

University of Colorado **Denver** | **Anschutz Medical Campus**

2013 Essential **FACTS** FY 2011-2012

Energizing Futures Revolutionizing Research Fulfilling Promise

The following pages detail the facts and figures that make up the University of Colorado Denver|Anschutz Medical Campus.

These data provide a view of what makes ours a world-class research university. But one has to look further to understand the teaching and learning, the discovery and innovation, and the community, culture, health and wellness that take place within our walls and extend into our communities and beyond. Learn about the university's undergraduate, graduate and professional students, the ground-breaking research and the quality-of-life improvements made for the thousands of patients who visit the university's clinicians each year.

In short, this publication outlines the impact that the University of Colorado Denver|Anschutz Medical Campus makes on local, national and global communities—the impact that is the foundation of the university's mission and inspires faculty, students, administration and staff every day.

UNIVERSITY OF COLORADO ANSCHUTZ MEDICAL CAMPUS

UNIVERSITY OF COLORADO DENVER CAMPUS

Overview of CU Denver and Anschutz Medical Campuses

A Remarkable Research University

The University of Colorado Denver|Anschutz Medical Campus is the state's number one research-funded university, offering comprehensive programs for undergraduate, graduate and health sciences students on two campuses—in downtown Denver and on the Anschutz Medical Campus in Aurora—and in centers and institutes across the state. Faculty and researchers are the foundation of the reputation for discovery and innovation characteristic of the University of Colorado.

Both Campuses

- more than 135 degree programs in 13 schools and colleges (FY 2011-2012)
- collaborative degree programs that prepare graduates to meet tomorrow's challenges
- over \$400 million in sponsored research awards, breaking ground in a number of areas, from advancing cancer treatments to creating more sustainable urban infrastructures and better public schools

- students educated on two campuses, online and in programs and centers across the state of Colorado
- less than 9 percent of total revenues are from state appropriations
- students come from 50 states and 67 countries
- awarded 31% of all graduate degrees in the state, more than any other Colorado institution (as of FY 2011-2012)
- more than 90 centers and institutes extending the reach of teaching and research into the community, covering subjects from entrepreneurship and education policy to medical and health concerns

Denver Campus

- programs with convenient access to businesses, organizations, government offices and cultural venues, yielding hands-on, relevant learning experiences through research and innovation, internships and class projects
- remarkable personal attention with student-faculty ratio of 17:1

- one of Colorado's most diverse campuses—33 percent of Denver Campus undergraduate students are ethnic minority and 32 percent are first-generation to college (fall 2011 end-of-term)
- student housing available adjacent to campus
- opportunity for undergraduates to conduct and receive funding for research projects

Anschutz Medical Campus in Aurora

- highly selective health sciences programs
- an academic health sciences city for the 21st century
- more than 6.5 million gross square feet (projected upon campus completion) for cutting-edge research, education and clinical facilities
- adjacent to University of Colorado Hospital and Children's Hospital Colorado, the University of Colorado School of Medicine's primary adult and pediatric hospital partners
- borders industry partners at Colorado Science + Technology Park at Fitzsimons
- cares for more than 1 million patients a year

History

The origins of the current university began in Boulder in 1883 with the creation of a medical department (two students and two senior faculty). The College of Nursing was established in 1898. The School of Pharmacy was established in 1911. In 1912, the University of Colorado at Boulder created an extension in Denver. In 1972, the University of Colorado at Denver was created, one of three institutions occupying the Auraria Campus in downtown Denver. In 2004, the downtown entity consolidated with the University of Colorado Health Sciences Center to establish the two campus university known today as the University of Colorado Denver|Anschutz Medical Campus.

A Handy Reference Guide

Contained within this guide are the data and details that reveal the depth and breadth of the University of Colorado Denver|Anschutz Medical Campus. The following are some highlights about the university's schools and colleges. For more details, turn to the schools and colleges section.

