I. INTRODUCTION

A. Purpose

A Phase I Environmental Site Assessment (ESA) was performed by HWT HazWaste Technologies® Corporation for the area encompassing the CDOT right of way corridor approximately 200 feet on either side of the existing SH 96A (4th St.) Bridge over the Arkansas River in Pueblo, Colorado.

This report provides a review of historical records and readily available files and databases maintained by regulatory agencies, information obtained through interviews with knowledgeable persons and results of a field reconnaissance of the subject property. The field reconnaissance was performed at various times starting on June 6, 2001 and ending on July 2, 2001.

B. Site Description

The area of interest is a 400 foot wide right of way corridor along 4th Street (SH96A) from Abriendo Avenue to Elizabeth Street, including the existing bridge over the Arkansas River and the rail yard. Properties to the east of the bridge include the Midtown Shopping Center which is bordered on the east by Midtown Circle. Properties between Midtown Circle and Elizabeth Street are commercial buildings and consist of businesses and gas stations. A vacant gas station as well as an operational gas station are located in this area along 4th Street in addition to a laundry. The area to the west of the bridge is a combination of commercial and residential properties. A gas station is located at the corner of Abriendo and 4th Street. A auto repair shop is located further east at the corner of Corona and 4th Street. The area beneath the bridge is zoned "heavy industrial" and has been occupied by rail yards since the late 1800s. Rail tracks for the BNSF and Union Pacific railroads (ie. the railroad right of way) are located directly beneath the 4th Street bridge. The bridge also spans the Arkansas River, a concrete flood control levee along the northeast bank of the river and a pedestrian/bike path along the southwest bank of the river.

II. SITE CHARACTERISTICS

A. Topography

The rail yard beneath the bridge is located on the river bed that was the Arkansas River until the flood of 1921. The Arkansas river is separated from this property by a concrete flood wall.

B. Surface Water

The nearest surface water is the Arkansas River which runs from the northwest to the southeast beneath the 4th Street bridge.

C. Geology and Hydrogeology

Four soil borings were conducted by Goodson & Associates, Inc. In order to determine soil characteristics for structural engineering design. One of these borings was conducted on Union Pacific property. A representative from HWT was present when the borings were performed. Soil cuttings were monitored with a Photoionization Detector (PID). No PID readings above background levels were detected. No signs of visible contamination were found. The soil in the area generally consists of sand underlain by claystone shale. Boring logs prepared by Goodson & Associates are included in Appendix D.

No monitoring wells were installed and subsurface drainage information is not available.

III. SITE HISTORY

A review of historical information consisting of Sanborn maps, aerial photographs and interviews with persons familiar with the area of interest revealed the past uses of the properties in the vicinity. This historical information is discussed in detail in the sections that follow.

A. Local Agency Records

The Pueblo Fire Department has no records of past spills or incidents involving hazardous materials for the area of interest. The Pueblo Department of Zoning Administration also had little knowledge of any incidents in the area adjacent to the 4th Street bridge. The rail yard beneath the bridge has been zoned I-3 (heavy industrial use) since before 1968.

B. Interviews

Interviews were conducted with persons familiar with the properties adjacent to the 4th Street bridge. These properties include those along 4th Street between Abriendo Avenue to the west and Elizabeth Street to the east. Those properties within 3 blocks to the north and south of 4th Street were also considered to be within the area of interest. Interviews with current and former employees of BNSF railroad were also conducted. Details are included in Appendix A.

Roxanne Nichols, an employee of the Midtown Paint and Body Shop located at 824 West 4th Street, was interviewed on June 6, 2001. Ms. Nichols has worked for this company since 1973 and is not aware of any spills, dumping or other hazardous waste activities on this property. Prior to 1973, a boat shop occupied this building. The building to the west of this site, within the Midtown Loop, is now vacant but was previously used as a storage facility for Sears, Roebuck and Company. Ms. Nichols also mentioned the possibility of a UST in the parking lot of this property but did not have any further information. She referred HWT to the property manager for additional information.

