A REPORT ON CAREER EDUCATION

PREPARED FOR

THE GENERAL ASSEMBLY

STATE OF COLORADO

1978 - 1979

In 1975, the General Assembly passed the Career Education Act (22-8-101 to 108 C.R.S., amended in 1976). This is a report of the status of various components of the Act after four and one-half years of program operation.

You will find that the attached Evaluation Report provides detailed information about recent accomplishments under that Act.

Briefly, the following are some of the major accomplishments described further in the report.

1. All duties prescribed for the State Board of Education and Executive Committee by the Career Education Act and its rules and regulations have been performed (re: p. 5).
2. The State Team comprised of key members of cooperating state agencies has served as a review team for the State Plan and for guidelines for Career Education (re: p. 5).
3. Over 85 percent of Colorado school districts have received direct or indirect support through state project funds for planning and implementing Career Education (re: p. 6).
4. The State Career Education Resource Center distributed 8,887 instructional items to school districts and other non-profit agencies during 1978-79, and its services have been used by more than 90 percent of Colorado school districts (re: p. 7).
5. The State Resource Center established and currently operates a statewide computerized community resource bank that provides to schools and other non-profit agencies information about available field trips, classroom speakers, and industry-based internships (re: p. 7).
6. A State Career Education Resource Team has been maintained to provide technical assistance to local education agencies, community colleges and universities (re: p. 12).
7. Cooperation among business, industry, and education has been enhanced in local communities and at the state level through efforts of the State Advisory Council for Career Education (re: p. 10).

ABSTRACT

COLORADO DEPARTMENT OF EDUCATION CAREER EDUCATION IN COLORADO

JANUARY, 1980

INTRODUCTION

"Career Education: means a systematic, comprehensive, and continual learning process from kindergarten through post high school levels designed to assist each individual assess rewarding career choices.

"Career Education Concept" means the utilization of classroom curricula and community resources to provide students with a continual learning process that involves awareness, exploration, and pursuit of life roles and careers. Career Education might be defined as "life preparation."

Although the responsibility for the administration of the Career Education Act lies with the State Board of Education, its guidance lies with three state agencies; the Department of Education, the State Board for Community Colleges and Occupational Education, and the Commission on Higher Education. This collaboration has improved delivery services to local school districts and communities.

The Career Education Act and its regulations provide for four operations:

- The utilization of advice from a State Advisory Council appointed by the Governor.
- Services to LEAs by a State Resource Center
- Technical assistance to LEAs, community colleges, and other institutions of higher education.
- Project funds for school districts and community colleges.

THE STATE ADVISORY COUNCIL, as established by law, is represented by 23 individuals from business and education. This council has carried out its mission on promoting and assisting local advisory councils, as well as being a major factor in the developing of the partnership between business and education.

During the past year, 34 persons were trained as regional facilitators to assist local communities and schools in developing and implementing cooperative school/community activities. A system for implementing regional-based assistance has been developed for statewide application.

LOCAL PROJECT FUNDS in the amount of \$200,000 were distributed to local education agencies for planning or implementation projects for 1979-80. Since 1975, grants in the amount of \$942,929 have been made to eligible LEAs from State funds. These grants have been matched (and exceeded) by local contributions. Over 85 percent of school districts and communities in Colorado have benefited from these project funds.

In order to improve practices in judging competitive proposals, the State Staff and Advisory Council required all applicants to make oral presentations of their proposals. This change resulted in shorter written proposals, improved explanations of proposal ideas, and reduction of unfair advantages related to grant-writing skills.

The evaluation of the operations supporting the Career Education Act reveals that: (a) the State Advisory Council for Career Education assisted

the State Staff in the evaluation of proposals; reducing paperwork for applicant LEAs; and obtaining pertinent information about proposal projects through oral presentations to an evaluation committee. The Council was instrumental in allocating funds for the support of business and education collaboration at local and state levels. (b) The State Career Education Resource Center provided educational materials during 1978-79 to 115 school districts and 110 other agencies or institutions. Ninety-five percent of the users rated materials as excellent or good. The Center also developed and operated a Community Resource Bank, and the teachers or administrators rated services by resources as 93 percent excellent or good and only 3 percent as poor. (c) The Career Education Resource Teams responded to 48 requests for assistance from LEAs. (Regionally-based requests were not recorded.) The Staff from the State Career Education Office and Resource Center conducted over 100 workshops or inservices. (d) The response to oral presentations of project proposals was positive with 91 percent of applicants stating that the process allowed for "adequate input to the readers" and was fair and equitable.

ANNUAL REPORT

COLORADO CAREER EDUCATION ACT

I. DEFINITIONS (SECTION 22-8-103)

Utilizing those terms as defined in the Career Education Act, "Career Education" means a systematic, comprehensive, and continual learning process from kindergarten through post high school designed to assist each individual to assess rewarding career choices.