- The **College of Architecture and Planning** is the only college in Colorado to offer a full range of degrees in architecture and related disciplines, from undergraduate through professional master's to the doctorate
- First in Colorado to create a **College of Arts & Media**, dedicated to programs capitalizing on the intersection of art, technology and business
- Largest **Business School** graduate enrollment in the region, with a diverse undergraduate population, connections to more than 18,000 alumni and major businesses and a new building located in the downtown Denver business district
- Among the country's most selective, a **School of Dental Medicine** with more than 1,400 applicants for 80 positions
- Largest graduate **School of Education & Human Development** in the state with extensive partnerships in urban schools
- A **College of Engineering and Applied Science** that is home to the only bioengineering department in the state
- A **Graduate School** that oversees training in over 70 master's and doctoral programs, including the Medical Scientist Training Program (MSTP)
- A wide spectrum of degrees through the **College of Liberal Arts and Sciences** with eight Fulbright faculty scholars
- Colorado's first **School of Medicine**, which attracts internationally recognized faculty
- A **College of Nursing** with programs consistently ranked in the top 15 in the United States by *U.S. News & World Report*
- The **Skaggs School of Pharmacy and Pharmaceutical Sciences** that is ranked in the top 3 of more than 100 schools nationally for individual grant awards from the National Institutes of Health
- A **School of Public Affairs** that offers a unique program in domestic violence prevention
- The **Colorado School of Public Health**, the first and only in the Rocky Mountain West, a collaborative venture with University of Northern Colorado and Colorado State University

PhD

Design and Planning

College of Architecture and Planning

Dean: *Mark Gelernter, PhD, BArch*

The college offers a new Bachelor of Science in Architecture degree and graduate programs for about 500 students. Programs are accredited by the Landscape Architectural Accreditation Board (LAAB), National Architectural Accrediting Board (NAAB) and Planning Accreditation Board (PAB).

Learning experiences address real issues facing designers and planners as they create healthier, more sustainable, more meaningful environments. In recent years students have built award-winning, solar-powered homes; written new codes to encourage livelier, safer cities; discovered ecological design principles in Colorado ranches; proposed ways for neighborhoods to recover from natural disasters; designed learning landscapes for elementary school playgrounds; and designed and built environmentally sustainable homes in the Navajo Nation.

The college is a leader in providing international study opportunities, with a dual MLA degree with Tongji University in Shanghai; an internship program

sponsored by Gensler Associates to exchange our students and students from Tongji University who study at the host institution and work in the host city's Gensler office; an international urban design studio held each summer in China's Shanghai-Nanjing corridor; and collaborative design studios with Dar Al-Hekma College in Saudi Arabia.

Our award-winning Design-Build Certificate Program takes students to Utah, Guatemala and on local non-profit projects. Students have extensive opportunities for civic engagement through paid internships at the college's Colorado Center for Community Development (CCCD) and Center of Preservation Research (CoPR).

College of Arts & Media

Interim Dean: *Laura Goodwin, PhD*

Nearly 1,200 students in the College of Arts & Media (CAM) are immersed in a challenging, rewarding, supportive and rich learning environment that focuses on the intersection of art, the creative industries, and emerging technology. CAM students change and grow through classes and making art every day as they prepare for lifetimes of influencing and changing society through art. CAM film and theatre students use up-to-date professional equipment and facilities, postproduction laboratories and the Kenneth Kendall King Academic and Performing Arts Center, which houses a 500-seat concert hall, a 300-seat flexible form theatre and a 200-seat recital hall as well as production shops, production studio and a recording studio.

Digital art creation and the convergence of classic and new technologies challenge visual arts students. Program instruction in 3-D animation, digital design, scientific media design and transmedia, as well as painting, drawing, art history, photography and sculpture encourages students to push the limits of emerging and traditional art forms. Music industry studies offer a nontraditional music education that focuses on the entertainment business and creative industries, including popular and commercial performance, music business and

entrepreneurship and recording arts. The MS in recording arts includes study in recording arts and media forensics. Recording arts students are prepared for teaching and applying cutting edge post-production techniques to real world challenges. Media forensics involves authenticating video, audio and visual media. Students use specially-built facilities with recording studios, computer-for-music laboratories and rehearsal rooms for individual artists and ensembles. CAM faculty are distinguished by their commitment to teaching undergraduate students and graduate students. Not only do many have prestigious degrees and academic records, they are noted artists in their fields: regularly publishing, performing and exhibiting their works across the United States and around the globe.