The property manager for the Midtown Shopping Center property, Cheryl Fitch, was interviewed on June 6, 2001. She is quite knowledgeable with regards to the property that occupies approximately 30 acres to the east of the 4th Street bridge. This property extends from the fence line, that demarcates the beginning of BNSF property beneath the 4th Street bridge, east to Midtown Circle. It also consists of the properties that are located on the south side of 4th Street, including the Midtown Paint and Body Shop, north to 8th Street. Ms. Fitch has knowledge of this area since approximately 1956. She is not aware of any spills, dumping or other hazardous waste activities on this property. Her knowledge is based on two Phase I reports and one Phase II report involving the Midtown Shopping Center property. All three reports were completed within the past two years. According to Ms. Fitch, these reports indicate that UST's were located or used on the property, but they have been removed and the sites closed. HWT requested copies of these reports from the Property Manager. However, the management of the Midtown Shopping Center has refused to provide them to HWT and are therefore not available.

The BNSF Roadmaster, Lawrence Guerrero, was interviewed on June 21, 2001. He has knowledge of the West 4th Street Yard that is located beneath the 4th Street bridge. Mr. Guerrero has worked on the railroad since 1974 and left Pueblo in the early 1980's. He returned to Pueblo in 1995 and became the Roadmaster for BNSF in January 2001. When asked about previous activities that were performed on this site, Mr. Guerrero mentioned a fueling facility that was located on this property between the 4th Street bridge and the terminal building. This large tank contained diesel fuel and was used to provide fuel for the engines during the early 1970s. The exact size of the tank is unknown. Mr. Guerrero is not aware of any spills, dumping or other hazardous waste activities on this property.

C. Aerial Photographs

Aerial Photographs for the area of interest in Pueblo, CO were reviewed on June 21, 2001. The photographs reviewed included those from 1987, 1978, 1970, 1959 and 1939. All photographs, except for 1939, were provided by the Planning Department. The 1939 photograph was displayed on the wall of the Public Works and Engineering Department. A detailed description of the aerial

photograph review is discussed below. Aerial photographs are included in the Appendix.

1987 photograph (scale: 1" = 100')

The terminal building and the maintenance buildings are the only major structures in the BNSF rail yard. The building adjacent to the Midtown Paint and Body Shop, within the Midtown Loop on the south side of 4th Street, appears to be vacant.

1978 photograph (scale: 1" = 600')

An additional structure is visible on BNSF property between the 4th Street bridge and the terminal building. The structure is at the approximate location of the fueling facility that Mr. Guerrero described during an interview with HWT.

1970 photograph (scale: 1" = 400')

The "fueling facility" is visible between the 4th Street bridge and the terminal building.

1959 photograph (scale: 1" = 500')

An above ground tank is visible at the location believed to be the fueling facility on BNSF property. This tank is located between the 4th Street bridge and the terminal building. The building adjacent to the Midtown Paint and Body Shop, within the Midtown Loop on the south side of 4th Street, appears to be occupied. A driveway connects the building to the Midtown Loop and an area that looks like a scrap pile is located on the property to the west of the building.

1939 photograph (scale: 1" = 800')

This photograph shows farm land to the east and west of the bridge over the Arkansas River. This farm land occupies the area that is now the Midtown Shopping Center. The bridge that is shown on this photograph is not as large as the current bridge that was built in 1958.

D. Sanborn Maps

Sanborn maps from the year 1963 were reviewed at the Planning Department. Additional maps from 1952 were reviewed in the Public Works Department. Sanborn maps from 1941, 1905 and 1904 were found at the Pueblo Public Library. Detailed information from a review of these maps is listed below. Sanborn maps are included in the Appendix.

1963 Sanborn Maps

Coverage of the Sanborn map on the east side of the 4th Street bridge adjacent to the BNSF rail yard was limited. The Midtown Shopping Center lot was the only area on the east side of the 4th Street bridge that was depicted on a Sanborn map. This lot included the Sears, Roebuck & Co. building as well as an additional building to the south. The area to the west of the 4th Street bridge from Elmhurst Place to Abriendo was depicted on a separate Sanborn map. This map revealed primarily residences to the north and south of 4th Street and some businesses located along 4th Street including an auto service center at the corner of 4th Street and Abriendo Avenue. An auto repair shop was also located at the corner of Wilson Avenue and 4th Street.