"Career Education Concept" means the utilization of classroom curricula and community resources to provide students with a continual learning process that involves awareness, exploration, pursuit of, and preparation for, life roles and careers.

"State Board" means the State Board of Education.

These terms as defined within the law have been incorporated in the Rules and Regulations of the Act, as well as the guidelines for funding local proposal plans.

II. EXECUTIVE COMMITTEE (SECTION 22-8-104)

As required by law, an Executive Committee has been created and has been operational since July 1, 1975. Serving on the Executive Committee 1978-79 were: Dr. Calvin M. Frazier, Commissioner of Education; Dr. Lee Kerschner, Executive Director of the Colorado Commission on Higher Education; Dr. Terrence Tollefson, Director of Community Colleges;

Dr. James Wilson, Director of Occupational Education of the State Board for Community Colleges and Occupational Education; and Dr. Dan Jendral, Career Education Specialist, Harrison School District.

The Executive Committee met periodically to address specific areas as designated in the Act and to review the progress of career education activities in the State.

III. STATE BOARD OF EDUCATION (SECTION 22-8-105)

The State Board of Education has been actively involved in carrying out its responsibilities under the Career Education Act. During the past year the State Board has dealt with the following:

- A. Adopted the guidelines for the implementation of the flow-through grants;
- B. Reviewed and approved the State Plan for Career Education for 1979-80;
- C. Reviewed and approved the school districts, BOCS, and junior and community colleges proposals that were recommended for funding in 1979-80;
- D. Reviewed and accepted the evaluation completed on Career Education for the preceeding year.

IV. STATE TEAM

The State Team is made up of Ms. Janice Cromwell, Occupational Education; Dr. Greg Adkins, Junior/Community Colleges; Dr. Timothy Grieder, Higher Education; and Douglas C. Johnson, Colorado Department of Education. The team met to discuss current issues concerning career education, including:

- A. Review and recommendation of the State Plan for Career Education
- B. Review and recommendation of the guidelines for project funding in 1979-80.
- C. Participation in Advisory Council meetings

V. PROGRAM FUNCTIONS

FLOW-THROUGH MONIES

Thirty-five proposals were submitted to the Career Education Office for consideration for funding in 1979-80. A total of \$282,958 was requested. Thirty-one proposals were recommended for funding in the total amount of \$200,000 by the Advisory Council and the Executive Committee and approved by the Board (see attachments). Local Education agencies matched state project funds by budgeting over \$450,000 in local funds for career education. All proposal were read by a team of out-side evaluators who had career education expertise and no vested interest in the funding of the proposals. All applicants were requested to make oral presentations about their proposals to the evaluation committee.

The goal of a planning grant is to develop a comprehensive long-range plan in career education for the applying district and have it approved by a local governing board, such as a school board or board of directors.

An implementation grant is made to assist a school district in achieving a specific part of their long-range plan, such as in-service for teachers, development of career education materials, writing curriculum units, etc.

Since the program began in 1975:

- 124 project have been funded
- 59 school districts have directly received state funds for career education

- 96 school districts have indirectly received state funds for career education through BOCS projects.
- 4 community colleges have directly received state funds for career education.
- 159 school districts and community colleges have received direct or indirect support from state funds for career education.

STATE RESOURCE CENTER

The major function of the Career Education Resource Center is to make certain that educators, students, and other interested groups have access to the widest variety of up-to-date career education materials and community resource information. These resources are the tools that help prepare all Coloradoans to meet the demands of their vocational, advocational, community and family roles. A catalog containing these resources has been disseminated to all school buildings in the State, all career education coordinators, the U.S. Office of Education, and various other interested individuals upon request.

During 1979 the Center has accomplished substantial increase in patron useage, material check-outs, materials collected, media presentation, and toal materials available in the catalog. Between 1975 and 1979 check-outs increased from 2,165 to 8,887, a gain of 311 percent. Currently the materials collected, which are donated by business and industry, commercial publishers, and classroom teachers, have an estimated value of over \$275,000. These materials are available on a check-out basis, free-of-charge to anyone in the State.

In November, 1978, the State Career Education Resource Center inaugurated the operation of the computerized Community Resource Bank. The Bank stores and retrieves information about the following activities:

1. Classroom speakers
2. Field trip sites
3. Student shadow programs (or intern) sites

Over 250 major (or unique to Colorado) companies or agencies offer over 900 different activities to schools or other non-profit agencies. Generally these services are provided without cost to all eligible agencies in Colorado.

Upon request for information about available resources, the Resource Center staff provides the name, address, and phone number of contact persons in appropriate agencies or businesses. The computer system records usage of individual resources and enables the Resource Center staff to avoid over or under utilization of these resources. Over 400 requests for community resource information were filled during 1978-79.

Direction for the development and operation of the Community Resource Bank was provided by a steering committee composed largely of local community resource bank coordinators and members of the Colorado Department of Education Data Processing Unit. The steering committee assisted also in providing information on known resources, developing descriptive brochures, users guides, and in developing operational policies.