The college benefits from the proximity of the Denver Performing Arts Complex, the Denver Art Museum and a multitude of performance and gallery venues in downtown Denver. Denver's position as center of the Rocky Mountain West provides a launching pad for international study programs abroad and attracts international students.

The Business School has been recognized for excellence with accreditation from the Association to Advance Collegiate Schools of Business (AACSB International) – a distinction less than 5 percent of business schools achieve worldwide. Business School students benefit from a rigorous academic culture and real-world learning opportunities. Flexible schedules, world-class faculty and industry-leading programs make the Business School a top choice for working professionals. Graduates leave with skills and knowledge that prime them for careers of significance.

Specialized resource centers include:

- The J.P. Morgan Center for Commodities is the first center of its kind to provide comprehensive research and education for commodities finance and policy, in areas such as energy, agriculture and minerals.
- The Bard Center for Entrepreneurship teaches aspiring entrepreneurs critical skills for success. Each year the Bard Center Business Plan Competition recognizes the most outstanding plans with more than \$50,000 in cash and in-kind awards.

- The Center for Information Technology facilitates dialogue between academia and IT professionals.
- The Center for Health Administration ensures our programs are relevant in today's health industry.
- The Business School is the region's business resource with these advantages:
- A new state-of-the-art building is located in downtown Denver's Education Corridor. Bringing all the Business School's faculty, staff, centers and programs under one roof creates opportunities to collaborate and build partnerships, programs and leaders of tomorrow.
- The school has developed collaborative relationships with the business community. Advisory board members are active in curriculum development, student projects and networking to keep programs relevant and rigorous
- Programs in Sports and Entertainment Management, Global Energy Management, and Sustainability are collaborative, industry-leading programs that prepare students for careers in key growth areas.
- New Risk Management and Insurance program is the first of its kind in the Rocky Mountain region.

For additional information about this school, please visit business.ucdenver.edu.

- Flexible schedules allow students to complete course work in a traditional classroom, online, or both. The professional MBA, MS in Information Systems, and MS in Management may be completed entirely online.
- The 11-month MBA is an accelerated, full-time format degree program with the same curriculum and outstanding faculty as the traditional MBA program.
- The Executive MBA in Health Administration draws faculty from top schools around the nation that are part of the network for health care management. The Health Administration program is also a member of the Business School Alliance for Healthcare Management (BAHM), which is a prestigious alliance with schools such as Harvard, Duke, and UC Berkeley.
- Institute for International Business – offers global business opportunities.
- The Global Energy Management program offers a unique hybrid online degree designed in collaboration with the energy sector.
- Health Administration program ranked as one of the top 25 Health Care Management programs U.S. News & World Report in 2007.
- World-class faculty with degrees from prominent universities bring case-study opportunities, powerful business relationships, and knowledgeable insight to the classroom.
- Largest accredited Business School in Colorado.

MS

Dentistry

Orthodontics

Periodontics

DDS

Doctor of Dental Surgery

School of Dental Medicine

Dean: *Denise Kassebaum, DDS, MS*

This research-intensive, comprehensive dental school increases access to innovative education programs, life-improving research and excellent clinical care programs that enhance oral and systemic health. The School of Dental Medicine (SDM) is home to a DDS program, an international dental program, a general practice residency and advanced dental education (residency) programs in periodontics and orthodontics in which enrollees may obtain postdoctoral master's degrees.

