Youth Corrections (DYC)

Private & Local Organizations

Federal Correctional Institutions

*And much, much more!*

---

**What we Do:**

The Federal Randolph-Sheppard Act has resulted in vast national intellectual and tangible resource groups which contribute our State agency's ability to run at the speed of business. The Colorado Business Enterprise Program (BEP) manages services in over 150 unique facilities and partners with an ever growing number of truly skilled, creative, and driven blind entrepreneurs.

Our food services range from convenience stores, large and small cafeterias, military dining halls, snack bars, and many types of vending machines and concessions on Federal and State properties. We even provide excellent services to local governments and the private sector, where there is no mandate for priority at all.

**Concessions \* Vending \* Food Services & Catering \* Gift Shops \* Sundries**  
**OTC Drugs \* Laundry \* Landscape Maintenance \* Janitorial**

For over 6 years, BEP has successfully ventured outside of our exclusive priority again, bringing exceptional service to two regions of the Colorado Department of Transportation through full-scale, professional office and rest area commercial landscape as well as superior janitorial services.

"... must say, I have been impressed thus far with how your team has brought the... iCafe back to life!"

~ Private Sector Cafeteria Customer, Chris A.

"...this act of kindness should be recognized and wanted to let you know you have an employee going above and beyond for the public."

~ Rest Stop Customer, Brian P.

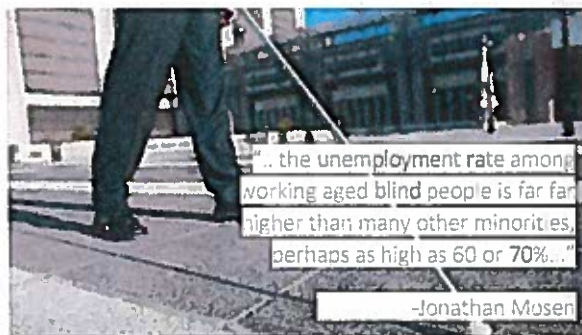

## What we Want to Do:

Our current successes showcase our ability to not only exceed expectations within our traditional priority, but we **are the experts who know** how to get the job done. The BEP team seizes new opportunities through appropriate evaluation, solution development, thoughtful partnerships, and careful execution. Our streamlined, one-stop shopping approach alleviates risks from our customers and frees up busy professionals to manage tasks more critical and direct to their particular mission. Leave the heavy lifting to BEP on some ancillary matters.

For contracts managers, this is a dream come true. Imagine; one point of contact for communications about vending and other food services, laundry, grounds maintenance, janitorial, or anything you may want to consolidate! We manage performance measures, we carry the risk.

Currently, BEP has the resources to manage all vending operations, without negatively impacting any revenue stream associated with the venue. In fact, we have been able to bring higher commissions in many cases, through more automated, honest, and accurate reporting. BEP is committed to providing the highest level of Customer Service to you, our valued client.

Colorado BEP currently has the ability to bring any of our services to you and we would love to discuss the resolution of any immediate needs, as well as map out opportunities with you, to create win-win solutions over a period of 5-10 years. This approach will give you the confidence in observing milestone performance measures being exceeded prior to additional growth. We will listen to your needs and wants and escort you through each step of the way.

## What you Need:

As far as services offered and needs we can manage for you, there are just too many possibilities to list here.

BEP manages a great deal of contracts, permits, and other types of agreements. Not only do we understand the ins and outs of foodservice, not only do we understand laundry, not only do we understand customer service, but we understand **business**. We invite you to ask yourself, "Which contracts for services do I manage, which I would simply rather not? Which contracts for services do I manage which are consistently a challenge to attain satisfactory, much less excellent performance? Which contracts for services could I outsource in order to most optimize my time and efforts?"

There is so much potential here. Please share with us - What can BEP do for you? Is there a specific niche we can accommodate or help to fill?

At the Business Enterprise Program, we have access to a team of great minds and entrepreneurs. We are solution-finders. We are here to help connect skilled blind entrepreneurs with busy professionals who need a break.

**Let us be your solution.**