The maintenance of the Community Resource Bank is made possible by the contributions of private business concerns and governmental agencies, and it presents evidence of the benefits to be gained through close coordination between business and educational interests.

STATE STAFF

The State Staff provided assistance to local school districts and communities, the State Advisory Council for Career Education, community colleges, and universities. The following represents accomplishments during 1978-79.

- A. After conducting outside evaluations of career education proposals, the Staff presented recommendations to the State Advisory Council for Career Education, and the State Board of Education regarding approval of proposals. Thirty-one of thirty-five proposals submitted were approved for funding.
- B. The State Staff and the State Advisory Council initiated procedures for oral presentation of project ideas from abbreviated written proposal to outside project evaluation.
- C. The Staff prepared grant awards for approved grants and began procedures for monitoring the projects.
- D. The Project Staff coordinated liaison contacts with all approved projects.
- E. The Career Education Office Staff met with staff members of various units and programs in the Colorado Department of Education. This coordination resulted in closer ties among units and provided support for an administrative structure linking programs with similar functions.
- F. The State Staff helped prepare the State Plan for Career Education for 1979-80, which provided for the maintenance of community and education task forces in local communities, and also career guidance grants, both providing substantive changes in state level operation for career education.
- G. The Staff assisted in the supervision and operation of the State Career Education Resource Center including the development and operation of the computerized Community Resource Bank.
- H. Worked with the State Career Education Resource Center Staff in con-

ducting over 100 workshops or inservices.

- I. The State Coordinator prepared an annual report for the General Assembly.
- J. The Staff provide technical assistance in response to all requests from LEAs, communities, and higher institutions.
- K. The Staff and members of the Advisory Council coordinated the training of 34 regional facilitators who are to assist LEAs and communities upon request.
- L. The State Coordinator facilitated three meetings of the Career Education Executive Committee.
- M. The State Coordinator provide liaison between the Colorado Department of Education and Chief State School Officers.
- N. The Staff provided coordination between career education, vocational education, and higher education.

STATE ADVISORY COUNCIL

The State Advisory Council is made up of 23 members representing many areas of the State of Colorado. The council is appointed by the Governor and meets a minimum of six times per year. The council met four times since July and has become an active part of the career education thrust in Colorado. The following represents major areas of concentration.

- A. Continual support and assistance to the development of local advisory groups.
- B. Support for the development of business/education working committees at state and local levels.

- C. Support and involvement in establishing a partnership between higher education and the business community.
- D. The review and improvement of the guidelines for funds through the Career Education Act of Colorado.
- E. Supporting the continuation of career guidance activities in local school districts.

The Advisory Council has all members taking an active role in all areas of concern.

IV. EVALUATION

Attached you will find a copy of the 1978-79 evaluation report for Career Education in Colorado. The report was completed by Scott Murphy and Carolyn Dailey of the Planning and Evaluation Unit in the Colorado Department of Education. The report includes evaluation information and recommendations about all areas of career education operation.

PROJECT FUNDS TO LEAS

Sixty-six school districts were impacted through thirty-two career education project funds during 1978-79 (p.15). The processes for proposal evaluation allowing for oral presentations of project ideas were viewed positively with ninety-three percent of applicants indicating that the written format was easier than previously and ninety-seven stating they had adequate input to the readers (p. 20). Recommendations related to project funding are listed on page 32.

STATE CAREER EDUCATION RESOURCE CENTER

The services and materials of the State Career Education Resource

Center increased in all areas during 1978-79 (p. 6). The quality of materials was rated by ninety-seven percent of users as excellent or good (p. 9). A computerized statewide Community Resource Bank was made operational and 421 requests for services were filled during 1978-79 (p.11). Responses were overwhelmingly positive with 100 percent of users stating that the resources were appropriate and ninety-three percent rating the quality of resources as excellent or good and four percent as fair (p. 11). Recommendations are made on page 31.

STATE CAREER EDUCATION RESOURCE TEAM

The State Career Education Resource Team had forty-eight recorded requests for assistance all of which were filled (p. 13). The ratings of the quality of assistance ranged from 3.0 to 4.6 on a four point scale (p. 14). Recommendations are presented on page 31.

THE STATE CAREER EDUCATION ADVISORY COUNCIL

The State Advisory Council met six times, making recommendations to the Staff and the State Board of Education on career education policies and project funding (p. 4). The Council also facilitated the development of 3 three-week career guidance seminars funded largely through private sources. The Council also assisted Colorado Communities for Business and Education Interaction disseminating information to local education agencies (p. 5). Recommendations are presented on page 30.

The advancement of career education in Colorado has been positive and interesting. Needed services and materials have been provide to local education agencies for the improvement of education for all learners. The interaction between business, labor, and educational sectors has provided steadiness to career education. Colorado's State Plan calls for continued efforts to be made to service greater involvement of these sectors at both state and local community levels.