The SDM's DDS program is one of the most selective in the United States, with nearly 1,500 applicants annually for 80 positions in the DDS program and more than 500 applicants for the international student program, which annually accepts 40 students. Its education programs are evidence-based, interprofessional and teach students to treat patients of all ages as members of a health care team. The school's collaborative research programs have focus areas in cancer biology, craniofacial developmental biology and dental materials and bioengineering. The dental scientists collaborate with the CU Cancer Center, the CU School of Medicine and the CU Boulder College of Engineering on funded research projects. In FY 2010-2011, the school ranked 24 out of

49 dental schools in National Institute of Dental and Craniofacial Research (NIDCR) funding. Dental medicine faculty's collaborative research with other university faculty ranks CU Denver 11th for NIDCR funding.

The SDM has a long commitment to increasing access to care for disadvantaged populations. Its community-based education program serves as a national model for service learning in dental education. Students provide care in clinics around the state as well as on the school's Mobile Dental Clinic. Students are also able to participate in rural and global health tracks.

The educational programs of the SDM are nationally recognized for their quality and are fully accredited by the American Dental Association.

For additional information about this school, please visit ucdenver.edu/dentalmedicine.

Colorado's largest graduate school of education serves more than 2,000 degree/licensure students annually, with another 6,400 in continuing education options. The school prepares and inspires education and mental health leaders to have a profound impact in fostering student opportunity, achievement and success in urban and diverse communities. Areas of study include programs for new teachers, experienced teachers, school administrators, counselors, school psychologists, school librarians, as well as technology and research professionals.

The school has 48 full-time faculty members along with 100 part-time faculty who teach undergraduate, graduate and doctoral-level courses. Faculty members are backed by \$26 million in faculty and research and professional development grants. Faculty research focuses on issues of diversity and equity in education, STEM (science, technology, engineering, and math) education, assessment in education, literacy, and counseling in urban schools and communities. Centers within the school sponsor research and policy studies, engage in model demonstration and product development, conduct longitudinal studies, provide continuing education and training to people across the country and collaborate with professional organizations and local communities.

The school's urban community teacher education program answers the call from metro Denver districts for new teachers who can ensure K-12 student success in increasingly diverse classrooms. The program is a national model for teacher preparation, taking place in a citywide laboratory in which faculty and teacher candidates partner with professional development schools, community agencies and educational organizations to address challenges by building on the assets of urban community knowledge. The school has an extensive network of alumni who are leaders in the surrounding Denver metro area school districts and counseling offices.

The school is accredited by the Colorado Department of Education, the Colorado Department of Higher Education, the National Council for Accreditation of Teacher Education, the Council for Accreditation of Counseling and Related Educational Programs, and the National Association of School Psychologists.

The College of Engineering and Applied Science provides education for both undergraduate and graduate students, enrolling more than 600 undergraduates and more than 400 graduate students. The majority of students join Colorado industries when they graduate. Many students are already working in local businesses while pursuing their education. The college's mission is to help students succeed in the workplace and build their professional careers by providing an accessible education. The undergraduate programs in civil, electrical and mechanical engineering and in computer science and engineering are accredited by the American Board of Engineering and Technology (ABET). The undergraduate program in bioengineering will apply for ABET accreditation once it is established.

Students choose their specialization from five disciplines: bioengineering, civil engineering, computer science and engineering, electrical engineering and mechanical engineering. The college emphasizes integrating foundational knowledge and skills with real-world application. Through hands-on experience, students develop their capabilities in problem solving, research and teamwork. Students have many opportunities to learn skills such as measuring particles in water, modeling traffic patterns, assessing bridges and roads, developing

computer animation and simulation programs, engineering communication and computer networks and measuring at nanoscale using an atomic force microscope. Bioengineering students apply engineering principles and techniques to medical and biological fields, providing improvements in people's lives through devices such as artificial hands and heart valves and techniques such as medical imaging for diagnostics.

Nearly 200 international students seeking various engineering degrees are currently enrolled and as a result, students experience multicultural aspects of engineering and technology.

