

Food Stores: Grocery stores, supermarkets, fruit stands, retail bakeries, and other businesses selling food for consumption off the premises.

Ground Transport: Spending on car rentals, gasoline and other vehicle operating expenses, and on local transportation such as taxi, bus and train.

Hotel and Motel Guests: Travelers staying in hotels, motels, resorts, bed & breakfast establishments, condominiums, and other lodging places where the transient lodging tax is collected.

Local Tax Receipts: Tax revenue collected by counties and municipalities, as levied on applicable travel-related businesses (includes the transient lodging and local sales taxes).

Private Home Guests: Travelers staying as guests with friends or relatives.

Receipts: Travel expenditures less the sales and excise taxes imposed on those expenditures (also referred to as business receipts).

Recreation: Spending on amusement and recreation, such as admissions to tourist attractions.

Retail Sales: Spending for gifts, souvenirs and other items (excludes spending listed separately, such as food stores or recreation).

Spending Distributions: Information from visitor surveys showing how spending by each type of visitor is divided between various business categories.

State Tax Receipts: State sales taxes, personal and business income taxes, motor fuel taxes, and car rental taxes attributable to travel expenditures.

Transient Occupancy Tax: A local tax charged on lodging (also referred to as room tax, transient lodging tax, hotel tax or bed tax).

Travel: A day or overnight trip that is not of a local or commuting nature. Travel may be for business or pleasure purposes.

Travel Arrangement: Spending for fees paid to travel agents and tour operators.

Traveler: A person traveling in the state of Colorado. A traveler may be a Colorado resident or a resident of another state. The terms traveler and visitor have the same meaning in this report.

Vacation Home User: Travelers using their own vacation home or timeshare and those renting a vacation home or privately-owned cabin where transient occupancy tax is not collected.

TRAVEL IMPACT INDUSTRIES MATCHED TO 2007 NAICS

TRAVEL NAICS INDUSTRIES* (code)	Approximate Pct. Travel Employment