1952 Sanborn Maps

Coverage of the Sanborn map on the east side of the 4th Street bridge was again limited to the Midtown Shopping Center lot. This lot included the Sears, Roebuck & Co. building and a bowling alley. The Sanborn map of the area to the west of the 4th Street bridge primarily shows residences. An auto repair shop was located on W. Corona (Josephine Ave.) and a filling station was located on the corner of 4th Street and Abriendo Avenue. A dry cleaning facility was also located at the corner of Wilson Avenue and 4th Street.

1941 Sanborn Maps

The area immediately to the east of the bridge was not covered by a Sanborn map. According to a library employee familiar with the area, celery farms were located along the east side of the bridge. This information agrees with the aerial photographs from 1939. The Sanborn map of the area to the west of the bridge consisted primarily of residences and vacant lots. An auto repair shop was located on West Corona. This map also depicted 4th Street (Sneath Avenue) as an unpaved road crossing the Arkansas River.

1904/1905 Sanborn Maps

The area immediately to the east of the bridge was not covered by a Sanborn map. The Sanborn map of the area to the west of the bridge reveals Corona Avenue as the street closest to the Arkansas River. The area consists primarily of residences and vacant lots with Sneath Avenue shown crossing the river.

E. Title Search

The parcels immediately to the east and west of the 4th Street bridge were reviewed to determine the search areas. The Mapping Department at the Pueblo County Courthouse provided a parcel map of the area of interest. Title information for parcels closest to the bridge was researched based on the

possible alignments being studied. These parcels include the Midtown Center properties N, O, P, R, S, and T that are shown in Figure 3-1.

Chain of title information is shown in Table 3-1. Four parcels on the east side of the bridge and eight parcels on the west side of the bridge were searched and the results are shown in this table.

IV. CURRENT SITE CONDITIONS

A. Site Reconnaissance

A site reconnaissance of the area of interest, excluding the rail yard, was conducted on June 6, 2001 and June 12, 2001. An approximately 200 foot wide section of the railroad tracks beneath the 4th Street bridge was inspected on July 2, 2001 with a Union Pacific representative. Most of the Union Pacific property beneath the bridge, consisting of 22 tracks, was inspected. However, trains were occupying some of the tracks during this site visit, preventing access to areas in between the trains. The 4 tracks on BNSF property were visually inspected from the edges of the property. No areas of stained soils or stressed vegetation were encountered during these site visits.

B. Paint Sampling

Sampling of the paint beneath the east side of the 4th Street bridge was also performed. This sampling was performed on June 6, 2001 and the paint chips collected were analyzed for TCLP metals. The sample collected was a composite of six locations beneath the bridge. Results indicated that the paint contained lead (24.6 mg/L) above the regulatory limit (5 mg/L). The analytical report is included in Appendix B.

C. Description of Surrounding Areas

The areas of interest located to the east and west of the bridge include both commercial and residential buildings. The area beneath the bridge along the Arkansas River is zoned for heavy industrial use and is primarily occupied by the BNSF and Union Pacific railroads. The bridge also spans the Arkansas River. There is a concrete flood control levee along the northeast bank of the river and a pedestrian/bike path along the southwest bank of the river beneath the bridge.

V. REVIEW OF AGENCY RECORDS

The following US EPA and State databases were searched as part of this Phase I Environmental Site Assessment:

NPL	National Priority List
CORRACTS	RCRA Corrective Actions (w/o TSD)
TSD CORRACTS	RCRA Corrective Actions and associated TSD
SPL	State equivalent priority list
CERCLIS/NFRAP	List of Superfund sites currently or formerly under review
TSD	RCRA permitted treatment, storage, disposal facilities
LUST	State list of leaking UST's
SWLF	State list of permitted solid waste landfills, incinerators, or transfer stations
WATER WELLS	Federal and State Drinking Water Sources
RCRA Viol	RCRA violations/enforcement actions
UST/AST	State list of registered underground or aboveground storage tanks
ERNS	Emergency Response Notification System list of spills
GNRTR	RCRA registered small or large generators of hazardous waste
SPILLS	State list of reported spills

A copy of the database search report is included in Appendix C.

Search distances were extended one mile beyond ASTM minimum distances for this report to cover the area of interest. The database search was centered at the midpoint of the 4th Street bridge. All sites found during the database search within a radius of 1.25 miles from the center of the bridge, are listed in Tables 5-1 through 5-6. Those sites that were within approximately 3 blocks on either side of the bridge were investigated further as they have the greatest potential for impacting the subject right of way corridor. A 3 block with on each side of the CDOT right of way was used as agreed to with CDOT Region 2 Environmental personnel. These sites are denoted with an asterisk after the name of each location in Tables 5-1 through 5-6. Detailed information is included in Appendix C.