College alumni are an important part of many Colorado industrial sectors, including transportation, energy and power, construction, fluid mechanics, aerospace, computer graphics, hydrology, bioengineering, communications, computer networks, structural and earthquake engineering, biophotonics, geographic information systems, manufacturing, sustainability, concrete materials, tribology, instrumentation and control systems, and environmental engineering. Additionally, a number of graduates have gone on to other career paths such as law, education and medicine.

The university's graduate school encompasses programs on both the Denver and Anschutz Medical Campuses.

At the graduate school on the Anschutz Medical Campus, students learn to expand the frontiers of human health and disease in more than a dozen basic science, analytical, clinical and nursing disciplines. The school's emphasis on pairing a student with a mentor assures a distinctive learning experience. Graduate study is a historic strength of the Denver Campus where graduate programs are offered in seven schools and colleges, serving more than a thousand working students.

The constituent academic units of the CU Denver Graduate School currently include the noted degree-granting programs. The Graduate School also oversees the Postdoctoral Office, which supports the career development of approximately 300 postdoctoral fellows who currently train on the Denver Campus and the Anschutz Medical Campus. The Postdoctoral Office has earned high praise, both locally and nationally, and is regularly ranked among the top places for postdoctoral studies by *The Scientist*.

College of Liberal Arts and Sciences

Dean: *Daniel J. Howard, PhD, MPhil, BS*

The College of Liberal Arts and Sciences (CLAS) attracts top-notch faculty to instruct the pioneers, thinkers and innovators of the future. The true value of a liberal arts education is not that it provides better employment opportunities, the true value is that it leads to a better life in general. It is an education that teaches students to think critically, communicate effectively, evaluate quantitative data, see connections among different areas of knowledge, solve complex problems, and appreciate and understand diversity. It produces a mind that can learn throughout a lifetime, appreciate the natural world and technological innovations, think through the issues that confront democracies, and provide leadership in the community and the workplace.

In addition to being the largest college at CU Denver, and the backbone of general education, almost half of all CU Denver students major in one of the over 40 programs CLAS offers at the bachelors, masters, and doctoral levels. Our community of over 6,800 learners (over 6,200 undergraduate and almost 600 graduate) includes both traditional and nontraditional students. CLAS faculty is world class and dedicated, not only to scholarship, but to students. Moreover, the setting is spectacular, employment and internship opportunities are abundant, and the price remains within reach of most families.

Did you know?

- CLAS has the most comprehensive health careers advising program in the state, and the only BA/BS-MD program in Colorado--where accepted high school seniors are reserved a spot at the University of Colorado Medical School.
- Students can earn a University of Colorado degree while studying in our program at the International College of Beijing, in the People's Republic of China.
- Our recently launched interdisciplinary minor in Health Humanities explores health and medicine in their wider social and cultural contexts. This program will draw on the excellent humanities resources in CLAS and partner with the Center for Bioethics and Humanities on the Anschutz Medical Campus.
- History Day in Colorado, a national program recognized by President Obama in 2012, is sponsored by CLAS and brings hundreds of middle and high school students to campus in the spring for the state contest, which evaluates their analytical and creative skills.

School of Medicine

Dean: *Richard Krugman, MD*

With more than 900 doctor of medicine, physician assistant and doctor of physical therapy students, the School of Medicine (SOM) offers programs that are nationally and internationally known for their excellence in education, research, patient care and community service. The school's MD program is accredited by the Liaison Committee on Medical Education (LCME).

Medical students collectively donate thousands of hours of community service every year, volunteering at free clinics for the homeless and poor. The Colorado Rural Health Scholars Program attracts high school juniors from across the state for a three-week, on campus experience that inspires many to pursue medical careers.

School of Medicine faculty provide patient care at some of the nation's top-rated teaching hospitals in the Denver / Aurora metropolitan area including:

- National Jewish Health—ranked 1st in respiratory care for the 15th year in a row;
- Children's Hospital Colorado—in the top 10 for more than a decade;
- University of Colorado Hospital—for the second consecutive year was named the highest-performing academic hospital in the United States for delivering

quality and was ranked 1st in respiratory care, a shared position with National Jewish Health;

- Denver Health Medical Center—one of the country's most successful indigent care facilities.

School of Medicine faculty rank 7th among public medical schools in the country for federal research grants and contracts and 24th in federal research funding among private and public schools, according to the Association of American Medical Colleges. Four faculty are members of the National Academy of Sciences and 15 are in the Institute of Medicine.

Internationally recognized faculty offer exceptional clinical care, excelling in treatment of cancer, diabetes, heart disease and in surgery. World-renowned researchers contribute to the understanding of an array of health conditions, including spinal cord injuries, Parkinson's disease and Alzheimer's disease. *U.S. News & World Report* (2012) ranks the following School of Medicine specialties:

Primary care - #5

Rural Medicine #7

Pediatrics - #5

CHA/Physician Assistant Program - #11

Family Medicine - #3

Physical Therapy #34

College of Nursing

Dean: *Sarah A. Thompson, PhD, RN, FAAN*

The College of Nursing enrolls over 900 undergraduate and graduate students. Founded in 1898, the college began Colorado's first baccalaureate program and has offered graduate education since 1950. The college has implemented a revised undergraduate curriculum that addresses the Institute of Medicine's and the Robert Wood Johnson Foundation's Quality and Safety in Nursing Education core competencies for creating nurses who are sentinels of patient safety.

In response to the Institute of Medicine's *Future of Nursing* goal to increase the number of baccalaureate prepared nurses, the college has revised its RN to BSN program to be a state-of-the-art, online program. In addition, the college continues a very successful partnership with the Community College of Aurora (CCA) that increases access for community college students to the college's undergraduate program.

As the birthplace of nurse practitioner education, the college has a long history in faculty practice and directs Sheridan Health Services, an interprofessional, federally qualified health center, providing care to diverse patients from low income communities and providing educational experiences to health professions students from the Anschutz Medical Campus. The college features

Long Term Care Management

For additional information about this college, please visit nursing.ucdenver.edu.

active faculty practices at more than 12 primary care, acute care, case management, consultative and nurse midwifery sites throughout Colorado.

The master's program educates advanced practice nurses, specialists in health care informatics and nursing leadership and health systems. Students may also obtain graduate-level post-master's certificates in most specialty areas. The college's master of science program is ranked nationally in the top 15 by *U.S. News & World Report*. Other 2012 rankings include: the Pediatric Nurse Practitioner #5, the Nurse Midwifery #13, and the Family Nurse Practitioner #16.

The Doctor of Nursing Practice (DNP) program educates nurses for the highest level of nursing practice and is the terminal clinical degree in nursing. Graduates are clinical leaders who design models of health care delivery, evaluate clinical outcomes, identify and manage health care needs of populations and use technology and information to transform health care systems.

The newly revised research doctoral program (PhD) uses innovative, distance-accessible curriculum to educate nurse scientists who will lead research in health care systems and bio behavioral science. The college is fully accredited by the Commission on Collegiate Nursing Education. The nurse midwifery master's specialty is further accredited by the American College of Nurse-Midwives, Division of Accreditation.

PharmD

Pharmacy

Degrees offered through the

Graduate School:

PhD

Pharmaceutical Sciences

Toxicology

Skaggs School of Pharmacy and Pharmaceutical Sciences

Dean: *Ralph J. Altieri, PhD*

With more than 900 doctor of pharmacy and graduate students, the Skaggs School of Pharmacy and Pharmaceutical Sciences is preparing the world's future pharmacists and pharmaceutical scientists through innovative learning and teaching. As experts in medicines and their therapeutic use, students and faculty are caring for patients, optimizing medication outcomes, and helping patients live longer and better with chronic illness such as heart disease and diabetes. The collaborations in research, patient care and community service are helping make health care safer.