A. CORRACTS Sites

The only site found on the RCRA CORRACTS list located within one mile of the area of interest is West Plains Energy (Map ID No. 31B). This site is located 0.71 miles east of the area of interest at 11th Street (West End). The prioritization assigned to this sites was not reported. This site is located more than three blocks away from the 4th Street bridge and is listed on Table 5-1

B. TSD CORRACTS Sites

The only site found on the TSD RCRA CORRACTS list located within 1.25 miles of the area of interest is the Rockwool Plant (Map ID No. 64). This site is located 1.2 miles from the area of interest at 600 Old Smelter Road. It is located more than three blocks away from the bridge and is listed on Table 5-1.

C. CERCLIS/NFRAP Sites

Sites found on the federal CERCLIS and NFRAP lists located within 1.25 miles of the area of interest are shown in Table 5-2. Francisco Lane Pesticides is on the list (according to the CDPHE) due to a one time generation of hazardous waste. The facility is now inactive and no further information is available. In addition to this site, Public Service Pueblo Gas (Xcel Energy) is located within three blocks of the subject site. According to Dan Buckley of Xcel Energy, only an office building is located within three blocks of the 4th Street bridge. He has no knowledge of any spills or hazardous waste at this location. The CERCLIS/NFRAP designation is associated with the Xcel Energy power plant that is located in Denver, Colorado. A natural gas facility affiliated with Xcel energy is located just outside of Pueblo and is more than three blocks from the area of interest. The remaining sites on the database list are located more than three blocks away from the 4th street bridge.

D. SPL Sites

Sites found on the State Priority List located within one mile of the area of interest are shown in Table 5-3. All of these sites except Public Service Pueblo Gas (Xcel Energy) are located more than three blocks away from the 4th Street bridge. As stated in the previous section, the CERCLIS/NFRAP as well as the SPL designation are not associated with the Xcel office building in the vicinity of the 4th Street bridge.

E. SWLF Sites

Sites found on the State list of Solid Waste Landfills located within 1.25 miles of the area of interest are shown in Table 5-4. The only site listed, Board of Water Works, is located more than three blocks away from the 4th Street bridge.

F. LUST Sites

Sites found on the list of Leaking USTs located within 1.25 miles of the area of interest are shown in Table 5-5. The sites within three blocks of the 4th Street bridge are denoted with an asterisk. According to the Oil Inspection Section, all of these sites have been closed. Files at the Oil Inspection Section on those sites within three blocks of 4th Street were reviewed. Information from this file review is shown in Table 5-5a. There were no records of contamination from any of these sites extending beyond the respective property boundaries.

G. Water Wells

Numerous wells were located in the vicinity of the area of interest. The information on these wells that was supplied by the USGS indicates that these wells have not been sampled for environmental contaminants.

H. RCRA Violation/Enforcement Actions Sites

Sites found on the RCRA Violation/Enforcement Actions list located within 1.25 miles of the area of interest are shown in Table 5-6. Pueblo Brake Clutch Inc. is on the list (according to the CDPHE) due to a warning letter that was issued. The site was closed out on 9/14/89. The remaining sites are located more than three blocks away from the 4th street bridge.

VI. CONCLUSION

Record searches on properties within the area of interest did not indicate any particular location where contamination is evident. However, since some of the properties belong to railroads and other industrial users and have been in operation for several decades, subsurface contamination may still exist in the CDOT right of way. Additional soil borings to be conducted in the next phase of the project should be monitored visually and with a PID in order to ensure that no contamination exists. Although the search of OIS records indicated a number of leaking UST sites near 4th Street, these sites have all been closed by the OIS and additional review of OIS records showed no signs that contamination from any of these sites have as yet impacted the CDOT right of way corridor. The limited number of soil borings in the area of the bridge showed no signs of soil contamination. Site reconnaissance showed no visible signs of contaminated soil or stressed vegetation. However, the paint on the 4th Street bridge does contain lead and will have to be disposed of properly if the bridge is removed. A notification will have to be provided to a contractor who intends to perform cutting or grinding operations on the metal structure of the bridge and handrails. Sampling of the soil beneath the bridge on BNSF/UP property will need to be

considered in order to determine if contaminated soils and/or groundwater are present.