Faculty members conduct pioneering basic, translational and clinical research in a variety of scientific fields such as pharmaceutical biotechnology and biophysics, medicinal chemistry and drug discovery, pharmacokinetics, pharmacogenomics, molecular toxicology, clinical therapeutics and health outcomes.

The school is improving the stability of medicines to reduce deadly reactions and ensure product safety and effectiveness. Students are vaccinating thousands against influenza and pneumonia, while faculty members discover new ways to deliver and transport vaccines to developing nations.

Faculty members serve as experts at the University of Colorado Hospital, University of Colorado Cancer Center, Denver Health Medical Center and clinics for underserved populations. Pharmacy postgraduate training opportunities include residencies accredited by the American Society of Health-System Pharmacists in general pharmacy practice, community pharmacy ambulatory care-family medicine, critical care and oncology and fellowship programs in critical care/infectious diseases, neurology, and oncology.

Students donate hundreds of hours of community service and provide thousands of dollars of care annually by organizing and volunteering at local and statewide health fairs.

Celebrating 100 years of education, patient care and scientific discovery, the school is one of the top-ranked pharmacy schools in the country:

- *Top 20 percent among 125 U.S. pharmacy schools (U.S. News & World Report)*
- *#2 school in the nation for the number of PharmD faculty with NIH funding according to the American Association of Colleges of Pharmacy (AACP)*
- *#3 in the nation for individual awards per PhD faculty member (AACP)*
- *#14 in the nation for NIH funding among pharmacy schools*
- *Second largest doctor of pharmacy program in the country for working practitioners*

The only donor-named school on the Anschutz Medical Campus, the Skaggs School of Pharmacy and Pharmaceutical Sciences is fully accredited by the Accreditation Council for Pharmacy Education (ACPE).

School of Public Affairs

Dean: *Paul Teske, PhD, MPA, BA*

The School of Public Affairs (SPA), celebrating its 40th anniversary this year, is proud to educate the next generation of leaders in the nonprofit, government, and criminal justice sectors. Nearly 700 students are enrolled in SPA degree programs on the Denver Campus. Thousands of SPA alumni are serving the public in leadership and public policy roles in Colorado and throughout the country, in areas as diverse as local government management, education policy, domestic violence services, federal emergency management, and criminal justice research and analysis.

The School of Public Affairs offers a master's degree in public administration, a master's degree in criminal justice, a bachelor's degree in criminal justice, and a PhD in public affairs. The master's degree in public administration is ranked among the top 30 programs in the country, and can be earned through accelerated, executive, or online options in addition to regularly scheduled courses designed to meet the needs of working adults. SPA degree programs combine foundational knowledge and skills with multiple opportunities to apply this knowledge to real-world organizations and issues facing society.

For additional information about this school, please visit spa.ucdenver.edu.

SPA faculty members are internationally recognized for their scholarship in the fields of public affairs and criminology. Three faculty members are University of Colorado Distinguished Professors, and two are fellows of the prestigious National Academy of Public Administration. SPA faculty are engaged in research in areas as diverse as hydraulic fracturing, watershed management, environmental crime, collaborative governance and systems science, human resource practice in nonprofit organizations, and local government finance. In addition, SPA courses regularly engage prominent practitioners from the Denver metro area to provide students with lessons from the field and entry into professional networks.

The Buechner Institute for Governance, named after former CU president and SPA faculty member John Buechner, provides opportunities for faculty, research staff, and students to use their expertise to benefit the larger community. The Buechner Institute hosts events and forums, publishes research and evaluation results, and provides technical assistance to policy makers to improve the quality of public decision-making on the important issues of our day. It also operates the Rocky Mountain Leadership Program, the Denver Community Leadership Forum, and the only Certified Public Manager program authorized in Colorado.

Colorado School of Public Health

Interim Dean: *David C. Goff, Jr., MD, PhD*

The Colorado School of Public Health (CSPH) was collaboratively formed by the University of Colorado, Colorado State University and the University of Northern Colorado. CSPH is the first school of its kind in the Rocky Mountain West and the only collaborative school of public health west of the Mississippi River. CSPH attracts top tier faculty and students from across the country and provides a vital contribution toward ensuring the region's health and well-being.