VII. LIMITATIONS

This report has been prepared for the exclusive use of CDOT. Services performed were in a manner consistent with the level of care and skill ordinarily exercised by members of the environmental risk assessment profession practicing contemporaneously under similar conditions in the area of the project. This includes, but is not limited to, preliminary investigation and inquiry about previous ownership and uses of the property and review of existing city, county and state records noted herein. The information provided herein is prepared to be responsive to the requirements of CERCLA (42 U.S. 9601, et. seq.) and reflects conditions as of the dates of the site visits. No other warranty, expressed or implied, is made.

Our assessment was limited strictly to identifying potential environmental issues.

This report is based on existing site conditions and observations made during the site visit. Other data were obtained from public files of governmental agencies. HazWaste Technologies Corporation accepts no liabilities for data obtained from these sources.

APPENDIX A

Interview Information

**PHASE I Environmental Site Assessment
Interview Form**

Property Name: BNSF

Property Address: West 4th Street Yard

Interviewer: Jeffrey Raposa

Person Interviewed: Lawrence Guerrero

Date of Interview: June 21, 2001

Interview Questions:

1. **How long have you lived at this address?** I have lived in Pueblo since 1974. I have worked on the railroad since 1974 and then left Pueblo in the early 1980's. Returned to Pueblo in 1995 and became the roadmaster for BNSF in January 2001.

2. **What are the main operations that occur on this site?** The site consists of a section house and a terminal. Approximately 15 workers are on site working in the signal department or doing mechanical work. The majority of the trains that pass through the yard are loaded with coal. There are not many freight trains. None of the materials transported through this yard are stored on the site.

3. **What activities were previously performed in this yard?** There used to be a hump yard located just north of the terminal from the early 1970's until the early 1980's. The hump yard was used to sort the train cars. A single

track would lead to numerous other tracks at the base of a hill or "hump".
The cars could be separated at this point and directed to another track.
There also used to be a fueling facility on this site between the 4th street
bridge and the terminal building. This large tank contained diesel fuel and
was used to fuel the engines. The exact size of the tank is unknown, but it
was in place during the early 1970s. Sand was also stored at this location.
It was loaded onto the trains so that they could use the sand for traction.

4. **Are you aware of any past spills at this fueling area?** I am not aware of
any spills. There were catch pans under the tracks at this area to catch the
contaminated water/fuel that may have dripped off of the trains. The catch
basins would carry the contaminated water/fuel to a storage area where it
was collected and removed.
5. **Are you aware of any spills or hazardous materials activities on this**
property? No
6. **Are you aware of any USTs located or used on the property?** No
7. **Do you know of others who may have knowledge of the property?** No,
most workers are new or are around the same age as myself.

PHASE I Environmental Site Assessment
Interview Form

Property Name: Midtown Shopping Center

Property Address: 1000 W 6th Street

Interviewer: Jeffrey Raposa

Person Interviewed: Cheryl Fitch, RPA (Real Estate Manager)
TrammellCrow Company

Date of Interview: June 6, 2001

Interview Questions:

1. **How long have you lived at this address?** Cheryl has knowledge of this property since approximately 1956. Two Phase I ESAs and a Phase II were performed on the property. Copies of these documents may be available after 6/20. She has to receive approval before this can be done.
2. **What is the extent of this property ?** The Midtown Shopping Center Property consists of approximately 31 acres. The property extends from the fence line, that marks the beginning of BNSF property beneath the 4th street bridge, east to the Midtown Circle. It also consists of the properties that are located on the south side of 4th street , including Midtown Paint and Body, north to 8th street.
3. **Were any areas of concerns discovered during your investigations?**
Nothing of importance was detected. The liquor store in the Midtown Shopping Center lot was originally a gas station. The bingo parlor located at

approximately 816 4th street was originally an antique store that refinished furniture between 1987 and 1997. Testing in this area in 1999 revealed no contamination. Testing revealed that the groundwater in this area was not a concern.

4. **Are you aware of any USTs located or used on the property?** Yes,
however they were disposed of properly and were registered with the state.