CSPH enrolls over 500 graduate students in 15 public health academic and professional programs. Educational programs expose students to challenging curricula, practical methods and innovative instruction. Outside the classroom, CSPH students work with faculty in national and international settings to integrate service learning and translate research to improve the health of people and their communities. After graduating, CSPH alumni join the growing field of health professionals trained in Colorado and placed throughout the world. Alumni include published authors, international malaria and HIV/AIDS researchers, health agency administrators and faculty at leading medical campuses across the United States.

Faculty at CSPH are nationally recognized experts in a variety of fields, including: biostatistics and clinical trials; diabetes prevention and control; injury

control; genetic epidemiology; risk assessment; environmental health; maternal and child health; nutrition in schools; health services research; health equity; health education; and many other health-related specialties.

CSPH is also home to several local and national centers including:

- *Centers for American Indian and Alaska Native Health*
- *Center for Global Health*
- *Center for Public Health Practice*
- *Colorado Injury Control Research Center (CSU)*
- *High Plains Intermountain Center for Aquaculture Health and Safety (CSU)*
- *Latino/a Research & Policy Center*
- *Mountain & Plains Education & Research Center, funded by the National Institute of Occupational Health & Safety*
- *Rocky Mountain Prevention Research Center, funded by the Centers for Disease Control & Prevention*

Working collaboratively with Colorado's academic institutions, future professionals and leading researchers, CSPH is another example of Colorado's continued commitment to ensuring that all people and communities are healthy and their environment sustainable.

Student Diversity

The University of Colorado Denver | Anschutz Medical Campus continues to make diversity and inclusion a core priority. The residential facility, Campus Village Apartments, has further attracted diverse students to the Denver Campus. The programs in the health sciences at the Anschutz Medical Campus maintain strong enrollment of students of color and several new initiatives have been implemented to augment these successes.

The proportion of undergraduate students of color at the University of Colorado Denver | Anschutz Medical Campus was 32.2 percent for Fall 2011. The percentage of first professional students of color at the Anschutz Medical Campus was 24.6 percent for Fall 2011, the highest it has been since 2004.

In Fall 2011, the Denver Campus enrolled 3,086 first generation undergraduate students. During that same semester, Pell recipients made up 35 percent of the Denver Campus undergraduate enrollment. International students accounted for 5.8 percent of the University of Colorado Denver | Anschutz Medical Campus student population.

Total \$1.4 Billion

University of Colorado Denver | Anschutz Medical Campus

FY 2011-2012 Sources of Revenue

University of Colorado Denver | Anschutz Medical Campuses Contribution to Colorado Economy Fiscal Year 2009-2010

Impact on State Employment

Faculty, residents, staff and student workers on both the Denver Campus and Anschutz Medical Campus (including the affiliated University Physicians, Inc.) totalled 10,298 jobs in FY 2009-2010.

Institutional purchases of goods and services, research subcontracts with Colorado firms, and consumer spending by faculty, staff and students *indirectly* supported as many as 13,824 jobs in Colorado.

Institutional and student spending *directly* and *indirectly* supported over 24,000 jobs in Colorado in fiscal year 2009-2010.

University of Colorado Denver | Anschutz Medical Campus

University of Colorado Denver | Anschutz Medical Campuses Contribution to Colorado Economy Fiscal Year 2009-2010

Impacts on State Personal Income

University operations and student spending supported nearly \$1.43 billion in state personal income in FY 2010.

More than \$849 million of the total represented the direct payroll of university faculty, medical residents, staff, student workers and University Physicians, Inc. \$580 million in additional earnings was realized as a result of the indirect and induced effects of direct payroll and student spending.

Due to the concentration of direct jobs in health care and higher education, the average income for jobs supported by the university was more than \$59,000 in FY 2010.