5. **Are you aware of any spills or hazardous materials activities on this property?** No

6. **Do you know of others who may have knowledge of the property?**

Yes, Susan Steele, Executive Director of Temple Hoyle Buell Foundation,
may have records that date back to day 1 along with a title report. Her address
is 1666 S University Blvd Suite B, Denver and her phone number is 303-744-
1688.

Additional Conversations with Cheryl Fitch:

Date: 6/8/01

Conversation: The former head of the development corporation passed away recently. The head of the foundation is away until June 19th. Cheryl has to speak with the head of the foundation before any report copies can be issued to HWT. The Phase I was completed approximately 2 years ago when the property was sold. An additional Phase I was completed about 1 year ago due to a change in zoning and the addition of the Aarons building. A Phase II was completed last July/August.

Date: 6/21/01

Conversation: Speak with Cheryl while collecting information for the Phase I in Pueblo. Ask her if copies of the Phase I and II are available. She said that she will not know until Wednesday 6/28. She told me to give her a call then.

**PHASE I Environmental Site Assessment
Interview Form**

Property Name: Midtown Paint & Body

Property Address: 824 West 4th Street

Interviewer: Jeffrey Raposa

Person Interviewed: Roxanne

Date of Interview: June 6, 2001

Interview Questions:

1. **How long have you lived at this address?** Roxanne has knowledge of this property since 1973.

2. **What was this property previously used for ?** The property was used by a boat shop prior to 1973. She feels it was possibly a gas station before it was a boat shop.

3. **What was the adjacent property within the Midtown Loop used for?**
The building to the west of the property is now vacant. However, Roxanne remembers it being used by Sears-Roebuck as a storage facility.

4. **Are you aware of any USTs located or used on the property?** Yes.

Roxanne remembers a UST in the parking lot of Midtown Paint & Body.

However, she doesn't have any details about this UST.

5. **Are you aware of any spills or hazardous materials activities on this property?** No

6. **Do you know of others who may have knowledge of the property?**

Yes, Cheryl Fitch who is the property manager and a real estate manager at Trammell Crow Company. The interview form with information from Ms. Fitch can be found in this Appendix.

**PHASE I Environmental Site Assessment
Interview Form
(Phone Interview)**

Property Name: Union Pacific

Property Address: 400 West B Street

Interviewer: Jeffrey Raposa

Person Interviewed: Doug Redlin

Date of Interview: June 28, 2001

Interview Questions:

1. **How long have you lived/worked at this address?** I have worked for the Union Pacific (UP) railroad for 28 years and have worked at the Pueblo facility for 21 years.

2. **What are the main operations that occur on this site?** The site is used as a railroad yard. Coal cars are the main traffic through this yard although there is limited freight traffic. There are four large tanks present on the site that are used to refuel the engines.

3. **What activities were previously performed in this yard?** The yard was previously used for freight traffic. This included freight that required hazardous waste manifests.

4. **Are you aware of any past spills at this fueling area?** The only spills Doug was aware of involved coal trains that tipped over within the yard. He was not aware of any major spills on the property that involved hazardous waste. He was not aware of any spills with regards to the fuel tanks that are on-site.
5. **Are you aware of any spills or hazardous materials activities on this property?** No
6. **Are you aware of any USTs located or used on the property?** No,
but there are 4 above ground storage tanks for fuel on-site.
7. **Do you know of others who may have knowledge of the property?** No,
most workers are new or are around the same age as myself.

Record of Phone Conversation

Date of Call:

May 29, 2001

Call Initiated by:

Eric Marler
HazWaste Technologies Corporation

Call to:

James L. Ozment
Independent Railway Consultant
15246 W. Ellsworth Place
Golden, CO 80401
(303)277-1637

Subject:

4th Street Bridge over Arkansas River, Pueblo, CO

Q: What is the history of the rail yard in the area of the subject bridge?

A: *Until 1921 when the concrete levy was built, the area that is now the railyard was part of the river channel. In 1922 the Rio Grande Railroad along with the Santa Fe Railroad built the rail yard. It has been used as a rail yard continuously since then.*

Q: Are there underground storage tanks or other storage of hazardous materials in this yard?

A: *No. I am not aware of any storage tanks or any hazardous materials storage at this location.*

Q: Have there been any spills, dumping or other events that may have impacted the area environmentally?

A: *No. I am not aware of any spills or dumping at the site.*

SITE ASSESSMENT PLUS REPORT (EXTENDED BY 1 MILE)

DESCRIPTION OF DATABASES SEARCHED

A) DATABASES SEARCHED TO 2 MILE

NPL
SRC#: 19 VISTA conducts a database search to identify all sites within 2. mile of your property.
The agency release date for National Priorities List was December, 2000.

The NPL Report is the US EPA's registry of the nation's worst uncontrolled or abandoned hazardous waste sites. NPL sites are targeted for possible long-term remedial action under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980.

SPL
SRC#: 176 VISTA conducts a database search to identify all sites within 2. mile of your property.
The agency release date for Voluntary Cleanup List was June, 2000.

This database is provided by the Colorado Department of Public Health and Environment, Haz Mat Waste Division. The agency may be contacted at: 303-692-3380.

CORRACTS
SRC#: 14 VISTA conducts a database search to identify all sites within 2. mile of your property.
The agency release date for RCRIS Corrective Action Sites was June, 2000.

The CORRACTS database contains information concerning RCRA facilities that have conducted, or are currently conducting a corrective action. A Corrective Action Order is issued pursuant to RCRA Section 3008 (h) when there has been a release of hazardous waste or constituents into the environment from a RCRA facility. Corrective actions may also be imposed as a requirement of receiving and maintaining a TSDF permit.

RCRIS-TSDC
SRC#: 556 VISTA conducts a database search to identify all sites within 2. mile of your property.
The agency release date for RCRIS TSDs Subject to Corrective Action was June, 2000.

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA TSDCs are treatment, storage and/or disposal facilities that are subject to corrective action under RCRA.

B) DATABASES SEARCHED TO 1 1/2 MILE

**CERCLIS
SRC#: 17** VISTA conducts a database search to identify all sites within 1.5 mile of your property.
The agency release date for Comprehensive Environmental Response, Compensation and Liability Information Sys was December, 2000.

The CERCLIS database is a comprehensive listing of known or suspected uncontrolled or abandoned hazardous waste sites. These sites have either been investigated, or are currently under investigation by the U.S. EPA for the release, or threatened release of hazardous substances. Once a site is placed in CERCLIS, it may be subjected to several levels of review and evaluation, and ultimately placed on the National Priorities List (NPL).

**NFRAP
SRC#: 18** VISTA conducts a database search to identify all sites within 1.5 mile of your property.
The agency release date for No Further Remedial Action Planned was December, 2000.

The No Further Remedial Action Planned Report (NFRAP), also known as the CERCLIS Archive, contains information pertaining to sites which have been removed from the U.S. EPA's CERCLIS database. NFRAP sites may be sites where, following an initial investigation, either no contamination was found, contamination was removed quickly without need for the site to be placed on the NPL, or the contamination was not serious enough to require federal Superfund action or NPL consideration.

**RCRIS-TSD
SRC#: 12** VISTA conducts a database search to identify all sites within 1.5 mile of your property.
The agency release date for RCRIS Treatment, Storage and Disposal Facilities was June, 2000.

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA TSDs are facilities which treat, store and/or dispose of hazardous waste.

**SWLF
SRC#: 23** VISTA conducts a database search to identify all sites within 1.5 mile of your property.
The agency release date for USGS Solid Waste Landfills was December, 1991.

This database is provided by the United States Geological Survey. The agency may be contacted at: 703-648-5613.

**SWLF
SRC#: 179** VISTA conducts a database search to identify all sites within 1.5 mile of your property.
The agency release date for Transfer Stations was January, 2000.

This database is provided by the Colorado Department of Public Health and Environment. The agency may be contacted at: 303-692-3450.

**SWLF
SRC#: 180** VISTA conducts a database search to identify all sites within 1.5 mile of your property.
The agency release date for Solid Waste Facility List was January, 2000.

This database is provided by the Colorado Department of Public Health and Environment. The agency may be contacted at: 303-692-3450.

SWLF
SRC#: 181

VISTA conducts a database search to identify all sites within 1.5 mile of your property.
The agency release date for Historical Landfill Database was January, 2000.

This database is provided by the Colorado Department of Public Health and Environment. The agency may be contacted at: 303-692-3450.

SWLF-CO
SRC#: 170

VISTA conducts a database search to identify all sites within 1.5 mile of your property.
The agency release date for City of Pueblo and Pueblo County Designated Landfill Sites was April, 1990.

This database is provided by the Pueblo County Department of Health. The agency may be contacted at: 719-583-4338.

LUST
SRC#: 178

VISTA conducts a database search to identify all sites within 1.5 mile of your property.
The agency release date for Leaking Underground Storage Tank Trust Fund Sites was January, 2000.

This database, formerly provided by the Colorado Department of Labor, State Oil Inspector, is no longer distributed by the source agency.

LUST
SRC#: 184

VISTA conducts a database search to identify all sites within 1.5 mile of your property.
The agency release date for Leaking Underground Storage Tanks - Active Closed was January, 2001.

This database is provided by the Department of Labor, State Oil Inspector. The agency may be contacted at: 303-620-4302.

USGS-WELLS
SRC#: 3

VISTA conducts a database search to identify all sites within 1.5 mile of your property.
The agency release date for USGS Water Wells was March, 1998.

The Ground Water Site Inventory (GWSI) database was provided by the United States Geological Survey (USGS). The database contains information for over 1,000,000 wells and other sources of groundwater which the USGS has studied, used or documented during research.

C) DATABASES SEARCHED TO 1 1/4 MILE

RCRIS-VIOL
SRC#: 11

VISTA conducts a database search to identify all sites within 1.25 mile of your property.
The agency release date for RCRIS Facilities with Violations was June, 2000.

The Resource Conservation and Recovery Act Information System (RCRIS) identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRIS Violations report contains information concerning facilities that have been cited for violations of RCRA, as well as any enforcement actions taken against the facility.

UST
SRC#: 183 VISTA conducts a database search to identify all sites within 1.25 mile of your property.
The agency release date for Underground Storage Tanks was January, 2001.

This database is provided by the Department of Labor, Oil Inspection Section. The agency may be contacted at: 303-620-4300. Be advised that some states do not require registration of heating oil tanks, especially those used for residential purposes.

AST
SRC#: 182 VISTA conducts a database search to identify all sites within 1.25 mile of your property.
The agency release date for Aboveground Storage Tanks was January, 2001.

This database is provided by the Department of Labor, Oil Inspection Section. The agency may be contacted at: 303-620-4300.

TRIS
SRC#: 2 VISTA conducts a database search to identify all sites within 1.25 mile of your property.
The agency release date for Toxic Release Inventory System was January, 1998.

All facilities that manufacture, process, or import toxic chemicals in quantities in excess of 25,000 pounds per year are required to register with the EPA under Section 313 of the Superfund Amendments and Reauthorization Act (SARA Title III) of 1986. Data contained in the TRIS system covers approximately 20,000 sites and 75,000 chemical releases.

D) DATABASES SEARCHED TO 1 1/8 MILE

ERNS
SRC#: 8 VISTA conducts a database search to identify all sites within 1.125 mile of your property.
The agency release date for Emergency Response Notification System was December, 1999.

ERNS is a national computer database system that is used to store information on the sudden and/or accidental release of hazardous substances, including petroleum, into the environment. The ERNS reporting system contains preliminary information on specific releases, including the spill location, the substance released, and the responsible party.

RCRA-LQG
SRC#: 16 VISTA conducts a database search to identify all sites within 1.125 mile of your property.
The agency release date for RCRIS Large Quantity Generators was June, 2000.

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA Large Generators are facilities which generate at least 1000 kg./month of non-acutely hazardous waste (or 1 kg./month of acutely hazardous waste).

RCRIS-SQG
SRC#: 15

VISTA conducts a database search to identify all sites within 1.125 mile of your property.
The agency release date for RCRIS Small Quantity Generators was June, 2000.

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities database is a compilation by the EPA of facilities which report generation, storage, transportation, treatment or disposal of hazardous waste. RCRA Small Quantity Generators are facilities which generate less than 1000 kg./month of non-acutely hazardous waste.

SPILLS
SRC#: 186

VISTA conducts a database search to identify all sites within 1.125 mile of your property.
The agency release date for Colorado ERNS Database was October, 2000.

This database is provided by the Colorado Department of Public Health Environment.
The agency may be contacted at: 303-692-3023.
